## *The True Cost of Abortion*

- One in four women will have at least one abortion by the age of 45.
- 70% of women who have an abortion identify their religious preference as Christian.
- 50% of women report they actively attended church once or twice a month at the time when their abortion was performed.
- 75% of women report no one in their church knows about their abortion.

## *Physical Risks*

- One in ten women who undergo an abortion experience immediate complications after the abortion, 20% of which are life threatening.
  - Abortion can cause physical damage to a women's reproductive system resulting in infertility.
  - Chemical abortions (abortion pill) are on the rise. In 2020, 54% of all abortions were done using the abortion pill. In 2019, that number was 40%. By 2022, it is predicted to account for 70% of abortions.
  - There has been a 500% increase in emergency room visits due to chemical abortions.
  - Chemical abortions have led to the death of dozens of women. The FDA has documented thousands of complications related to chemical abortion.
  - There is an 81% increase of mental health problems after abortion.
  - Each year at least 50,000 women will experience serious emotional and mental health issues after abortion.
- ## *Mental/Emotional Risks*
- After-abortion trauma is an emotional and psychological impact sometimes experienced by women after an abortion. Symptoms are similar to those of post-traumatic stress disorder.
  - There are increased rates of substance abuse and suicide among women who have experienced an abortion.

## MEMORY VERSE ←

2 Timothy 2:15 (NIV) - Do your best to present yourself to God as one approved, a worker who does not need to be ashamed and who correctly handles the word of truth.
