

Restoration of the Creator's Calendar Pt.4.
4/20/24.

Foundational Groundwork:

Based on our continued exhaustive look at the Melchizedek Creation Covenant Calendar, we have found that no other currently adhered to timetable, be it Hillel, Gregorian, Julian, Enochian or that of Zadok, can provide us with an accurate timing of Yahshua's birth that will be in complete harmony with the 360-day calendar and the important events attached to it, displayed throughout the Tanach and in particular, the Synoptic Gospel accounts of Matthew, Mark, Luke and John.

To that end, our friends at Covenant Calendar – Tim and Charlene – have crunched the numbers within a 10-year timeframe on either side of His suspected nativity and His death. Their thorough examination has brought us to the conclusion that no other calendar can provide a reliable year for the birth of Yahshua that syncs with the timing of His crucifixion in 30 CE with the Statutory requirements of the Sacrificial Lamb being a Male of the 1st-year. With that being said there are multiple factors that are often overlooked by those assuming scholarly authority in this area, all the while, ultimately failing in their earnest attempts at fixing those dates on their respective Calendars. Let me share a few stumbling blocks...

Intercalation/Extracalation
Misinterpretation of Festival terminology.

Invariably, any calendar that intercalates or extracalates days into its formula for calendar consideration is fallacious from its' beginning. Why you ask? You cannot precisely fix Divine Appointments, to which, Yahshua's nativity and death would surely belong, outside of the Melchizedek Creation Covenant Calendar of 360-days, 12-months of 30-days. Neither can you accurately predict the Eschatological import of the events shown in Daniel, Ezekiel and Revelation. You might get close on occasion, but, at times even a blind hog can find an acorn. For this very reason, any calendar that supposes its' dates based on a lunar, evening-to-evening or a solar sunrise-to-sunrise estimation or perhaps the Roman reckoning of a day starting at Midnight is also going to be wrong. For example...

The former and latter were each used during the execution week of Yahshua and could get no closer than 6-hours (Roman) to the True and Eternal Calendar of

Creation, and only during that specific year! The Lunar calendar is all over the place and seldom sees the convocations in close proximity to the previous year, while the Melchizedek Creation Calendar will ALWAYS have both spring and fall festivals within 1-2 days of the previous year based on the observation of the Equinox's shadow!

That information, hidden to all but a small, but growing group, exposes the misunderstanding of a Lunar 12-hour offset as depicted in Matthew, Mark and Luke, coupled with the Roman 6-hour offset in John is responsible for all of the 'supposed' scheduling contradictions in the Synoptic Gospels!

Accordingly, because of a biased driven scholarly perspective, tremendous ignorance has been fostered in this area! Consequentially, the ensuing critical errors in calendar timing - cannot be remedied without a proper understanding of a Dawn-Year start, (Vernal Equinox) for the Holy Convocations, followed by a Dawn-Day start for daily calculations: Resultingly, any effort, aside from the latter, attempting to affix an accurate timeframe based on lunar calculations is an exercise in futility! For example: The Lunar - Evening day start. Please consider the Jewish Encyclopedia's definition of the most common term for moon – Yareach – whose root comes from the root 'areach' – meaning 'to wander' [<https://www.jewishencyclopedia.com/articles/10975-moon>]. In fact, the moon as a maritime navigation tool historically, was called a 'drunken sailor'.

*Note: regarding the lunar/solar calendar, we find that in most cases there is a general consensus that two specific years are viable candidates for consideration as possible dates for the execution of Yahshua: 30 CE and 33 CE. (These are based on the Lunar - Jewish observations for both the year and days' beginning) In both instances, each agrees on the Vernal Equinox occurring on March 22nd of that year, as well as, the conjunction of the moon taking place on that same day, followed by the expectation of the possibility of the Sliver Moon sighting the succeeding day (Hence, the Jewish Lunar influence). Sadly, neither of these traditional opinions will consider any timeline where Yahshua's ministry doesn't extend over a 3-year period, which is NOT THE CASE! [Again, the error is enhanced further, based on an additional, wrongful assessment of the Calendar by assuming His Nativity as determined by His physical birth rather than at CONCEPTION] So, each is irreparably flawed!

