

PROJECT BLUE BEAM

There are government conspiracies and there are government secrets. Let us not be naive, all governments will have necessary secrets. Information that should not be made public due to national security issues. As much as 'We the People' want to know, there are secrets that are needed to provide security for our nation and the troops protecting it. But what if the secret is covering up a plot of a nefarious nature?

After WWII people all over the world for the first time were reporting seeing strange unidentified objects in the sky (UFOs). These objects were witnessed moving at great speeds and maneuverability. A couple of committees were created with the intent to explain and demystify the events, usually linking them to some manmade error. This is when UFOs became a public phenomenon. The US government and the media were involved in putting out misleading information which contradicted the original stories given by eyewitnesses. Recently the US Government has been speaking out on UFOs (or UAPs now). Why now? Did they just happen to forget to tell us all they know, or are they programming us for something to come?

Project Blue Beam has been talked about for the last 30 years. Few people have heard of it. In my own totally unofficial survey, I have yet to find anyone who has heard of Project Blue Beam. A lot of people have heard of Project Blue Book which is completely different and will be discussed later.

The goal of this information isn't to convince anyone that Project Blue Beam exists and is about to be initiated. It is to provide a brief description of what has been reported by several investigative journalists, scientists, military and ex-FBI agents over the past 30 years and if it is initiated, possibly how. Each topic will only be discussed in a limited format so the reader can get a basic understanding. If they choose, a reader can indulge in their own investigation starting with the references listed at the end.

As an engineer (retired) I have come across things that at first just didn't make sense to me and I wanted to pitch it aside. But I always went back to a quote by Albert Einstein, "Condemnation without investigation is the definition of insanity." In other words, I always reminded myself to keep an open mind.

What Is Project Blue Beam and What are its Goals

Project Blue Beam was first brought to light in the 1990's by a Canadian investigative journalist named Serge Monast. Serge published his book "Project Blue Beam", after being warned not to. Who warned him is unclear, but after publishing his book and going on a speaking tour he was arrested in Canada for home schooling his daughter. After being released the next morning on what was considered a bogus charge, Serge mysteriously dies of a heart attack.

Project Blue Beam is a joint venture by the US Government through NASA with the help of the UN. Since the UN is involved that will mean multiple governments will be involved.

The Goals of Project Blue Beam:

- To abolish all Christian and traditional religions in order to replace them with a one-world religion based on the 'cult of man'.

- To abolish all national pride and identity in order to establish a one-world identity and pride.

- To abolish the family as we know it in order to replace it by individuals all working for the glory of the one-world government.

- To destroy all individual artistic and scientific creating works to implement a world government's one mind set.

The 4 Steps of Project Blue Beam

Step 1 is the breakdown of all archeological knowledge. This will be done by using earthquakes at precise locations throughout the planet where supposedly new discoveries will be made and – for them – explain the wrong meaning of every major religion's basic doctrine.

Step 2 deals with a gigantic space show that will show with three dimensional optical holograms and sounds, holographic images to different parts of the world, each receiving images according to their region/national religious faith. This new god's image will be talking in all languages. This will be the introduction to a One-World Religion.

Step 3 with telepathic two-way communications where extremely low frequency (ELF), very low frequency (VLF) and low frequency (LF) waves will reach the people of earth making each one believes that his own god is talking to them from within their own soul.

Step 4 contains 3 different orientations:

- 1) To make mankind believe there is an alien invasion which will push each nation to use its nuclear arsenal to strike back. This will lead to full nuclear disarmament with the UN.
- 2) Make Christians believe that a rapture has happened with supposedly divine intervention of an alleged good alien force coming to save mankind from a satanic attack.
- 3) This is a mixture of electronic and supernatural forces.

After what will be called, 'The Night of a Thousand Stars' humanity is going to be ready to implore a new messiah to re-establish peace everywhere at any cost.

You may be thinking the same thing I was thinking when I first read about Project Blue Beam, that is, seriously? I'm supposed to believe this. The following pages will help answer those questions. We'll start in the WWII era and proceed to 2023.

Remember, "The mind is like a parachute. It works best when it's open".

The Philadelphia Experiment (aka Project Invisibility)

The Philadelphia Experiment was a Naval trial at making a ship (USS Eldridge) invisible to enemy radar. Hence, the official title, Project Invisibility. According to witnesses they saw a green fog form around the USS Eldridge, and it vanished, reappearing a few moments later. There were serious issues with the personnel on board, but otherwise was declared a success by the navy. There are 2 versions of this story, and I will give you a quick walk through each one.

Version 1 – has a Carl M. Allen (there are multiple versions of his name) sending letters to Morris K. Jessup, an astronomer and UFO investigator. Carl Allen was supposedly on the Eldridge and sent detailed information about the experiment to Jessup. Allen records the date of the Philadelphia Experiment as October 1943. An interesting part of this story is that Jessup had a book with 3 different handwritings correcting the navy's version. One handwriting was Allen's and the other two were never identified. On his way to share this with a colleague he mysteriously pulls off the road, attaches a hose to his exhaust and commits suicide. The book was never found. Interesting.

Version 2 – this has to do with Al Bielek who was also on the USS Eldridge. He was listed on the ship's log under a different name. It could be because he and his brother were there as physicists to observe the experiment. There are references at the end of this report on Bielek and his story. He was lecturing in the 1980's on The Philadelphia Experiment and the technology of how it worked. He reports the experiment as happening on August 12, 1943, and I'll cover his explanation as to why that date is important in a minute.

I believe there is credibility to both versions except for the date of the experiment. If you read into the Philadelphia Experiment, you will understand why Carl Allen has a different recollection than Bielek. Either way here are some interesting facts about the USS Eldridge. It was launched on July 25, 1943, and commissioned on August 27, 1943 (after Bielek's date Aug 12). Then sold to Greece in January 1951. The deck log (kind of like a Carfax) started on January 1, 1944. No records of any events in 1943. Hmm.

So, what does this have to do with Project Blue Beam?

Some prominent people who worked on the Philadelphia Experiment are Albert Einstein, Nikola Tesla and Dr. John Von Neumann. Tesla and President Roosevelt were friends, and the president personally invited Tesla to join this project. This is after Tesla had reported in press conferences that he had encountered extra-terrestrials. Bielek mentioned this as part of one of his lectures and was asked the question: If aliens were involved, why did they need us? His response was twofold: First, they need us to manufacture the parts they require (sounds more like demons) and second, they want to exchange technology for humans so they could conduct experiments on implants and chips.

Recently the CIA reported that the source of all the probes being seen around the world could be a mothership that we can't see yet. Could the Philadelphia Experiment have anything to do with this??

In his first lecture (see references) Al Bielek talks about the earth having biorhythms which cycle every 20 years. At the peak of this cycle, using magnetic fields it is possible to experience inter-dimensional travel. Remember, the USS Eldridge disappeared and reappeared and the navy called it a success. So, this had to happen on August 12, 1943. So, nothing reportedly happened 20 years later August 12, 1963. But on August 12, 1983, there is the Phoenix Project and the Montauk Briefings. All supposedly connected in time with the Philadelphia Experiment. I haven't found anything about the next time the biorhythms peaked on August 12, 2003. Things may be classified. That then brings us to the next possible date, August 12, 2023. Yep, last year. If you remember in the news last spring/summer the CIA had mentioned the possibility of a Mother Ship being responsible for the UFO/UAP activity. Could it be possible there is a connection between these events and the CIA mothership. Sounds far-fetched, but when you're investigating a conspiracy theory like Project Blue Beam, you just don't know.

One final observation. When the USS Eldridge vanished, witnesses reported a green fog around the ship and compasses going haywire (magnetic fields). In his book, "Without a Trace" Charles Berlitz discussed the similarities between that event and the reported events in the Bermuda Triangle. Hmmm.

Wernher Von Braun (aka father of atomic energy)

Wernher Von Braun was a German scientist during WWII and was responsible for developing the V-2 rocket used by the Germans. Von Braun and his staff, along with a lot of other German scientist and engineers were snuck out of Germany during and after WWII under Project Paperclip. They were given asylum and jobs here in the US.

What does Wernher Von Braun have to do with Project Blue Beam?

