

## Worldview Discipleship

### Introduction

In the practice of discipleship (helping someone live more and more in the Jesus Way) you must first identify the worldview foundations that he/she is building his/her life on. Every person in the world has to answer the deep questions that form their view of reality. This is worldview in a nutshell, the system of answers to life-shaping questions in which an individual puts their faith.

Discipleship involves the exchanging of the natural worldview into a biblical worldview. When we say that discipleship begins with identifying the “starting point” of the individual, we mean understanding their unique natural worldview that has been informed by the world system that exists in the culture in which they live.
