

Elisha asked the widow...

"What can I do for you?  
What do you have in  
your house?"

"Nothing except a flask of oil."

Elisha then instructed her to get  
as many empty vessels as she  
could from her neighbors and  
keep pouring the oil from her  
flask until they were all full.

When all the vessels were  
full, the oil stopped flowing.

This gave her and her sons  
enough to sell to pay off her  
debts and for them to live off  
the rest.

The widow entrusted all  
she had to God and He  
provided for her family  
all that they needed.

The burning question on everyone's mind:

Whats next for WAKE?

Should we build a house?  
or stay where we are now?

Before we build a house,  
we must first fill  
this house, which requires  
a heart for the house.

We started this church with  
30 people, who met in a house.

If 30 people can fill 400  
seats, what could  
400 people do?

The empty seats in this high  
school auditorium are the  
empty vessels waiting to be  
filled to overflowing.

Where you put your  
resources reflects  
where your heart is. 

All of the things we have will fade away.

You will always live on a  
limited source until you  
trust the Unlimited Source.

Don't confuse this with prosperity gospel. ↗

Consider the lilies of the field.  
There is not a king dressed  
with more splendour than them.  
Does He not care more for you?

O, the things God could do  
with a group of people  
who are willing to  
STEP UP and  
serve to fill  
the HOUSE.