In 1949 he wrote a book called "Marsprojekt". I would suggest getting the English translation, "Project Mars: A Technical Tale". Although a Sci-Fi book has some interesting parts. Primarily there is a war on earth that results in "The United States of Earth" 10 men (regions) lead by 1 supreme leader referred to as "Elon". Interesting.

In 1972 Von Braun retired from NASA (Hmmm, didn't we mention NASA in the beginning) to work as VP for Fairchild Industries, a major aerospace company. Von Braun died in 1977 but during his time with Fairchild Industries he hired Carol Rosin who became his protégé. Rosin was the first woman aerospace executive in the US.

In his discussions with Rosin, Von Braun was always emphasizing the need to prevent the weaponization of outer space. He told her of the strategy that will be used to educate the public and decision makers in the need to fund weapons used in outer space. Here are the 5 strategic (fear tactics) used. Remember, he was discussing this in the mid 1970's.

- 1) The Russians. We were told that they developed 'killer satellites.'
- 2) Terrorists would be identified and needed to be tracked.
- 3) Identify third world nations and refer to them as "Nations of Concern".
- 4) The next enemy (fear) would be asteroids. For the last couple of years, it seems we have a new asteroid in the news every couple of months.
- 5) The final scare will be an alien invasion. Von Braun referred to this as the Alien Card. He said, "We are going to build weapons against aliens and it's all going to be a lie."

To this day Carol Rosin still speaks out against the weaponization of space. She has spoken to multiple politicians and scientists all over the world. A couple things Rosin has mentioned is that with all the people she has met from Russia, she can verify that Russia never had 'killer satellites.' She also mentions that nowhere in her journey has, she ever come close to finding out who is making the call on weaponizing outer space.

One final comment from Wernher Von Braun. He mentioned to multiple people including Carol Rosin that in the development of atomic energy, "we could never had done this if it wasn't for the help we got." Von Braun would never expand on where that help came from.

Holograms and Project Blue Beam

This section will give a quick history on holograms and possibly the date at which Project Blue Beam started.

The hologram was invented in 1948 by Dennis Gabor. Although the technology used originally is different than now, the theory was proven successful. What's interesting is Gabor won the Nobel Prize in 1971, 23 years after he invented the hologram. Could this have anything to do with the start of Project Blue Beam? Following are the dates of each government investigation into UFOs and the development of the hologram.

1947 – Project Saucer, later that year was changed to Project Sign.

1948 – Gabor invented the hologram.

1949 – Project Sign becomes Project Grudge.

1952 – Project Grudge becomes Project Blue Book.

1969 – Project Blue Book is terminated.

1970 – Project Blue Beam???????

1971 - Gabor wins Nobel Prize.

I have not found any information that indicates the start of Project Blue Beam. Could that be because the military/government denies its existence? Or did they just forget to tell us? Hmmm.

On January 31, 1996, CNN reported that the secretary of the Air Force had announced the development of a “next generation” of military defense weapons which included the projection of holographic images into the sky to terrify or disorient the enemy.

A Side Note: During this research I found it interesting that most of the written literature (books) discussing Project Blue Beam, Philadelphia Experiment, HAARP and more, were all published before 1998. Not sure why. Maybe I missed some stuff or maybe with the internet starting in the 1990's it helped the government in censoring. Hmmm.

Could HAARP be the Ultimate Weapon for Project Blue Beam?

There are several things that come into play when talking about HAARP. We'll see a connection with Tesla, Dr. Eastlund, Mind Control and Weather Control. There will be multiple examples which may not fully explain certain events but will give the reader an understanding of the topic. Further investigation into the technology of HAARP is left up to the reader. I would suggest reading Jerry E. Smith's book "HAARP: The Ultimate Weapon of the Conspiracy." He covers Patten Numbers, Military documentation and frequency ranges.

So, what is HAARP? HAARP stands for High-Frequency Active Auroral Research Project.

Located in the Gakona region in Alaska. One of HAARP's distinctions is that it is the world's most powerful shortwave radio transmitter – only it is not broadcasting for human ears. Its signal will be sent to the top of our atmosphere where it is intended to heat a portion of the atmosphere, much like a microwave. The transmitter is called an ionospheric heater. It is a little-known, yet critically important US military defense project which generated quite a bit of controversy over its alleged weather control capabilities and much more. Though denied by HAARP project officials, some respected researchers allege that the electromagnetic warfare capabilities of the project were designed to forward the US military's stated goal of achieving "Full Spectrum Dominance" by 2020 and of "Owning the Weather in 2025". In 2013 the military turned HAARP over to the University of Alaska. But as recently as **November 2023** has conducted tests.

Could there be a connection between Tesla and HAARP? After his death in Jan. 1943, Tesla's work was stored in 80 trunks and confiscated by the US Government. Tesla's nephew was the only one mentioned in his will. After an investigation his nephew received 60 trunks. No one knows what happened to the other 20 trunks. The lead investigator in researching Tesla's work was John Trump, President Trumps uncle. Interesting.

Prior to his death, Tesla was to reveal a 'Death Ray', but died before ever sharing this technology. Did he have a Death Ray and if so, what happened to it. There is some circumstantial evidence that Tesla may have tested this weapon. In 1908 in Tunguska, Siberia 500,000 acres of forest was flattened (estimated 10-15 mega tons of TNT). It was concluded that a meteor hit Siberia, but no crater was found. At the same time Commadore Perry was exploring the North Pole and Tesla was desperate for money. Could Testa have tried to demonstrate his death ray so the world could see it but missed his target? There are some of his notes that indicate this. Following is a portion of a letter he sent to JP Morgan:

"The flying machine has completely demoralized the world so much so that in some cities, London and Paris, people are in mortal fear from ariel bombing. The new means I have perfected affords absolute protection against this and other forms of attack... These new

discoveries I have carried out experimentally on a limited scale, created a profound impression.” Could the Tunguska event have been Tesla’s experiment?

Dr. Bernard Eastlund is the one scientist who is most associated with the development of HAARP. A 1987 patent (#4,686,605) issued to Dr. Eastlund is titled “Method and apparatus for altering a region in the earth’s atmosphere, ionosphere and/or magnetosphere.” When asked about this patent, Eastlund would respond, “Tesla would be proud.” Interesting. More than likely, we’ll never know if there is a connection between Tesla and HAARP.

However, in the patent Eastlund makes several statements which clearly contradict the claim that HAARP is only used for research and not for military purposes or weather control.

Here are a few of his statements:

“The temperature of the ionosphere has been raised by several hundred degrees in these experiments.”

“A means and method are provided to cause interference with or even total disruption of communication over a very large portion of the earth. It is possible to take advantage of one or more of such beams to carry out a communications network even though the rest of the world’s communication is disrupted.”

“The invention has a phenomenal variety of potential future developments such as lifting the atmosphere to an unexpectedly high altitude so that missiles encounter unexpected drag forces with resultant destruction or deflection. Weather modification is possible by, for example, altering upper atmosphere wind patterns or altering solar absorption patterns by constructing one or more plumes of atmospheric particles which will act like a lens or focusing devices.”

Not only did Eastlund contradict the military’s response to HAARP, in January 1999 the European Union called the project a global concern. The EU document brings HAARP and similar electromagnetic weapons (Russia’s version, called the woodpecker) into question. The actual wording from one of the bullet points states that the EU “considers HAARP by virtue of its far fetching impact on the environment to be a global concern and calls for its legal, ecological and ethical implications to be examined by an international independent body before any further research and testing.” This document further states that the EU regrets the repeated refusal of the US Government to give any evidence on the project.

There are many more examples in the reference material that challenges the military’s response that HAARP is used for scientific research.

Let’s now look at HAARP and weather control or the more technical term “Environmental Modification.”

Environmental modification (ENMOD) is a term used to describe human intervention intentional or unintentional, in the atmosphere process and events that produce the world's weather. Deliberate scientific modification of the environment has happened since 1946 with cloud seeding. By the 1950's ENMOD was science fiction stories. By the 1970's ENMOD had become part of national and international law. One such event was the United Nations ENMOD convention where it prohibited any use of techniques that would have long lasting effects through deliberate manipulation of things like earthquakes, tidal waves, changes in climate and weather patterns. Since then, there have been countless articles, books and laws passed on weather modification. Can you imagine where the technology is today? Makes you wonder if this isn't why the local meteorologist with all his state-of-the-art equipment can't make more accurate predictions. I think we can safely say that weather modification does happen. To what extent we don't know.