What follows in every case, except for the Melchizedek Creation Covenant Calendar [Whose computations are based on the Vernal Equinox and a Dawn-Day start, including beginning the count of His earthly life at conception – not His

actual, physical birth - as opposed to the Sliver Moon and an evening to evening day start] – results in a failed attempt - as each determined their dates for the crucifixion as having actually taken place on Nisan 13 - several hours before THE FEAST OF THE JEWS - Passover – i.e. their Passover which supposedly began Nisan 14 at evening – again, based on the aforementioned lunar/solar (Sliver moon - new Moonth – with their evening day start) reckoning. A 12-hour offset thus ensues. The above is clearly evidenced throughout the Synoptic accounts, as the Jewish Feast of Pesach supposedly began that evening at sundown, beginning their 14th. Now, ask yourself, how can THE LAMB who is to be prepared, slaughtered, roasted and EATEN that same evening, all the while, in preparation for a minimum of 10 – people to partake - allow for Yahshua to fulfil each mandated event as THE LAMB from His death at 3pm and it not even be PESACH UNTIL EVENING? I'll wait...

Don't feel too bad, those miscalculations are embraced by almost all the other calendars. Sadly the miscalculations continue to pile up, because most are woefully ignorant of the Scriptural evidence of how the Creators' Calendar commences in **Gen.1:1**: Here, Elohiym is Prophesying - setting in motion HIS reckoning of TIME - by THE LIGHT OF THE WORLD'S CONCEPTION AND INTRODUCTION - at Creation's inception – B'reshiyt – the value of which equals 913, the same as Beit H'malchute – translated as; House, bride, womb of the Kingdom! Light was first conceived here in **Gen.1:1** in the Womb of Elohiym's Bride/Kingdom! However, He who was the Light, was physically born, given a body in **Gen.1:3** at the release of: "*Let There Be Light*". The above demonstration was prophetically typified the year before CE 1 at the 9th month festival of Lights – Hanukkah - recognizing Yahshua's Conception in the Womb of Miriam - rather than His physical Nativity - as His earthly beginning – a work that **will always result in a wrongful determination** of the BEGINNING and END OF HIS Life in addition to, the length of His EARTHLY MINISTRY - if not considered! This conception was planned from Creation!

It is here that **Rev. 13:8** comes in: *And all that dwell upon the earth shall worship him (Anti-Messiah) whose names are not written in the book of life of the Lamb slain from the foundation of the world.*

- Foundation, Gk#2602, katabole, the founding, the injection of virile seed into the womb. It indicates a conception! This is a compound word from: Kata and Ballo. The former indicates a motion flowing DOWN from higher to lower in specific time and place, as in DAILY. While the latter indicates to

do so purposely with force! Remember: Gestational cycles are numbered, timed, fixed on calendars.

Correspondingly, the Melchizedek Creation Calendar also affirms the year 30 CE at Passover, the 14th of Nissan for the timing of Yahshua's death, exactly fulfilling the Torah Statute but as stipulated: Based on the Teshuvah Shadow at the Tequfah or Vernal Equinox and a subsequent Dawn-Day position! This alludes to Creation's Original introduction of Light into the world in a yearly rehearsal proving that LIGHT CAME FIRST as the I AM THAT I AM – whereupon, darkness immediately is seen attempting to usurp or deviate from these boundaries!

This Pattern is what connects us to Yahshua's conception - the Dawn-to-Dawn Model – which, I reiterate, took place in the 9th month of Kislev 12-months prior to CE 1! It is imperative that the Reader understands that both John and Yahshua's years are calculated from their CONCEPTION – NOT PHYSICAL BIRTH! [Note the events of [Luke 1:39-44](#)] Again, we see the same Creational pattern as the original LIGHT – which, set the standard of seed reproducing after its' kind.

Moreover, Light – The Seed - is afterwards given a body called Day, [H#3117](#), יוֹם, yom, whose root indicates movement or motion in the celestial fluid – Creation's Light – much like Elisabeth's baby leaping in the womb at the word of Miriam – [[*See Luke 1:39-44](#)] This is the same Creational Light whose influence later produces an order and a form, or body called day. Day is not the light; it contains the light. This is followed by darkness, choshek which is also given a body called night - Laylah, from [H#3915](#), לַיְלָה, whose origin means to turn, to deviate from the original boundary or standard. (*John Parkhurst – Hebrew Grammar*) The enemy always attempts to cross over Torah Standards or boundaries. It is without doubt that Elohiym's Calendar is just that: An eternal witness or boundary established both in the heavens and in the earth. For those of us who've knowingly kept a different calendar, that statement alone should provide cause for a deeper, prayerful look into finding out the truth instead of SHOOTING THE MESSENGER who brings information regarding the possibility of a True Calendar.

