

Prayer Requests

- Dawn Katzer - Please keep Dawn in your prayers today and over the coming days.

She is currently dealing with a painful kidney stone. She is praying for a miracle—that the stone passes naturally today or tonight—so she can avoid surgery scheduled for tomorrow, as well as the placement of a painful stent and a lengthy recovery that will keep her out of work for the rest of the week.

- Josiah Stanley - as of Sept. 5th - Please continue to keep Josiah in your prayers. He was taken to the emergency room last night for ongoing dehydration and was given a bag of IV fluids. Doctors are continuing to closely monitor his heart rate and rhythms using his heart monitor. Please pray for sustained hydration, steady and safe heart rhythms, and wisdom for his medical team as they monitor his progress.
 - He is currently dealing with dehydration, and his heart rate has been dropping into the 40s when he lies down. Pray that his hydration levels normalize quickly, that the upcoming heart monitor provides clear and accurate answers for his doctor.