ENMOD also includes the possibility of creating man-made earthquakes. Understanding how HAARP uses electromagnetic waves, could this be possible? Let's look at another experiment conducted by Tesla. The short (non-technical) is that Tesla nearly flattened New York city with an artificially created earthquake. He developed a device in his lab to demonstrate the principle of harmonic resonance. A short time after turning it on the building began to shake, he noticed other buildings shaking and glass breaking. He had to use a sledgehammer to stop his machine. After it was shut down there were thousands of broken windows and many thousand angry and frightened citizens. Something to think about, what would happen if you combined the Tunguska event and Tesla's harmonic resonance test into one weapon. Could HAARP do this?

An article in 1978 by Andrija Puharich addressed "Global Magnetic Warfare" and was

addressing the number of earthquakes that happened in 1976 and 1977. In particular was one in Tangshan, China that killed 650,00 people. A year after the earthquake, the NY Time reported the following: "Just before the first tremor at 3:42 am, the sky lit up 'like daylight. The multi-hued lights, mainly white and red, were seen up to 200 miles away. Leaves on many trees were burned up to a crisp and growing vegetables were scorched on one side, as if by a fireball." There are other stories of the sky lighting up right before an earthquake.

The Washington Times reported on March 29, 1992, on the incidence of ELF signals being associated with earthquakes, thusly: "Satellites and ground sensors detected mysterious radio waves or related electrical magnetic activity before major earthquakes in Southern California during 1986-87, Armenia in 1988 and Japan and Northern California in 1989."

Another interesting earthquake event was earlier this year (2023) in Turkey. The day before a devastating earthquake hit Turkey, 8 countries removed their diplomats from Turkey. Hmmm.

There are many books/articles on bizarre happenings before earthquakes, tsunamis and other weather systems. It will be up to the reader to pursue those findings.

Now we move on to the topic I find to be the most concerning and that is mind control. As with ENMOD, mind control has been around for decades, maybe longer, starting with hypnosis. Radio-Hypnotic Intracerebral Control (RHIC) was developed in the 1930's and uses radio transmission and hypnosis to control a subject. Another project, MKUltra is well known and documented. Here we will start with electromagnetism to control human behavior.

One of three principal scientists in mind control is Dr. Jose Delgado. Dr. Delgado was a Spanish professor of neurophysiology at Yale University, famed for his research on mind control through electric stimulation of the brain. Here are a couple quotes from Dr. Delgado:

“The individual is defenseless against direct manipulation of the brain because he is deprived of the most intimate mechanisms of biological reactivity.”

Another more in-depth quote by Dr. Delgado on his beliefs:

“We need a program of psychosurgery for political control of our society. The purpose is physical control of the mind. Everyone who deviates from the given norm can be surgically mutilated. The individual may think that the most important reality is his own existence, but this is only his personal point of view. This lacks historical perspective. Man does not have the right to develop his own mind. This kind of liberal orientation has great appeal. We must electrically control the brain. Someday armies and generals will be controlled by electric stimulation of the brain.”

His research was financed by grants from the Office of Naval Research (which participated in MKUltra and directed HAARP). Interesting.

In the 1980's Dr. Michael Persinger developed a brain research tool referred to as the Persinger Helmet. He discovered that when specific frequencies are directed into the hippocampus area of the back brain a large percentage of subjects reported UFO abduction experiences, out of body experiences, including Union with God. The helmet experience, Dr. Persinger says, “involves a widening of emotional meaning, such that things not typically considered meaningful” and hallucinations are “perceived as extremely real.”

Could it be that HAARP could put a Persinger Helmet on each of us? One application that comes to mind is a fake “Rapture.” This is one of the steps of Project Blue Beam.

In 1994 Advanced Neurotechnologies announced the development of a device named Brainlink. Brainlink connects human brainwaves with a computer interface (that was 30 years ago). The device amplifies 0.5Hz to 40Hz brainwaves and converts it to digital form.

Researchers have charted the brain's electromagnetic output for years. There are 4 generalized frequencies, Beta (13-30Hz), Alpha (8-13Hz), Theta (4-7Hz) and Delta 0.5-4Hz).

I won't be going into specifics on brainwaves and emotions, this can be found in the reference data. However, I will assure you that every emotion has been charted and exposing one's brain to a change of frequency can significantly affect the individual. I bet you couldn't guess that HAARP has conducted experiments in this frequency range. HAARP's ability to transmit in the ELF range may make it the ultimate mind control instrument.

Klaus Schwab (WEF) has been quoted to say, "You will own nothing and be happy." Could HAARP be the mind control device that keeps everyone happy during such times? Hmmm.

On the website for INBRAIN Neuroelectronics they talk about bringing together deep tech, med tech and digital technologies. Per their website "INBRAIN harnesses the extraordinary material properties of Graphene, the worlds thinnest and Nobel prize winning material, to build safe and non-invasive and highly efficient neural solutions." Some are great scientific inventions, and some are very nefarious.

This brings up a rather sensitive topic for some people. I will keep this brief and leave it to the reader to do their own investigation. INBRAIN mentions the Nobel winning material called graphene. This is the same graphene that was hidden in the Covid Vaccine. INBRAIN has recently secured \$17 million in funding for the first AI powered graphene brain interface. Their website and NaturalNews.com are full of articles that discuss developing the best human to machine interfaces.

One of the ways to use electromagnetic frequencies is to direct it to a specific target.

However, in some cases this target must have a receiving antenna. Could graphene be the receiving antenna for some nefarious plot? Hmmm. If you dig deep enough, you'll find cases of people experiencing strange magnetic characteristics after receiving the Covid vaccine. There are articles on NaturalNews.com on detoxing from graphene for those who are interested.

So, could HAARP be the ultimate weapon used to control (or eliminate) the masses? Could it be the weapon of choice for Project Blue Beam? I don't know. If it is, just imagine HAARP connected to Artificial Intelligence. Scary.

John DeSouza and AI Generated Video

Ex-FBI agent John DeSouza was recently interviewed and went into detail on Project Blue Beam and some of the current UFO/UAP phenomenon. A little bit about John DeSouza. In his time with the FBI, he specialized in paranormal cases. He talks about FBI agents keeping a “off the records book” for detailing cases that are to be kept secret. His book somehow went missing and shortly afterwards the X-Files were filmed. There was a court case that almost stopped the production of the X-Files. A lot of the X-Files shows came from this book. I remember reading about this when X-Files came out. In a podcast (see references) he described one of his cases and I know which episode he was talking about. He also had some interesting information concerning Project Blue Beam. He mentioned that all FBI declassified documents can be found at Vault.FBI.gov. Click on the extraordinary investigations. This will allow you to view all the declassified paranormal, UFO etc. cases.

John had some interesting info on aliens, UFO/UAP and how Project Blue Beam would be rolled out.

First on the aliens. Aliens aren't little beings from another world but are of the supernatural realm. Because of interdimensional travel, they can only be here for a short period. Interesting since most sightings only last for a brief period (Remember the USS Eldridge disappeared and reappeared after a short time). Coincidence? President Eisenhower signed an agreement with aliens that they would give us technology and we would let them abduct humans without any investigation. Earlier in this report it was mentioned how Tesla and Roosevelt met with aliens. Interesting.

John had what I believe is some of the best explanation of UFO/UAP. He stated that UFOs are exactly that, an unidentified flying object that can't be caught and most likely never will be. The belief is that their craft is made from some type of plasma. Now UAP's are different, they are actually man-made. These are advanced craft being used to set the stage for Project Blue Beam. I think this really explains why some UFO/UAP sightings are seen on radar, and some aren't. A manmade craft is going to be picked up on radar and the UFO will still be invisible to radar. I'll throw another possibility into the mix of which John mentions later when talking about Blue Beam. That is, how many of the sightings are holograms. Hmmm. Have you ever shined a laser on the wall and watched a cat chase it? Just think, there may be some Luciferian dude sitting in a control room with a joystick laughing at all the humans watching his show. But this scenario would explain why they can travel at such fast speeds making impossible maneuver. Interesting.

