

B'reshiyt: In the Beginning

Gen. 1:1 – 6:8.

- I. Most Christians today pay very little attention to the pivotal book of Genesis – B'reshiyt, believing all the 'Old Testament' to be antiquated and resultantly, it has become a much-maligned account whose relevance to many has been completely exhausted, having instead been replaced by the Gospel accounts of Jesus! [Church opinion not this author's] Contrarily, few spend the time in the Creation account of Genesis – B'reshiyt, to realize that every fundamental tenet of Salvation is found here first!

With that said, we will endeavor to reveal some of the hidden treasures of the Creation account that have intrigued scholars for millennia and prayerfully, for those "Newbies" who're only now beginning to look at Torah, we will hopefully bring understanding to some often overlooked areas! On the other hand, we expect to uncover hidden truths that only the Mind of Elohiym could put within any text! In particular, for the skeptics, we will take a slightly different approach by unveiling proof of the fingerprint of the Creator in the Hebrew language of the Creation text that only this alphanumeric tongue could provide both in the letters themselves and their mathematic equivalent! Shall we?

A Cyclical Creation:

Some, including myself, have long held that Elohiym created everything in a cyclical or circular fashion, and that its' beginning and its' end - represented by the pivotal letters of the Hebrew language – the Alef and the Tav - is the point of entry or doorway for that creational power! Even the Sages acknowledge that the combination of the two letters form a textural oddity which, cannot be translated, as in the body of **Gen. 1:1** and thus it has caused scholars to scratch their collective heads for generations!

As a result, individually, the conjoined letters of Alef and Tav present an enigma representing not only the first and last of the 22-letters of the Hebrew language but also comprising, within themselves the entire message of all letters in the Hebrew Tongue. Not coincidentally, 22 is the value of the Hebrew word **יחד**, yachad, a form of Echad - One, which means to gather in a community or group as ONE. This was the intent behind the creation of Adam as an individual and Adam as a

People! Abba is now raising up a REMNANT who will finally achieve that UNION – Echad!

Therefore, we believe these 22-letters to have been the building blocks of all creation and THE PRIMARY TOOL placed in Adam's hand allowing him to function in the earth as Elohiym's representative! In fact, the reciprocal of 22 (*1 divided by 22*) is 0.045454545 to infinity! 45 is the value of Adam! Adam was the embodiment – literally the Manifest Presence of the 22-letters or Word/DNA of Elohiym and would have functioned as He did, by speaking creation into the physical realm!

Now, let that sink in....The Hebrew word used most often for '1' is ECHAD: Not surprisingly YHVH is described in the Shema (**Deut. 6:4**) as ONE - Echad! Giving us the above reciprocal – ECHAD-1 divided by 22 Hebrew letters – 1 divided by 22! Consequently, the DNA of Elohiym much like this Echad was divided by or apportioned – sent out through the 22-letters of the Holy Tongue and deposited into a Living Vessel giving us 45- ADAM!

As we study the entirety of Scripture without Rabbinic bias, the above Alef-Tav is easily affirmed as the autograph of Yahshua who referred to Himself as the Alpha and Omega - the Alef and the Tav. He who was and is and is to come! In confirmation, we see it as the center word of the 7-words of the Creation Stanza of **Gen. 1:1** - *B'reshiyt bara Elohiym **ET** hashamyim v'et h'aretz* that becomes the Shamesh or Servant Candle of the 7-branched Creation Menorah. The ET became the Servant to all the other 20-letters with a value of 401. 401 just happens to be the 22nd PRIME NUMBER! A prime number cannot be divided by any whole number other than itself! Yahshua cannot be divided by or related to, Man in the flesh! Did you note the connection with 22 again?

I also noticed that with the Alef-Tav being the center word of **Gen. 1:1** what about the center or 14th letter out of the 28? That letter falls at the end of the word Elohiym – **אלהים**, and is the Closed Mem! The letter representing a virgin Womb containing the hidden secrets that will give birth to the following Alef-Tav! This is a prophecy of the birth of Messiah! Also, Elohiym has a value of 86. If we look at the 86th number of PI it is 3, meaning Unity and represented by the Gimmel, the '*Lifted-Up One*' which represents the 1st-born of the Alef-Bet, the House. The combined value of the first 86 letters of PI gives us a total of 418 that is the value of a variant of Echad – Yachat – Union! A union always produces fruit!

If we look at the PI number: 3.141... and its mirror reflection 1413 we get the ordinal values of Mem (13) and Nun (14) representing seed in the womb!