Hence, all the questions I'm presenting should serve as provocation for getting answers! Pay attention to a familiar exhortation: [Prov. 25:2](#) *It is the glory of Elohiym to conceal a thing: But the honor of Kings to search out a matter.*

- Conceal, H#5641, סָתַר, satar, to hide, conceal, to cover, keep secret, protect. It is used in Deut. 32: 38 to mockingly insinuate that the pagan gods (Lunar Worship) cannot provide that secret place of protection that YHVH can! It further indicates that a man's way can be hidden from him thus, preventing his escape from calamity! Is it possible that in full view of the future apocalyptic events set to face all of Creation, that YHVH just might be setting the Concealed Calendar at this particular moment before those Kings and Priests who will search it out and find it to be their sanctuary?

How incredulous does this 'all-of-a-sudden' interest in calendars and a change in long-held positions by several known leaders, at the same time I might add, need to be before we begin to consider that perhaps it's not them, but YHVH moving among us? Does the fact that I'm not seeing it, or truly understanding it, having never devoted much time in the study of the subject invalidate THEIR HEARING? These questions beg answers!

One can hardly argue that the cyclical patterns of the heavens and their multiple witnesses in the earth including but not limited to: – The Cyclical Ark of Noah, The Cyclical Tabernacle – both of which, afforded concealment and protection which is demonstrably and vividly confirmed in the Melchizedek Creational Calendar of 360-days - Without doubt, each provided the same protection, concealment and a secreting away that was imparted to those who would embrace its divine appointments! Go back and look at the dates throughout the account of Noah and the Flood. We can prove that they PROPHECY OF THE MINISTRY OF YAHSHUA WITH EXACT TIMING! No other calendar can come close.

Hence, the necessity of Prov. 25:2 and truth searching, H#2713, חָקַר, haqar, to investigate, penetrate. *Note the root stem: חָקַק – Choq – statute, ordinance, decree! Its origin hints at declared boundaries. The 360-day Priestly Creation Calendar yields itself to the adherent as a means of establishing STATUTES or life's borders or fences all the while encompassing the individual. Job 14:5 *Seeing his days determined, the number of his months with thee, thou has appointed his bounds – Choq – and he cannot pass; There is no other Calendar which consistently adheres to those Torah Statutes! From Job we conclude that...Calendars are life's image! You are admonished to number your days accordingly.*

Therefore, contextually, Man must consider the number of his days. This is echoed in Ps. 90:12 *So, teach us to number our days, that we may apply our hearts to wisdom.*

Did you see the word for number, H#4487, **מנה**, to count, reckon, ordain, to weigh out, to constitute officially. It is cognate with H#4478, **מן**, the 'bread from heaven'. This Mem-Nun root is first seen in **Gen. 1** referring to a species, or particular class of things. It points toward a delineation or similitude or representation. It carries the idea of strings on a musical instrument whose Unity requires one to control their disposition and adjustment to each other! Ironically, the pattern of the Manna consistently follows the Passover of **Ex. 14** and the implementation of the 360-day calendar! Perhaps in numbering our days we should allow HIM to control our disposition and adjust each of ACCORDING to His TIMING – CALENDAR? Let's continue...

*Note in **Job 14: 5** specifically, the word 'month', H#2320, **חדש**, Chodesh. While most argue it is used to define a visible new moon that regulates the month's beginning, a proper academic look at context proves this words' etymological root has always indicated to cut or polish, not in a new object, but taking an existing object and renewing or repairing it. In that setting, Man is thus admonished that he only has a limited number of days to repent, renew, repair himself, to make Teshuvah! **It becomes evident upon closer scrutiny that Chodesh nowhere in the Hebrew text of Torah indicates visible, new moon, but always has another meaning! In fact, Chodesh has no more relation to the moon than to the sun!** As evidenced by the fact that history records the Hebrew months as NOT synodic, but fixed to a certain solar tropical year! [*John Parkhurst Hebrew Grammar page 196 – חדש*]