So, Project Blue Beam is going to be some holograms of Jesus, Satan, UFOs etc. That doesn't sound too bad, does it? Here is John's take on how this will roll out. Take for example, you have 10 special forces troops, fully armed, standing in a field. They could obviously do some

damage. Now take the same 10 troops and project 1000 more troops (holograms) behind them. The 1000 holograms can't hurt you, but once the 10 special forces start to attack, fear will overcome you and you'll believe you are facing an invasion. Now let's look at this from the UAP (fake alien invasion) perspective. We'll assume they will use the tic-tac version of UAP. John says these tic-tac's carry a significant amount of destructive force. So, they will position some over select cities in the world, release their arsenal on these cities and then project holograms all over the world. Could you imagine the chaos. This would make the original broadcast of War of the Worlds look like a Walt Disney matinee.

A comment on the destructive force of the tic-tac. From what we've learned about HAARP, could this be the destructive force and was made to look like the tic-tac caused it? Hmm. John DeSouza mentioned that the controlling power of the UAPs is a union of militaries with global governance. Now that shouldn't surprise anyone.

Now for something that is just as interesting as John DeSouza's discussion on Project Blue Beam. There is a 10-minute AI generated video called The Last Stand that is about an alien invasion and how we respond. This is eerily like Project Blue Beam. The way I understand AI, is that AI can only create something based on the data it has been given. Who installed this data and why? The video can be found on YOU Tube by Hashem AL-Ghaili.

[Last Stand | Sci-Fi Short Film Made with Artificial Intelligence - Bing video](#)

How Could the 4 Steps of Project Blue Beam Unfold

Step 1) “Man made earthquakes (HAARP) strategically placed to unearth new archeological findings that will change the doctrines of every major religion.”

This sure does sound like a lot of earthquakes. But it could be done with only 2 or 3 major quakes. The top five religions cover 93.3% of the world's population.

Top 5 religions:	1) Christianity	31.0%
	2) Islam	24.9%
	3) Irreligious	15.6%
	4) Hinduism	15.2%
	5) Buddhism	6.6%

Each religion (except for the irreligious) has a key city/area that would be targeted. Let's look at Hinduism and Buddhism first. Hindu has 7 cities that are important, but Varanasi, India is the one that a Hindu should visit before dying. The key city for Buddhist is Lumbini, Nepal. These two cities are 166 miles apart. So, could one major earthquake be enough to reveal the archeologist findings? Islam has Mecca and Christians have Jerusalem. These cities are 770 miles apart so 2 earthquakes would be needed, unless they use Jerusalem as the site for findings of both religions.

Step 2) “A gigantic space show that will show with three dimensional optical holographic images and sounds to different parts of the world, each receiving images according to their region/national religious faith. The new god's image will be talking in all languages. This will be the introduction to the One World Religion.”

The holograms could be either satellite based, ground based or both. Each of the religion's main being (Jesus, Allah, Brahma and Buddha) will appear in the sky and then turn into the antichrist, stating that all religious doctrine has been the reason for all the wars. That a unified one world religion is the only way to survive. As Dr. Persinger mentioned, “the right frequency applied to the brain can make a hallucination appear real.”

Step 3) “Telepathic two-way communications where extremely low frequency (ELF), very low frequency (VLF) and low frequency (LF) waves will reach the people of earth making each one believe that his own god is talking to them from their own soul.”

HAARP has done testing in the ELF, VLF and LF. So, could this be where the frequencies and messages are generated. And more than likely, there will be more than 1 HAARP at the time Blue Beam is initiated.

Step 4) This step contains 3 different parts:

1) "To make mankind believe there is an alien invasion which will push nations to use nuclear weapons to strike back. This will lead to total nuclear disarmament."

John DeSouza indicated that some of the UAP's are actually man-made and carry a lot of destructive power. This in combination with holograms could simulate a full-blown alien invasion. UAP's attacking select cities, could initiate the use of nuclear arsenals. Remember, Wernher Von Braun warned of a fake alien invasion in the mid-1970's.

2) "Make Christians believe that a rapture has happened with supposedly divine intervention of an alleged good alien force coming to save mankind from a satanic attack."

When and how could a fake rapture happen? When you look at something as evil as Project Blue Beam, it's obviously part of Satan's evil web to destroy mankind. So, for this to succeed it only makes sense that this must happen before God's rapture. So how could this be pulled off with what we know from Blue Beam? People disappear every year in places like National Parks and the Bermuda Triangle. Where they end up is anyone's guess. So, right after a fake alien invasion where cities are destroyed, people have died, you now have people suddenly disappear on a level never seen before. Holographic imagery is used to show people being elevated off the planet and of course the media helps to move the narrative. I can only imagine the chaos and fear in people at this point.

3) "This is a mixture of electronic and supernatural forces."

At this point the world will be a mess. AI (electronic forces) will no doubt be utilized here in some way. Unless you ditch all electronic devices (phone, TV, car, house) you will be dealt with in some way. The supernatural forces will be Satan and all his minions. This will bring another level of fear. The spirit world will be alive and well at this point and I don't think calling the Ghostbusters will help.

One thing about Project Blue Beam is it's sequential. So, we'll have a little bit of a warning once Step 1 happens.

The Destination for Those Who Do Not Comply

In his book on Project Blue Beam, Serge Monast described what will happen after Blue Beam. The following is a brief description of events for those who will fight against the New World Order.

For those that will not accept the New World Order there is a plan for concentration camps and for those camps they made what is known to be the rainbow classification for the New World Order prisoner. It is unknown what each color is to represent.

Classification 1. This will be for Christian children. They will be used as human sacrifice and/or sex slaves.

Classification 2. This is the classification of prisoners to be used in medical experiments where drugs and new technologies will be tested on humans. Seems we talked about this earlier.

Classification 3. This is for healthy prisoners for the international organ center, where vital organs will be removed one by one while maintained alive on a special life support system.

Classification 4. This is for healthy prisoners to be used in slave labor camps.

Classification 5. This is the international re-education center. Prisoners will be re-educated with the chance to repent on worldwide TV.

Classification 6. This will be the international execution center.

Classification 7. Serge Monast didn't have any specific details on this classification.

What About the Animals (Humans Included)

In his book on Project Blue Beam, Serge Monast discussed using chips to track all animals. Using technology from the 1990's I just can't see how that would be possible. So, I kind of dismissed this as being unrealistic. Until recently. I started studying the technology used in what is referred to as 'Smart Dust'.

Smart Dust devices are small wireless microelectromechanical sensors (MEMS) that can detect everything from light to vibrations. It is a tiny dust size device with extraordinary capabilities. It encompasses a nano-structured silicon sensor that can spontaneously assemble, orient sense, and report on their local environment (yes, inside your body is an environment). This new technology combines sensing, computing, wireless communication capabilities, and autonomous power supply within the volume of only a few millimeters. It is very hard to detect the presence of Smart Dust and it is even harder to get rid of them once deployed. Smart Dust is useful in monitoring real-world phenomena without disturbing the original process. Using chip technology is the Cadillac version of surveillance, but smart dust is more of the Chevy. Not fancy, just massed produced. And it will give the Luciferians your GPS. It can be distributed in several ways, aerosols and chemtrails would be my guess.

If you thought you could run off into the mountains when things get bad, think again. You shoot a deer that has smart dust, they know it died and if they see the nearest person doesn't have a license then time is up.

Conclusion

Is there really a Project Blue Beam? Will it be coming to a city near you? There isn't any way to conclude that Project Blue Beam exists or doesn't exist. Let me present what I feel is the best-case argument for both scenarios.

The argument that Project Blue Beam doesn't exist: The only evidence I have found that discredits Project Blue Beam is the military/US Government telling us that it doesn't exist, and HAARP is only used for scientific research.

The argument that Project Blue Beam does exist: The only way we'll know if Project Blue Beam exists is if/when it happens. It's a sequential event so we'll at least have somewhat of a warning (Step 1). But you must wonder, when you have multiple scientists, doctors, ex-military, ex-FBI and government officials testify that it does exist. You just have to say Hmmm.