Moreover, it is this same Being who identifies Himself to Moshe as the “I AM THAT I AM”. This bold claim is also substantiated in **John 8:58** where Yahshua remarks: *Yahshua said unto them, Verily, verily, I say unto you, before Abraham was – I AM.* This is not the only ‘I AM’ or Greek ‘*EGO EIMI*’ reference in the New Testament either!

Understanding who this ‘I AM’ is, as found in the PI VERSE of **Ex. 3:14** becomes the key to Israel’s exodus from Egypt as well as, crossing over into the Promised Land! In fact, if you go to Exodus **Ex. 3:14** where you find the first mention of Ehyeh Asher Ehyeh – I AM THAT I AM – you’ll see that it has a gematria of 543, the same as *b’abar h’Yarden* - crossing over Jordan! The river Jordan was a symbol of crossing over and defeating death! Being Born Again! I.E. A resurrection! In addition, as we’ve stated, the value of the Alef-Tav is 401, the same as H#3470, **ישעייהו**, Yeshayahu, Isaiah, whose name translates: Yah has saved, and Yah is Salvation! Once again helping to confirm the identity of the Alef-Tav who Himself was the instrument of Creation (**John 1: 1-3**) *In the beginning was the Word and the Word was with Elohiym and the Word was Elohiym. The same was in the beginning with Elohiym. All things were made by Him; and without Him was not anything made that was made.*

A Creation PI – 3.14!

- II. To that fact, at the heart of the Universe we find everything designed in cycles that revolve around a constant, including the Body of Man whose cells on average replicate every 7-years: The 7th number of PI? (3.1415926...) That number is 6 represented by the Vav Man! Indeed, PI is intimately woven into all periodic, cyclical processes including cell division timing, heart rhythm, breathing cycles and circadian cycles! Since we’re pointing toward PI in **Gen.1:1** which has 7-words and 28-letters, if we take that 7th number of PI mentioned above and add all those previous the total sum of the 7-nubers? 28!

Now, here’s a real head-scratcher for you! It is this author’s opinion that PI is actually an encapsulation of TIME! We know that time is cyclical. If we calculate the current solar year as (365.2425 days) or the 364 or 360-day calendar years of history’s past and multiply by the number of seconds in a day (86,400: 3600x24) we arrive at numbers very close to PI: 31555...31449...31104 respectively; an

error of less than 0.01 which takes in to account the error found in man's inability to properly calculate one second of time - versus the perfection of Elohiym! Thus, the number of seconds in one year regardless of solar length could be expressed by PI: 3.145926535.... to infinity!

I also found it interesting that the diameter of the Sun is 864,000 miles (86,400 seconds in a day) and *the Sun-Son of Righteousness 'RISES' with healing in His Tzitzit!* **Mal. 4:2**. It is this same Sun who travels a circuit in the heavens **Ps. 19:1-6**. Indeed, it would seem that this Sun or VESSEL of Light actually circumnavigates or rests, i.e. sitting upon the 12 Houses of the Zodiac. Where have we seen this example? **1Kings 7** amid the details of Solomon's construction of the Molten Sea that sat upon 12 oxen, **H#1241**, **בָּקָר**, baqar, rendered 'oxen', yet from the same root as **H#1242**, Boqer for MORNING – to break forth, to seek, enquire, consider, reflect! The movement of the Sun initiates this breaking forth! What was Solomon doing? We'll look a bit closer later...stay tuned ☺.

As we continue, if PI – 3.1459...can be seen in **Gen. 1:1** we immediately find in the next verse, verse 2 that a Tohu v'bohu situation – *without form and void* results leaving us with what seems the temporary interruption of cycles! This ensues upon the heels of what must have been a demonstration of Elohiym's treatment of Lucifer's rebellion! How apropos that **Verse 3** declares: *And Elohiym said, Let there be light and there was light.*

Why is this important? Because HE is Light and light expands or is released in spherical order and calculating or understanding the surface area of that sphere depends upon the value of PI! In fact, you can't calculate the speed of Light without PI. Indeed, light is inseparable from not only PI, but also the entire Creation – Redemption account! Meanwhile, I don't think it an accident that the PI sign resembles the Hebrew letter Chet for new beginnings, infinity, a DNA helix cycle and the letter representing the BLOOD – LIGHT of Yahshua upon the Door Posts or Alef-Tav of the Language! Even Noah's rainbow was literally a 360-degree rendering of cycles that could only be understood by PI!

As We Continue...