With that being said, The 360-day Calendar is crucial to determining the Numbering of His days, and as an analogy, the tenure of Yahshua's ministry; a fact, that CANNOT BE SEPARATED from the commandment concerning the fulfilling of the Torah Statute(s) where the Pesach Lamb must be a LAMB OF THE 1ST-YEAR FOR SACRIFICE. This statute powerfully confirms the Torah's position of life beginning at Conception! Moreover, if one cannot grasp, that for Yahshua to be 12-years old as **Luke 2:41-49** reveals, indicating that He would have had to be 1-year old upon entering CE 1, then further error is the consequence!

Attendant upon that, having incorporated into the already convoluted forgery above, additional errors based on their misunderstanding of the Gospels' recording of His death ensue (*Which many assume occurred on the preparation day prior to the weekly Sabbath*) causing them to erroneously assume His execution took place on a Friday. Subsequently, taken as a whole, some may argue that such errors may seem innocuous, but they're no different in consequence than trying to navigate

long distance using Magnetic North rather than True North, though it's only a difference of slightly less than 15 degrees, a 1-degree error over just 1-mile will result in a 92.2 feet error! Multiply that by 15-times and your destination is over 1/4 mile in error in that same 1-mile. Does that really apply when fixing dates and times? Yes! Emphatically so!

How to repair critical errors?

We've recently witnessed the futility of trying to suppose that Solar and/or Lunar eclipses may supply us with a framework within which to calculate or anticipate historical or future appointments. With that said, whenever either one occurs as a "Natural" result of alignment it always has a future portent! I.E. it is not a warning of imminent judgment, rather judgment that is coming and should merit repentance. Take for instance the account of [Luke 23:44-45](#). *And it was about the sixth hour, and there was a darkness over all the earth until the ninth hour. And the sun darkened, and the veil of the temple was rent in the midst...*

Many of those same Biblical scholars mentioned early on in our notes use supposed historical evidence of this event as a benchmark from which to determine their dates. However, based upon the Melchizedek Creation Calendar the timing of Yahshua's execution would have occurred precisely on Abiv 14 according to statute. That said, based upon computer models the **full moon** would have been seen two-days later! Why is this important? Because at His execution we're ALREADY 14-days into the month and Solar eclipses can only occur during a new moon while a total eclipse has never been recording lasting longer than 7-minutes 29 seconds! What then Happened? <https://science.nasa.gov/eclipses/faq/>

Allow me to remind you that Yahshua was a LITERAL fulfillment of Biblical prophecy! He was indeed, the Light or DAWN of the World. His conception would become the literal declaration of [Gen. 1:1, 3](#). *In the Beginning - And YHVH said, Let there be light: And there was light.* He was not given a visible physical body until exiting the womb, much like we see where the Light is released at CONCEPTION AT THE BEGINNING – B'reshiyt - verse 1, while the same Light is finally given a body in verse 3. It is my contention that this Light existed from the Beginning and functioned like the 'Dawning' of the Day found in [Gen.1:1](#) followed by a period of darkness in the 2nd verse. This set the precedent and darkness never precedes or preempts the Light as a means of reckoning! This alone should negate an evening-to-evening reckoning of the day! On the other hand, contrarily, darkness seems to intrude on the scene in verse [2](#) and again in the 'Eclipse' of [Luke 23: 44-45](#) as a means of usurping the rightful position of the

Light. Plainly, this follows the Law of Genesis – where Seed reproduces after its' kind! What then, happened?

If we read **Ps. 18** in its' entirety, it provides what is a vivid and poignant description of what Yahshua must have endured on the Stake. Yet, rather than let Him be exposed to the powers that be: I.E. Death, Hell and the Grave - Elohiym came down with a shroud of darkness that became a Secret, H#5643, סֵתֶר, sether [*Covering, hiding place, secrecy, protection*] Pavilion, H#5521, סֹכָה, sukkah, [*a temporary cover, tent*] round about Him, H#5439, סָבִיב, sabib, [*a circuit, on every side, to encompass, transform, change*]. This is CALENDAR LANGUAGE!