As I mentioned in the beginning, this is only a rough outline describing the possibility of Project Blue Beam. Each section could easily be expanded into a full chapter. But I'll leave it to the reader to decide if they want to pursue a deeper investigation. The reference material has a ton of additional information and additional references. However, the deeper you dig, the darker it will get.

Final food for thought: Have you ever noticed how so many Hollywood Sci-fi movies seem to foretell the future. If there is any merit to that, then suddenly, those people wearing tin foil hats aren't so funny.

HAARP Patents

The following is a partial list of patents that are associated with HAARP. I do not discuss the science involved with each patent or the people involved, but only give a brief description of how these patents could be used.

US patent# 4,686,605

Issued: August 11, 1987

Inventor: Bernard J. Eastlund

Titled: "Method and Apparatus for Altering a Region in the Earth's Atmosphere, Ionosphere and/or Magnetosphere."

Quotes from the patent: "This can cause confusion of or interfere with, or even complete disruption of the guidance systems employed by the most sophisticated of airplanes and missiles. The ability to employ or transmit over very wide areas of the earth a plurality of electromagnetic waves and varying frequencies and to change at will in a random manner, provides a unique ability to interfere with all modes of communication, land, sea and/or air at the same time."

"Further, by knowing the frequencies of various electromagnetic beams employed in the practice of this invention it is possible not only to interfere with third party communications but to take advantage of one or more such beams to carry out a communication network even though the rest on the world's communications are disrupted." (Makes you wonder if this isn't why certain Senators have Satellite phones).

"As alluded to earlier, missile or aircraft destruction, deflection or confusion could result, particularly when relativistic particles are employed."

US Patent# 5,038,664

Issued: August 13, 1991

Invented by: Bernard J. Eastland

Title: "Method for Producing a Shell of Relativistic Particles at an Altitude above the Earth's Surface."

I don't have any quotes from the patent itself but here is what Bernard Eastlund had to say about this invention. "This invention will create a literal shell of particles which would drift around the planet, destroying electrical components of objects passing through the shell. The shell so formed may be used as an antimissile shield. The high energy relativistic particles in the shell will collide with any missile passing therethrough to give up energy which in turn will damage or destroy the missile." (One of Tesla's inventions was to make peace. Whoever controls this could stop all missile attacks, to bad it's probably the Luciferians who control it).

US Patent# 5,068,669
Issued: November 26, 1991
Invented by: Peter Koert and James T. Cha
Title: Power Beaming System

And

US Patent# 5,218,374
Issued: June 8, 1993
Invented by: Peter Koert and James T. Cha
Title: Power Beaming System with Printed Circuit Radiating Elements having Resonating Cavities.”

Both patents relate to the transfer of energy by means of electromagnetic waves to power a remote device. Here is some of the information from these patents.

“More specifically, the present invention relates to a system for ‘power beaming’ energy from a source at high frequencies and rectifying such energies to provide a source DC energy to a remote device.”

In the early 1990’s ARCO Power Technologies Incorporated conducted a test at Tyendinga Airport near Kingston Ontario Canada using a microwaved powered aircraft. It was reported that this aircraft was able to stay in flight for over 10,000 hours at 80,000 feet. Prior to this there was a project at the University of Alaska at Fairbanks called SABER (Semi-Autonomous Beam Rider). The project was to beam radio-frequency waves to a helicopter in order to suspend it in air without any on-board fuel supply,

Recently I saw a demonstration of a laser being used to propel an object upward. I wonder if this technology is being used in any of the UAP’s?

US Patent# 4,954,709
Issued: September 4, 1990
Invented by: Arie Zigler, Yossef Elsen from Rishon Le Zion Israel
Titled: “High Resolution Directional Gamma Ray Detector.”

And

US Patent# 4,817,495
Issued: April 4, 1989
Invented by: Adam T. Drobot
Title: “Defense System for Discriminating Between Objects In Space.”

These 2 patents go together in the sense that they can detect payload on a missile while in flight to differentiate between a decoy and a threat.

Quote from the patent: “A defense system and a method for discriminating between armed reentry vehicles and unarmed objects which are in proximity of each other. The reentry vehicles and the unarmed objects are bathed in a cloud of relativistic electrons with the resulting signatures from heavy objects, i.e., reentry vehicles, being imaged directly. Detectors sense the location and identity of the reentry vehicles and pass this information onto a weapon platform for tracking and interception.”

The importance of this invention to the military: “Presently, the expected scenario for any large scale intercontinental ballistic missile attack includes the deployment of a large number of decoys and penetration aids in a ‘threat cloud’ around one or more-armed reentry vehicles in an attempt to confuse any defense systems set up to counteract the armed missiles. Since the total number of objects expected in a typical threat cloud may well exceed one hundred thousand, any truly effective defense system must include a system which is capable of ‘interrogating’ all the objects in the threat cloud and quickly discriminating between the deadly reentry vehicles and the harmless decoys and penetration aids.

“While the present invention has been described for discriminating between armed and unarmed vehicles in a threat cloud during an impending attack, it can also be employed to ‘interrogate’ orbiting satellites to determine if any said satellites may be carrying nuclear weapons for future launch.

Patent is from 1990. Can you imagine a defense system like this using Artificial Intelligence.

US Patent# 4,873,928

Issued: October 17, 1989

Invented by: Frank E. Lowther

Title: “Nuclear-Sized Explosions without Radiation.”

In this patent there is only a history of why it was developed but no known examples.

However, it is possible that technology for HAARP was developed by Tesla, and Tesla may have been responsible for 500,000 acres of forests being flattened in Siberia (without radiation).

TimeLine

The following timeline is just a bullet point of events that may be part of Project Blue Beam. This doesn't include all events but just what I thought were some interesting highlights.

1933 – Roosevelt asks Tesla to join a project that turns out to be Project Invisibility. Einstein and Von Neumann also joined. The original location was the University of Chicago.

1942 – There was an original test on Project Invisibility which was successful but did not include humans. No significant records of this. Tesla expresses concern on the magnetic fields and humans. He resigned his position before the Philadelphia Experiment and John Von Neumann was put in charge.

1943 – Tesla dies (Jan.). There have been rumors of foul play, but no evidence.

1943 – Tesla works were stored in 80 trunks. Confiscated by the US Government. Lead investigator in reviewing Tesla's work was John Trump (Pres Trumps uncle, Hmmm).

1947 – Roswell crash. Project Saucer launches and is changed to Project Sign.

1948 – Dennis Gabor invents the first hologram.

1949 – Project Sign changes to Project Grudge.

1952 – Project Grudge changes to Project Blue Book.

1953 – Classified CIA documents, now declassified details how UFOs could be used for psychological warfare.

1969 – Project Blue Book is terminated. Did Project Blue Beam start at this time???

1971 – Dennis Gabor receives Nobel Prize for Holograms.

1977 – Wernher Von Braun spends the last few years of his life explaining to Carol Rosin that the 'alien card' will be played by the government and that it's all a big lie.

1987 – President Reagan addresses the UN and talks about how an alien threat could bring all the countries of the world together.

1991 – Bush SR gives a speech regarding nations being drawn together with the ultimate objective to form a New World Order.

1991 – Ex Military Serviceman William B. Cooper writes a book called, "Behold A Pale Horse" which has a section which reads, "Can you imagine what will happen if LA is hit with a 9.0 earthquake, NY City is destroyed by a terrorist-planted nuclear bomb, WWII breaks out in the Middle East, the banks and stock markets collapse, extra-terrestrials land on the White House

lawn, food disappears from the markets, some people disappear, and the New Messiah presents himself to the world.”

1991 – Janet Morris who has worked as a consultant for the Defense Dept., CIA and NSA writes some papers detailing non-lethal weapons. Later in life she describes these non-lethal weapons as holograms.

1994 – Canadian journalist Serge Monast releases “Project Blue Beam” which explains the theory that ends in a fake alien invasion which will usher in the New World Order.

1996 – Canadian police arrest Serge Monast for home schooling his kids. Released the next day and dies of a heart attack.

