

# Prayer Requests

- Dawn Katzer - Dawn's procedure went well and they were able to get the stone removed. She is now at home recovering. Thank you for your prayers!
- Dorothy Sawyer - After Dorothy's appointment this afternoon they admitted her due to concern about her having a blood clot.
- Josiah Stanley - as of Sept. 5th - Please continue to keep Josiah in your prayers. He was taken to the emergency room last night for ongoing dehydration and was given a bag of IV fluids. Doctors are continuing to closely monitor his heart rate and rhythms using his heart monitor. Please pray for sustained hydration, steady and safe heart rhythms, and wisdom for his medical team as they monitor his progress.
  - He is currently dealing with dehydration, and his heart rate has been dropping into the 40s when he lies down. Pray that his hydration levels normalize quickly, that the upcoming heart monitor provides clear and accurate answers for his doctor.