Apparently, the earthquake served a two-fold purpose. To rend the gigantic 2nd Temple Veil and to mark the first fruits of the resurrection in their grave, in anticipation of the wave offering after His resurrection! What happens next is no ordinary Solar eclipse. It is a parallel of **Gen. 1:2** Where the Light of the World is assaulted by darkness. But, what most ignore is that the timing of this quake also DESTROYED THE VALIDITY OF THE PAGAN LUNAR CALENDAR BEING KEPT BY THE “BOUGHT AND PAID FOR JEWS” IN POWER AT THAT TIME!

HOW SO?

GEN.1:2 IN REVERSE.

At the moment of Yahshua's death the earth is in a Tohu V'bohu condition and darkness IS SEEKING ITS' PREY -Darkness H#2822, חֹשֶׁךְ, though rendered most often as darkness, to obscure, its' origin hints at an effort to impede action or motion, to refrain or restrain to keep back! [*John Parkhurst P.178*] What is darkness attempting to impede? Just as in **Gen. 1:2** The Spirit of Elohiym IS moving, shaking, vibrating, releasing frequencies of LIFE and LIGHT upon the panim – face – of the earth bursting open the gates of life from the PLANTING OF THE SEED OF LIGHT – YAHSHUA - turning or stirring within the Womb of Creation! The same is happening at the Crucifixion! The foundations of the earth are being shaken and darkness attempts to usurp the lawful RELEASE of LIGHT!

Only this instant, for the first time since Adam - there's a lawful HIGH PRIEST who has no sin, and who is able to officiate at the altar that has always accused the MAN whose blood is tainted. It is an Altar upon which the blood of animals cannot ever atone – only set off the penalty! Let it be known: Every prior priest, including those Levitical Cohen had death working in their flesh. Now, ask yourself, if Calendar isn't that important, why is Yahshua born and why does He die, at a

specific set of Convocations, where scholarly opinion concludes that the calendars (*Lunar/Solar*) observed by those around Him - from High Priest, Roman Governor and more - were out of sync with what He demonstrated in His actions? Torah Statute requires precisions here. Exact Date and Time. Else the Altar and its' sacrifice fail! You cannot argue otherwise! This was a precision event timed from Creation's inception!

It stands to reason - That THE SINLESS MAN must enter at the prescribed moment that has historically been hidden because of ignorance of the Eternal Priestly Calendar! Every man prior came with sin in his blood – though some at the right time kept the 360 calendar – FROM BABYLON forward the enemy attempted to hide the calendar in anticipation of the coming of the only ONE WHO COULD ENTER AND who WOULD ENTER AT THE RIGHT TIME! The Calendar is that important! NO PASSOVER OR YOM KIPPUR OFFERING CAN BE ACCEPTED IF IT CORRUPTS THE STATUTES STIPULATING WHEN IT IS TO BE PRESENTED! Still skeptical of a viable 360-day Melchizedek Creation Calendar?

Calendar issues requiring change are hard to swallow. Based on Hebrew gematria the letter values of **Gen. 1:1** equal 2701. The first 611 digits of PI (3.14) equal 2701. PI has little merit without considering circumference of a Circle as 360-degrees. Oh, that's surely coincidental. Yet, likewise, the Sages teach that the Language is cyclical, i.e. inherently related to that same 360. Torah undeniably starts Creation from the foundation of this 360-degree/Calendar principal! Look at the following...

Zeph. 3:9 declares: *For then I will turn, H#2015, **הפך**, chapak, to turn or change the condition, the inverse, the contrary - to the people a pure language that they may all call upon the name of YHVH to serve HIM with one consent.*

- One, H#259, **אהד**, one, united, once for all, to UNIFY or collect together.
- Consent, H#7926, **שכם**, shekem, shoulder, portion – the valley of Shekem belongs to Joseph! *Note that shekem has a value of 360! Hebrew is alpha-numeric: Thus you could just as correctly say “..to serve Him united with 360!”

It is my contention that the House of Joseph shoulders the office of the Melchizedek Priesthood and with that, the divine ordinances of the Holy Appointments! Joseph will be UNIFIED and help to collect the rest of the Brothers with respect to the 360-day Calendar! Why is this needful?

What are you anticipating on the Prophetic horizon regarding timelines?