From a Biblical standpoint, one of the more fascinating 'cycles' is the Wilderness Tabernacle, which we believe, was patterned after the same cyclical, zodiacal, heavenly blueprint and in the manner of the Alef - Tav to have been circular in design and also modeled after the stellar heavens. Thus, both are mathematically

circumscribed by PI – the inestimable numerical term used to find the circumference/diameter of any circle.

As we've discussed, if PI is embedded into Creations' beginning we should expect to see evidence in the Hebrew text of Torah! Undeniably, **Gen. 1:1** has a total (Sum of all Hebrew letters) gematria of 2701. If we count the value of Torah – תורה – we have 611. The sum of Torah or the sum of its value is found in the first 611 decimals of PI that equals 2701 – In the Beginning...!

As discussed, it is a known fact that Creation's calendar was at one time and soon will be again, a cycle of 360-days, representing the number of degrees in a circle. If the circle is divided into 4-quadrants with each bearing a compass point – North, South, East and West – then you have the fixed points where the Tribes camped around the circular Tent! If we divide the circumference into 4 equal parts each is called an ARC – It is my contention that these subdivided Zodiacal Houses, Months and Tribes correspond to the cyclical Festivals and those found keeping them find sanctuary in these heavenly patterns of Noah's ARC - ARK! There are 180-days or 2 **ARCS** between festival cycles. $2\text{PI radians equal } 180\text{-degrees: } 180 \times 2 = 360!$

Except the days be shortened...

- III. To expound a bit further, from our earlier studies we've concluded that a major event will affect the earth's rotation and return us back to a 360-day calendar year. Which, we contend relates to the above '*shortening of days*' effectively putting all of the House of Israel on the same time schedule. This is reflected in Daniel's well-known numbers: 1260, 1290 and 1335. 1260-days represents 42-months or $3\frac{1}{2}$ years. This should be a familiar number to you! If we assert that PI is related to both Time and the Language of Creation then there should be a link here as well. $1260 \div 3.14 (\text{PI}) = 401$ the value of Alef-Tav! Indeed! It is He – The Alef-Tav who will sustain and guide us through these days above known as '*Jacob's troubles*'!

It is my belief that the timing of this future event coincides with a major emphasis being placed upon the restoration of the Language of Creation – Hebrew - which **Zeph. 3:9** details: *For then will I turn to the people a pure language, that they may all call upon the name of YHVH to serve Him with one – Echad - consent!* Ironically, the previous verse (8) includes all 22-letters of the Language!

Moreover, the English word consent is taken from the Hebrew H#7926, שכם, shekem, and indicates the shoulders, the CURVED portion of the upper back

whose value equals 360! It is related to Shakam, a verb meaning to rise early with the sun – light! *Remember our thoughts on Boqer – Morning and the influence of the Sun/Son?

Remember, Shekem was the inheritance of Joseph! The above numbers 1260, 1290, 1335 all figure within the Prophetic 490-year timeline of Daniel as well, which will expose the exiled House of Joseph scattered throughout the earth! Once again, $490 \div 3.14$ (PI) equals 156 – the value of Joseph, **יִסְרָיִל**. It is at the end of this 490-year prophetic timeline that the Living Stones Tabernacle – The House of Joseph - modeled after the Wilderness Tent will become manifest and contrasted violently against that of the 3rd-Temple! Oh, did you know? 156 happens to be the value of Ohel Mo'ed – Tent of Meeting or Tent of appointed Times, The Tabernacle! Is there also an actual PI link to the 3rd-Temple? The common Hebrew phrase for it is: Beit h'miqdash h'shlishi and has a value of $1532 \div 490 = 3.1265$...even closer than Solomon's calculation of PI! We won't even get into the specifics of the Wilderness Tent's construction: For that see: Andrew Hoy http://project314.org/?fbclid=IwAR07crR5tOPTppapm8NWiQuSU8xdB6eA_chJutZn4ayq_BBQ_PXutLjvPY0

Solomon's Molten Sea?

There is another unique place touched on briefly above, where scholars have argued for decades regarding the significance of this 'PI' and that is **1Kings 7:23** where a description of the Molten Sea is given: *And he made a molten sea, ten cubits from the one brim to the other: it was round all about, and his height was five cubits: and a line of thirty cubits did compass it round about.*

Some denigrate the text because of the numbers given here, saying that it only shows PI at an arguably incorrect 3.0 yet, they fail to account for the later description in verse 26 of the dimensions of the lip of the laver given as a 'handbreadth' which most scholars agree as being around 3 inches. This addition gives us a calculation of 3.11 for Solomon's PI! A less than .01 percent error!