2001 – William B. Cooper (Behold a Pale Horse) dies in a shootout with Apache County sheriffs.

2004 – Janet Morris (see 1991) appears on British TV describing in detail how holograms can be used to project Jesus, Satan and UFOs into the sky. This is also the last year of any recorded work with a government agency.

2009 – Carol Rosin gives speech at UFO disclosure project explaining her conversation with Wernher Von Braun. Carol talks about the ‘alien card.’

2000-2022 – Mainstream media starts to report on multiple UFO sightings. Government admits the existence of UFOs. UFOS are renamed UAPs. Netflix does a documentary on UFOs. Harvard scientist Robert Duncan talks about Project Blue Beam on the Koncrete Podcast which has since been removed by YOU Tube.

2023 – Ex-FBI agent John DeSouza speaks out on Project Blue Beam.

2023 – August 12, CIA mothership????

Project Blue Beam

- Science Fiction
- or
- Future Reality

1

Project Blue Beam

- There are government secrets and there are government conspiracies. Let's not be naïve, all governments have secrets. Information that should not be made public due to national security issues. But what if the secret is covering up a plot of a nefarious nature? Could Project Blue Beam be one of these plots?
- The goal of this information isn't to convince anyone that Project Blue Beam exists and is about to be initiated, but to provide a brief description of what has been written about in the past, provide some reference material and let the reader draw their own conclusion.

2

What is Project Blue Beam?

Project Blue Beam was brought into light in the 1990's by a Canadian investigative journalist named Serge Monast.

- Serge Monast published his book on Project Blue Beam after being warned not to. It was never reported where he got the warning from. A couple years later Serge was taken into custody for home schooling his children. Released the next day he mysteriously died of a heart attack.
- Serge reported that Project Blue Beam is a joint venture by the US Government through NASA with the help of the UN.
- We'll start our investigation in the 1940's.
-

3

The Philadelphia Experiment

- The Philadelphia Experiment was a Naval trial at making a ship disappear. Also known as "Project Invisibility".
- August 12, 1943 the USS Eldridge disappeared and minutes later reappeared. Witnesses reported seeing green fog around the USS Eldridge before it vanished. (Hmmm. Sounds kind of like the Bermuda Triangle).

4

The Philadelphia Experiment

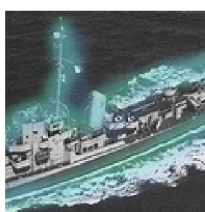

- Al Bielek talks about the earth having biorhythms which cycle every 20 years. At the peak of this cycle, using magnetic fields it is possible to experience inter-dimensional travel. Remember, the USS Eldridge disappeared and reappeared and the navy called it a success. So, this had to happen on August 12, 1943. So, nothing reportedly happened 20 years later August 12, 1963. But on August 12, 1983, there is the Phoenix Project and the Montauk Briefings. All supposedly connected in time with the Philadelphia Experiment. I haven't found anything about the next time the biorhythms peaked on August 12, 2003. Things may be classified. That then brings us to the next possible date, August 12, 2023. Yep, last year. If you remember in the news last spring/summer the CIA had mentioned the possibility of a Mother Ship being responsible for the UFO/UAP activity. Could it be possible there is a connection between these events and the CIA mothership? Sounds far-fetched, but when you're investigating a conspiracy theory like Project Blue Beam, you just don't know.
- The biorhythms may come into play later in Project Blue Beam.

5

The Philadelphia Experiment

Interesting Talking Points

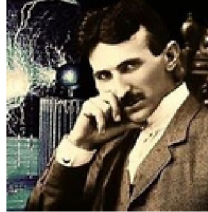

- Two people involved with this experiment were Albert Einstein and Nikola Tesla (more on Tesla later).
- The USS Eldridge was launched on July 25, 1943 and commissioned on August 27, 1943 (remember the experiment took place on August 12, 1943).
- The USS Eldridge was sold to Greece in January 1951. The deck log (kind of like a Carfax) started January 1, 1944. What about 1943?

6

Nikola Tesla

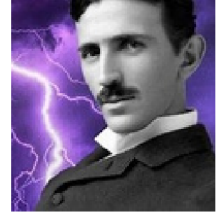

- Died in Jan. 1943 not too long after resigning from the Philadelphia Experiment.
- Tesla had 80 trunks of data confiscated by the government, after his death and 20 are still missing.
- Prior to his death he was about to unveil what he called a "Death Ray".
- The question remains, "What happened to the 20 trunks?"
- Lead investigator on the Tesla information was John Trump, the uncle of President Trump.

7

Nikola Tesla - Connections with HAARP?

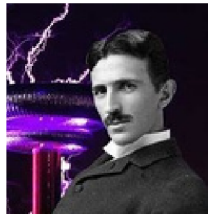

- Tunguska, Siberia (1908) – 500,000 acres flattened. Conclusion was a meteor, but no crater was found.
- Following is from a letter to JP Morgan, from Tesla. "The flying machines have completely demoralized the world so much that in some cities, London and Paris people are in mortal fear from arial bombing. The new means I have perfected affords absolute protection against this and other forms of attack... These new discoveries I have carried out experimentally on a limited scale, created a profound impression."
- Could Tesla have caused the Tunguska event?

8

NIKOLA TESLA - Connections to HAARP?

- Another Tesla experiment nearly flattened New York City with an artificial earthquake. Tesla developed a device in his lab to demonstrate the principal of harmonic resonance. A short time after he turned it on, windows and the building began to shake, as well as the surrounding buildings. Tesla had to use a sledge hammed to stop his device. There was a lot of frightened and upset people.

9

Wernher Von Braun

- Wernher Von Braun was a German scientist during WWII and was responsible for developing the V-2 rocket used by the Germans. Von Braun and his staff was brought to the US after WWII under the Project Paperclip.
- In 1949 he wrote a book called "Marsprojekt". I would suggest getting the English translation, "Project Mars: A Technical Tale". Although a Sci-Fi book it has some interesting parts. Primarily there is a war on earth that results in "The United States of Earth" 10 men (regions) lead by 1 supreme leader referred to as "Elon". Interesting.
- In 1972 Von Braun retired from NASA (Hmmm, didn't we mention NASA in the beginning) to work as VP for Fairchild Industries, a major aerospace company. He hired Carol Rosin and she became his main confidant.

10

Wernher Von Braun

- Two quotes from Wernher Von Braun:
- "We couldn't have created atomic energy if it wasn't for the help we got." Von Braun never revealed what he meant by this statement.
- "We are going to build weapons against aliens, and its all a lie." He often referred to a fake alien invasion as the "alien card."

11

Wernher Von Braun

- In his discussions with Rosin, Von Braun was always emphasizing the need to prevent the weaponization of outer space. He told her of the strategy that will be used to educate the public and decision makers in the need to fund weapons used in outer space. Here are the 5 strategic (fear tactics) used. Remember, he was discussing this in the mid 1970's.
- The Russians. We were told that they developed 'killer satellites.'
- Terrorists would be identified and needed to be tracked.
- Identify third world nations and refer to them as "Nations of Concern".
- The next enemy (fear) would be asteroids. For the last couple of years, it seems we have a new asteroid in the news every couple of months.
- The final scare will be an alien invasion. Von Braun referred to this as the Alien Card. He said: "We are going to build weapons against aliens and it's all going to be a lie."

12

Dr. Bernard Eastlund

- Dr. Bernard Eastlund authored the patents for HAARP.
- US Patent# 4,686,605 – “Method and Apparatus for Altering a Region in the Earth’s Atmosphere, Ionosphere and/or Magnetosphere.”
- US Patent# 5,038,664 – “Method for Producing a Shell of Relativistic Particles at an Altitude Above the Earth’s Surface.”
- A quote from Dr. Eastlund when asked about these patents, “Tesla would be proud.”
- Is this where some of Tesla’s missing file went?

13

Dr. Bernard Eastlund

- More quotes from Dr. Eastlund concerning HAARP.
 - “A means, and method are provided to cause interference with or even total disruption of communication over a very large portion of the earth. It is possible to take advantage of one or more of such beams to carry out a communications network even though the rest of the world’s communication is disrupted.”
 - “The invention has a phenomenal variety of potential future developments such as lifting the atmosphere to an unexpectedly high altitude so that missiles encounter unexpected drag forces with resultant destruction or deflection. Weather modification is possible by, for example, altering upper atmosphere wind patterns or altering solar absorption patterns by constructing one or more plumes of atmospheric particles which will act like a lens or focusing devices.”