Every infinitesimal facet of how time and its 'calendars' are delineated historically has always been founded upon this precept of 360 degrees. From timekeeping to navigation by the Stellar luminaries. Upon close Scriptural examination it is without doubt that the 360-day calendar becomes the benchmark for every notable and explicitly listed days/dates and events from **Gen. 1** forward! Had Yahshua NOT RESTORED THAT KNOWLEDGE AND ATTENDED HIS MINISTRY AT THE TIMES APPOINTED BASED ON THAT MELCHIZEDEK PRIESTLY CALENDAR WE WOULD NOT HAVE HIS BLOOD RATIFIED REDEMPTION!

It seems that what Yahshua did during His lifetime – which cannot be separated from His work as High Priest after the Order of Melchizedek; an office where only HE was entitled to officiate in offering sacrifices in the Heavenly Holiest of Holies and which, authorized Him as THE HIGH PRIEST to bring the wave offering of the First Fruits - was hidden [*Veiled, covered, secreted*] from those around Him.

Furthermore, indemnifying this Priestly Order would of necessity had to include the restoration of the Calendar with its Holy Convocations that were set eternally in the heavenly SUKKAH - TABERNACLE for His officiating. Imagine the affront to the Levitical High Priest as the Veil of Yahshua's flesh is rent while simultaneously the Temple Veil is also torn revealing the VACANT 2nd-temple Holiest of Holies a fact, that would naturally facilitate the presupposition that THE PRESENCE OF ELOHIYM WAS ABSENT from the 2nd Temple, AS WELL AS, exposing their HARLOT CALENDAR! What does this say about whose presence will sit upon the throne of the 3rd Temple that is coming soon? What Calendar, suppose you, will determine the fealty of those attending that, Temple? Go read **Rev. 13:8**...*And all that dwell upon the earth shall worship him, whose names are not written in the book of life of the Lamb slain from the foundation of the world...That sacrifice was established on a specific Calendar for over 4000-years!*

In closing, for arguments' sake, we've provided evidence of a 360-day calendar at Creation's inception, we can prove Noah's timeline - which was 'date specific' - patterns the Crucifixion week, we can prove Abraham kept the 360-day calendar and that Joseph was taught the same also implemented it and we know that Moshe restructured the recent Lunar Egyptian calendar mindset of Israel back to the same. We can prove that Joshua entered The Land on that same time keeping Calendar linked to Moshe. Lastly, we have provided ample evidence that Yahshua adhered to the same. Now, as we're once again coming out of a Babylonian structured house

with its' Lunar calendar setting the appointed times of the Anti-Messiah that all the world will worship - we see once again the benevolence of The Creator in not only restoring the Pure Language to allow understanding of the LOST MESSAGE OF THE LUMINARIES, but also the restoration of the Melchizedek Priestly system that administers the Set Times according to the Heavenly clock and calendar. This will stand in stark contrast to the Lunar Calendar of the Anti-Messiah!

At the end of the day, it is without doubt that Yahshua refused to LAY DOWN HIS LIFE as the Sacrificial Lamb, slain before the foundation of the world on the calendar set by the Lunar – lunar/solar calendar of the Jews and Romans. He came at a specific set time in order to fulfill those STATUTES to the letter! Now, Joseph is once again tasked with administering the same! Ode Yoseph Chai!

One last point...

I found it rather interesting that Yahshua was born some 4000-years after Creation. $4000 \text{ Divided by } 360 = 11.1111111111$. The difference between a solar year (365) and the lunar (354) = 11. The difference between 365 and 360 = 5, $360 - 354 = 6$. $5 + 6 = 11$. **Gen. 11** reveals the first world-wide rejection of the Melchizedek Calendar and subsequent judgment of YHVH, while **Gen.11:11** speaks simultaneously of the generations of Shem in the midst. Throughout Scripture chapter 11 and verse 11 always involves the meeting out of that judgment and what happens when Israel returns, (*Lev.11:11, Neh. 11:11, Job 11:11, Is. 11:11, Rev. 11:11, etc.*) Joseph was the 11th son!

Therefore, Joseph, you must judge righteously and to do so, you must keep the divine appointments at their correct time. This ensures that a Remnant will be saved in the coming persecution! Still think calendar isn't important?

Shabbat Shalom