Likewise, there are some other powerful numerical connections found here as well! Just to cite a few: The diameter of the Basin or Sea is described as 10 cubits – Apprx. 25.20 inches (Elbow to fingertip) If we once again visit Daniels' prophetic calendar: 7 years at 360-days we get 2520 days! 49-years gives us 2520 weeks. 490-years gives us 25,200 weeks, 7,000-years gives us 2,520,000-days! Additionally, this laver or Molten Sea sat on 12-oxen representing the 12-tribes, 12-months and the 12 constellational Houses of Israel! Astoundingly Solomon had built an eternal calendar chronicling Israel's Past, Present and Future and showing

how PI – 3.14 became the constant sign pointing to the Seal of Elohiym in the Earth!

Too farfetched to consume? In our 3rd book entitled “*Ezekiel’s Wheel Within a Wheel*” we discuss the facts of a possible circular pattern for the Wilderness Tabernacle giving it a design that when orienting it with the month of Nissan (This *shall be the beginning of months...*) would have been the first Global Positioning Device allowing Moshe and Israel to not only know YHVH’s timeline but, subsequently allow them to also know exact locations physically in the desert! Let me digress to an earlier point for emphasis...

Look once again at the angle or Arc of a 360-degree circle discussed above!

- IV. In an interesting etymological contrast to that Arc or angle, i.e. the radial divisions of a circle – we connected the Hebrew word for ‘ARK’ which is H#8392, תבה, Tehvah, and most often translated as a coffer or box. However, I believe that to have been a deliberate mistranslation because we believe the Ark would also have been a circular vessel! Tehvah’s numeric value - 407 is the same as H#226, אות, owth, a sign or token of proof! The Signs in the heavens revealing the Alef-Tav! If you take PI (3.1415...) to its’ 407th decimal you have the number 7 – another ‘owth’ or sign, A Sabbath - the Signet of YHVH’s covenant and creational cyclical calendar and once again connecting us to not only the Alef – Tav, but the Vav - Man in it’s midst – Messiah! You simply cannot make this up! In that same vein, The Hebrew word Shabbat – שבת, has a value of 702 ÷ PI giving you a variant of 22 and pointing us back again to the letters of creation!

What is more, the ancients used a compass divided into 30-degree angles, which would have been oriented to support each of the 12-Houses of the Zodiac along with the 12-Tribal alignments around the Wilderness Tent!

Having said all the above, if indeed ‘*Life is cyclical*’, as demonstrated in the Redemptive Plan of Creation through the idea of being born, dying and experiencing a subsequent being ‘*re-born again*’, then PI should be reflected in

these cycles! Likewise, it is worth noting that PI 3.1415... seems, as we've stated several times all ready, conclusively related to the above Alef-Tav. In fact, it is connected to both redemption and judgment and should not be overlooked in the war between the Seed lines found in the original PI Text of **Gen: 3:14 -15!** In addition, a mirror effect can be found by looking at **Gen. 3.14 – Gen. 4.13** where you find the 1st prophecy regarding the Seed of the Serpent – with him - Cain in chapter 4 being expelled before completing this cycle!

Let's continue...

π

Many scholars believe this Greek letter to have derived from the Hebrew letter Pey: Why does this matter?

The Pey represents the Mouth - Words that are spoken. Elohiym is the first recorded Voice in the earth speaking in **Gen. 1:3**; but verse 1 alludes specifically to His creating – H#1254, **ברא**, Bara - translated here as: To create, shape, fashion or form and to bring forth. The ancient root hints at a cutting or carving involved. If *'nothing'* existed in a tangible form, then only His words could carve Creation out of this Nothing! Hence, in the Hebrew text Bara is in the *'perfect'* verb form and it's pairing with B'reshiyt rare! The subject of this verb form is always Elohiym or YHVH and never man! It is never used with an adjective or accusative related to materials for creating and thus Bara always seems to begin with NOTHING!

It is thus, inarguable that Elohiym created by SPEAKING! Furthermore, **ברא**, according Klein's etymological dictionary Bet-Resh-Alef can also give us SON! That Son – Bet-Resh is depicted in the Alef.

It should come as no surprise then that Words are both cyclical and eternal. Once spoken they can never be taken back, they are seed and once planted demonstrate the Law of Sowing and Reaping which, like the Alef-Tav, produces a harvest that invokes creation! How appropriate that the above letter Pey which launched our discussion, carries another letter in its' womb – the Bet – the beginning of B'reshiyt!