14

HARRP – Patents

Where are they now?

- In 1985 the first of 3 patents by Dr. Eastlund was assigned to ARCO Power Technologies (APTI).
- In 1994 Military contractor E-Systems buys APTI.
- In 1995 Raytheon buys E-Systems and old APTI patents.

15

High-Frequency Active Auroral Research Project (HAARP)

- Located in the Gakona region in Alaska and started in the early 1990’s.
- USAF turned operation over to University of Alaska at Fairbanks in 2015.
- USAF has conducted experiments at HAARP as recent as November 2023.
- Could this be the ultimate weapon used in Project Blue Beam?

16

Conspiracy Theories of HAARP

- Can HAARP be used to control the weather?
- Environmental Modification (ENMOD) is a term used to describe human intervention, intentional or unintentional, in the atmosphere process and events that produce’s the world’s weather.
- By the 1970’s ENMOD had become part of national and international law.
- The United Nations ENMOD convention prohibited any use of techniques that would have long lasting effects through deliberate manipulation of things like earthquakes, tidal waves, changes in climate and weather patterns.
- The term “atmospheric river” was coined the year after HAARP went into operation. Hmmm.

17

Conspiracy Theories of HAARP

- Can HAARP create earthquakes and tsunamis? The
- Washington Post reported on March 29, 1992, on the incidence of ELF (extremely low frequency) signals being associated with earthquakes: “Satellites and ground sensors detected mysterious radio waves or related electrical magnetic activity before major earthquakes in Southern California during 1986-87, Armenia in 1988 and Japan and Northern California in 1989.”

18

Conspiracy Theories of HAARP

- Can HAARP be used to control our minds?
- Dr. Jose Delgado, a professor of neurophysiology at Yale and well known for his research on mind control through electric stimulation was quoted as saying, "The individual is defenseless against direct manipulation of the brain because he is deprived of the most intimate mechanisms of biological reactivity."
- Could HAARP do this?

19

Conspiracy Theories of HAARP

In the 1980's Dr. Michael Persinger developed a brain research tool referred to as the Persinger Helmet. He discovered that when specific frequencies are directed into the hippocampus area in the back of the brain a large percentage of subjects reported UFO abductions, out of body experience and union with God. Dr. Persinger says, "the helmet involves a widening of emotional meaning, such that things not typically considered meaningful, and hallucinations are perceived to be real."

Two YouTube videos I would recommend on mind control are:

- YouTube – "The Why Files" - Subliminal Warfare | Mind Control and Invisible Influence
- YouTube – Dr. James Giordano – "Neuro Wars" – in this video Dr. Giordano addresses a class of cadets at West Point on the coming Neuro Wars.

20

Conspiracy Theories of HAARP

- In 1994 Advanced Neurotechnologies announced the development of a device named Brainlink. Brainlink connects human brainwaves with a computer interface (that was 30 years ago). The device amplifies 0.5Hz to 40Hz brainwaves and converts it to digital form.
- I won't be going into specifics on brainwaves and emotions; this can be found in the reference data. However, I will assure you that every emotion has been charted and exposing one's brain to a change of frequency can significantly affect the individual. I bet you couldn't guess that HAARP has conducted experiments in this frequency range. HAARP's ability to transmit in the ELF range may make it the ultimate mind control instrument.
- Klaus Schwab (WEF) has been quoted to say, "You will own nothing and be happy." Could HAARP be the mind control device that keeps everyone happy during such times? Hmm.

21

Conspiracy Theories of HAARP

Mind Control

• On the website for INBRAIN Neuroelectronics they talk about bringing together deep tech, med tech and digital technologies. Per their website "INBRAIN harnesses the extraordinary material properties of Graphene, the worlds thinnest and Nobel prize winning material, to build safe and non-invasive and highly efficient neural solutions." Some are great scientific inventions, and some are very nefarious.

- INBRAIN has recently secured \$17 million in funding for the first AI powered graphene brain interface. Their website and NaturalNews.com are full of articles that discuss developing the best human to machine interfaces.
- One of the ways to use electromagnetic frequencies is to direct it to a specific target. However, in some cases this target must have a receiving antenna. Could graphene be the receiving antenna for some nefarious plot? Hmm.

22

The Goals of Project Blue Beam

- The Goals of Project Blue Beam:
 - To abolish all Christian and traditional religions in order to replace them with a one-world religion based on the 'cult of man'.
 - To abolish all national pride and identity in order to establish a one-world identity and pride.
 - To abolish the family as we know it in order to replace it by individuals all working for the glory of the one-world government.
 - To destroy all individual artistic and scientific creating works to implement a world government's one mind set.

23

The Four Steps of Project Blue Beam

- Step 1 is the breakdown of all archeological knowledge. This will be done by using earthquakes at preselected locations throughout the planet where supposedly new discoveries will be made and – forthem – explain the wrong meaning of every major religion's basic doctrine.
- Step 2 deals with a gigantic space show that will show with three dimensional optical holograms and sounds, holographic images to different parts of the world, each receiving images according to their region/national religious faith. This new god's image will be talking in all languages. This will be the introduction to a One-World Religion.

24

The Four Steps of Project Blue Beam

- Step 3 with telepathic two-way communications where extremely low frequency (ELF), very low frequency (VLF) and low frequency (LF) waves will reach the people of earth making each one believe that his own god is talking to them from within their own soul.
- Step 4 contains 3 different orientations:
 - 1) To make mankind believe there is an alien invasion which will push each nation to use its nuclear arsenal to strike back. This will lead to full nuclear disarmament with the UN.
 - 2) Make Christians believe that a rapture has happened with supposedly divine intervention of an alleged good alien force coming to save mankind from a satanic attack.
 - 3) This is a mixture of electronic and supernatural forces.

25

Project Blue Beam

Step 1

- Step 1 is the breakdown of all archeological knowledge. This will be done by using earthquakes at preciselocations throughout the planet where supposedly new discoveries will be made and – for them (Luciferians) – explain the wrong meaning of every major religion's basic doctrine. Could HAARP be used to generate earthquakes at precise locations around the world?
- An interesting earthquake event in 2023 in Turkey. The day before a devastating earthquake hit Turkey, 8 countries removed their diplomats from Turkey. Coincidence or were they given an early warning?

26

Project Blue Beam

Step 1

- There are many religions throughout the world. How many earthquakes would it take to change the religious doctrines of most major religions?
- What if it could be done with only 2 or 3 earthquakes? The top five religions cover 93.3% of the world's population.

27

Project Blue Beam

Step 1

- Top 5 religions:

1) Christianity	31.0%
• 2) Islam	24.9%
• 3) Irreligious	15.6%
• 4) Hinduism	15.2%
• 5) Buddhism	6.6%
- Each religion (except for the irreligious) has a key city/area that would be targeted. Let's look at Hinduism and Buddhism first. Hindu has 7 cities that are important, but Varanasi, India is the one that a Hindu should visit before dying. The key city for Buddhist is Lumbini, Nepal. These two cities are 166 miles apart. So, could one major earthquake be enough to reveal the archeologist findings? Islam has Mecca and Christians have Jerusalem. These cities are 770 miles apart so 2 earthquakes would be needed, unless they use Jerusalem as the site for findings of both religions.

28

Project Blue Beam

Step 2

- "A gigantic space show that will show with three dimensional optical holographic images and sounds to different parts of the world, each receiving images according to their region/national religious faith. The new god's image will be talking in all languages. This will be the introduction to the One World Religion."
- Each religious leader (hologram) would instruct us to follow the new One-World Religious leader (Antichrist), because our current religious doctrines are the reason man has gone to war over the years.

