I am continually amazed at God’s creation..... Can you think of a way God’s physical creation points to Him that is important or obvious to you?

Why is it so important that God is constant?

- I gave a few examples of God being constant. There are more I’m sure.... What are some other constants of God that are important to you?

While God’s physical constants are used by us automatically (gravity, for example), we can leverage these constants to our advantage.

- What can we do to leverage the Constant God? (essentially use His constant attributes to our advantage or to improve?)