There's another unique connection to B'reshiyt - Bara – **ברא** found in **Gen. 1:5** where the word translated as Evening – **ערב** - erev (Ayin and Alef are interchangeable) is first seen but, this same word can also indicate to pledge or give security – **ארב** - Arav. It mirrors Bara! As Erev, it hints at the sunset or end of day, and as such points once again to the Birth, death and rebirth or cyclical nature of Creation! This Bar-a – Alef Son was first pledged as security when the Day wanes and is born again at Boqer! ...*And the evening and the morning were the first day...*

Now watch! Evening - Erev carries with it the idea of mixture: I.E. Day and night, death and life as in the Flesh or Body of Man. While Boqer **H#1242**, **בקר**, rendered as '*morning*' is always translated as the bringing forth of Light and thus '*morning*' has no hint of mixture! This is why I believe the count of the Day begins at evening – just as our redemption begins at the Planting – death of Yahshua culminating with His resurrection at the breaking of the power of darkness from off Him and ushering in the Light of Creation once again! Considering that, you must recall that Solomon's Molten Sea sat upon 12 Boqer – Oxen – representing the 12 constellational signs or MONTHS - MORNINGS as the Sun's mirror – the Moon - broke free from 3-days of darkness and a Morning – Boqer reveals the Sliver of the Moon announcing its' being born-again!

Incredibly, this large Basin created by Solomon and filled with water ideally represents the '*Mikveh*' or gathering of the Seas underneath the Stellar Luminaries of **Gen.1:9-14**! In fact, **1Kings 7:23** uses the same root word for MIKVEH – but translated as '*line*': **קוה**, qavah, however it is intentionally miss-written. To prove the point, the description of this molten sea is only found 1 more time in **1Chron.4:2** and a powerful confirmation is hidden in the text where the same word '*line*' is written **קו**, qav - only with the '**ה**' now missing!

Trivial, scribal error, accident? The value of qavah (Root of Mikveh) is 111 while qav's value is 106. If we take the width or handbreadth difference in the circumference of Solomon's laver – 3 inches - and multiply it times the ratio of $111/106 = 104,71698...$ we get: Yep – you guessed it – 31415...PI! Though hidden, without doubt the Creator intended to place His Signet in locations that only those who searched for the hidden treasures could find it! **Prov. 25:2** *The glory of YHVH is to conceal a matter: It is the honor of Kings to search it out!*

I believe this revelation of PI is the first prophecy of Messiah's Resurrection and thus pure, unaffected by translators and incapable of argument! In fact, it undoubtedly points once again to the cyclical battle between the Serpent and the Woman's Seed – **Gen. 3:14-15** PI – long before the Garden Encounter! How you ask?

Boqer has a value of 302, the same as H#1300 ברק, baraq – lightning as in **Luke 10:18** *And He said unto them, I beheld Satan as lightning fall from heaven...* the Greek word is astrape - from the Hebrew Baraq – lightning! This is exactly what transpired between **Gen.1: 1-2** and depicted the subsequent separation of those two Beings portrayed eternally as Light and Darkness whose Seed lines must be kept eternally divided, never mixed or mingled! Moreover, 302 mirrors 203, the value of Arav - a pledge or security or Erev - evening with the Alef!

To continue, Pey has a value of 80. It hints at infinity, new beginnings, harmony or Unity! Therefore, Pey and the letter Chet that symbolizes Life or the DNA of creation are inseparably linked! Chet is the 8th letter and like the earlier Alef presents a new life beginning! On the other hand, if you count the 80th letter of PI (3.1415....) that letter whether you begin at 3 or after the decimal point is the number 9 symbolizing the Letter Tet, the upside down womb, emblematic of the Serpent. Once again connecting us to the Prophetic declaration of war between the Seed Lines found within this cyclical redemption story!

In conclusion, Solomon followed the instructions of his father King David and implemented the 24-priestly orders. Effectively, dividing the day into 24-hourly increments: 24 hours time 3600 (Number of seconds in an hour) = 86400 the number shown earlier and proving that Abba is returning HIS people to the correct keeping of HIS calendar in conjunction with HIS Alef-Tav Word! Day and Night, seedtime and harvest are eternal promises and integrally linked to PI. As are His Divine Appointments - Beginning with Shabbat and followed by every holy convocation! What Pope Gregory and the coming Anti-Messiah think to do in massaging the Calendar is being exposed! By the way, Gregory means 'watchful – alert'!

Stay tuned Torah fans!