29

Holograms and Project Blue Beam

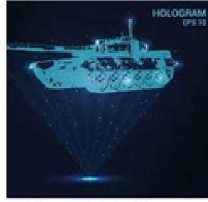

- The hologram was invented in 1948 by Dennis Gabor. Although the technology used originally is different than now, the theory was proven successful. What's interesting is Gabor won the Nobel Prize in 1971, 23 years after he invented the hologram. Could this have anything to do with the start of Project Blue Beam? Following are the dates of each government investigation into UFOs and the development of the hologram.
- 1947 – Project Saucer, later that year was changed to Project Sign.
- 1948 – Gabor invented the hologram.
- 1949 – Project Sign becomes Project Grudge.
- 1952 – Project Grudge becomes Project Blue Book.
- 1969 – Project Blue Book is terminated.
- 1970 – Project Blue Beam???????
- 1971 - Gabor wins Nobel Prize.

30

Holograms and Project Blue Beam

- On January 31, 1996, CNN reported that the secretary of the Air Force had announced the development of a "next generation" of military defense weapons which included the projection of holographic images into the sky to terrify or disorient the enemy.
- Can you imagine where that technology is today?
- If you want to see some interesting holography you may want to google, "Cities in the Sky - China" and "3-D Billboards."

31

Project Blue Beam

Step 2

- Holograms could be either satellite based, ground based or both. Each of the religion's main being (Jesus, Allah, Brahma and Buddha) will appear in the sky and then turn into the antichrist, stating that all religious doctrine has been the reason for all the wars. That a unified one world religion is the only way to survive.
- As Dr. Persinger mentioned, "the right frequency applied to the brain can make a hallucination appear real."

32

Project Blue Beam

Step 3

- "Telepathic two-way communications where extremely low frequency (ELF), very low frequency (VLF) and low frequency (LF) waves will reach the people of earth making each one believe that his own god is talking to them from their own soul."
- HAARP has done testing in the ELF, VLF and LF. So, could this be where the frequencies and messages are generated. And more than likely, there will be more than 1 HAARP at the time Blue Beam is initiated.
- Could HAARP be controlled by AI for this step?

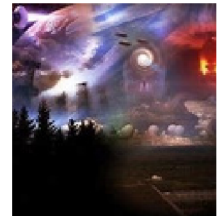

33

Project Blue Beam

Step 4

- By the time we get to step 4 of Project Blue Beam the world will be in chaos, people will be confused and terrified.
- Then comes the first of 3 parts to step 4.

34

Project Blue Beam

Step 4 - Part 1

- "To make mankind believe there is an alien invasion which will push nations to use nuclear weapons to strike back. This will lead to total nuclear disarmament."
- Remember, Wernher Von Braun warned of a fake alien invasion in the mid-1970's.

35

Project Blue Beam

Step 4 - Part 1

- "To make mankind believe there is an alien invasion which will push nations to use nuclear weapons to strike back. This will lead to total nuclear disarmament."
- John DeSouza indicated that some of the UAP's are actually man-made and carry a lot of destructive power. This in combination with holograms could simulate a full-blown alien invasion. UAP's attacking select cities could initiate the use of nuclear arsenals.

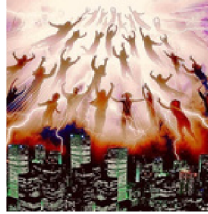

36

Project Blue Beam

Step 4 – Part 2

- “Make Christians believe that a rapture has happened with supposedly divine intervention of an alleged good alien force coming to save mankind from a satanic attack.”
- When and how could a fake rapture happen?
- When you look at something as evil as Project Blue Beam, it’s obviously part of Satan’s evil web to destroy mankind. So, for this to succeed it only makes sense that this must happen before God’s rapture.

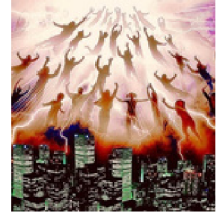

37

Project Blue Beam

Step 4 – Part 2

- So how could this be pulled off with what we know from Blue Beam?
- People disappear every year in places like National Parks and the Bermuda Triangle. Where they end up is anyone’s guess. So, right after a fake alien invasion where cities are destroyed, people have died, you now have people suddenly disappear on a level never seen before.
- Holographic imagery is used to show people being elevated off the planet and of course the media helps to move the narrative

38

Project Blue Beam

Step 4 – Part 3

- “This is a mixture of electronic (AI) and supernatural forces.” At this point the world will be a mess. AI (electronic forces) will no doubt be utilized here in some way. Elon Musk has said, “With Artificial Intelligence, we are summoning the demons.”
 - AI will control all your electronic devices, sending you messages of how you should behave. What will happen if you don’t comply to the New One World System?
 - Your travel and finances will be controlled.
- On top of all the demonic AI messages we get, we will also face actual demonic beings.

39

Project Blue Beam

Step 4 – Part 3

- Up until now Blue Beam has been all science and technology. We can study it, understand it and in a way prepare for it. We can’t stop it or avoid it.
- The very final stage is the supernatural demonic army of Satan.
- I can only imagine the horror that will accompany these creatures who have been trained for centuries to wreak havoc on mankind. Their only goal is to drag as many of us to hell as they can.
- Could the 20-year cycle of biorhythms (see slide 5) be a pathway for demons to arrive on earth? Just a thought.
- I’ll let the reader use their imagination in how this could play out.
- You could consider reading the first part of the book, “23 Minutes in Hell.”. This gives a very descriptive view of what one person describes as being in hell.

40

Project Blue Beam

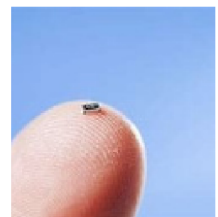

The Destination for Those Who Do Not Comply

- For those that will not accept the New World Order there is a plan for concentration camps and for those camps they made what is known to be the rainbow classification for the New World Order prisoner. It is unknown what each color is to represent.
- Classification 1. This will be for Christian children. They will be used as human sacrifice and/or sex slaves.
- Classification 2. This is the classification of prisoners to be used in medical experiments where drugs and new technologies will be tested on humans. Seems we talked about this earlier.
- Classification 3. This is for healthy prisoners for the international organ center, where vital organs will be removed one by one while maintained alive on a special life support system.
- Classification 4. This is for healthy prisoners to be used in slave labor camps.
- Classification 5. This is the international re-education center. Prisoners will be re-educated with the chance to repent on worldwide TV.
- Classification 6. This will be the international execution center.
- Classification 7. Serge Monast didn’t have any specific details on this classification.

41

Tracking all the Animals

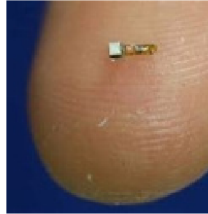

- In his book on Project Blue Beam, Serge Monast discussed using chips to track all animals. Using technology from the 1990’s I just can’t see how that would be possible. So, I kind of dismissed this as being unrealistic. Then I came across ‘Smart Dust’.
- Smart Dust devices are small wireless microelectromechanical sensors (MEMS) that can detect everything from light to vibrations. It is a tiny dust size device with extraordinary capabilities.

42

Tracking all the Animals

- It encompasses a nano-structured silicon sensor that can spontaneously assemble, orient sense, and report on their local environment (yes, inside your body is an environment). This new technology combines sensing, computing, wireless communication capabilities, and autonomous power supply within the volume of only a few millimeters.
- It is very hard to detect the presence of Smart Dust and it is even harder to get rid of them once deployed.

43

Tracking all the Animals

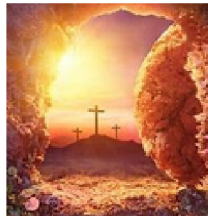

- It can be distributed in several ways, aerosols and chemtrails would be my guess.
- If you thought you could run off into the mountains when things get bad, think again. You shoot a deer that has smart dust, they know it died and if they see the nearest person doesn't have a license then your time is up.

44

Conclusion

- The fear of Project Blue Beam happening can be overwhelming. The actuality of it happening would be devastating. But there is hope. Regardless of how this plays out, we will go through the rest of our lives winning some battles and loosing some battles. But if you have Jesus Christ as your Lord and Savior, we will win the war. If you haven't accepted Jesus Christ as your Lord and Savior, now's the time. Tomorrow may be too late.
- The last slide is a list of references used to develop this presentation. I encourage you to do your own research these resources. There are many other resources available but remember that not all resources are legit. So do your diligence on investigating the source you used.
