

# The Covid 19 Injections- A Gateway to Transhumanism?

DR. CARRIE MADEJ

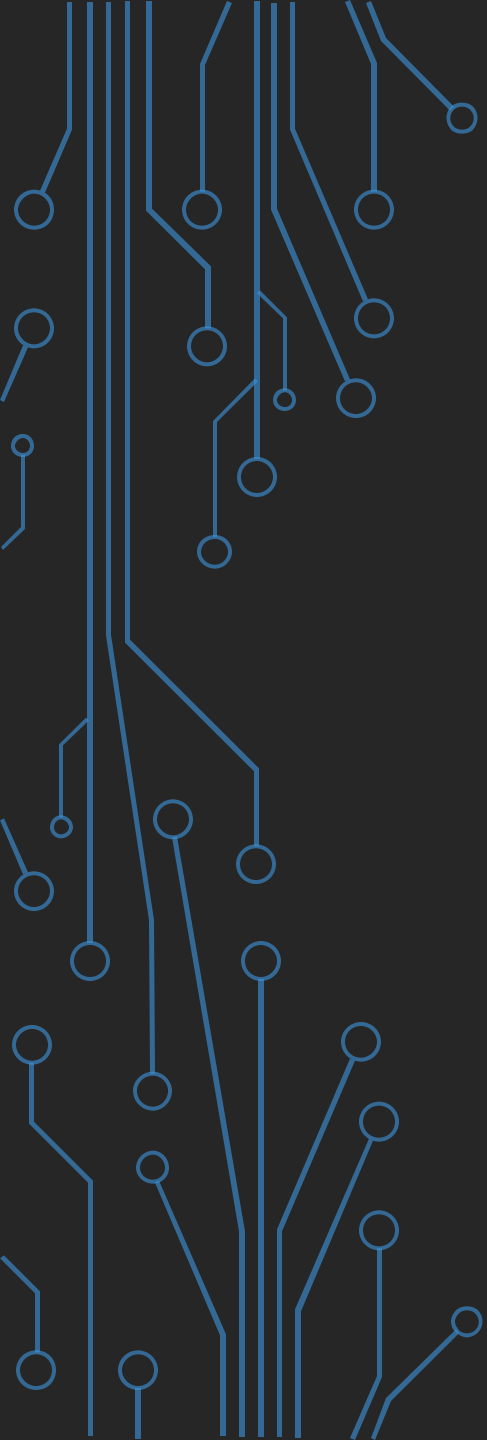

INTERNAL MEDICINE

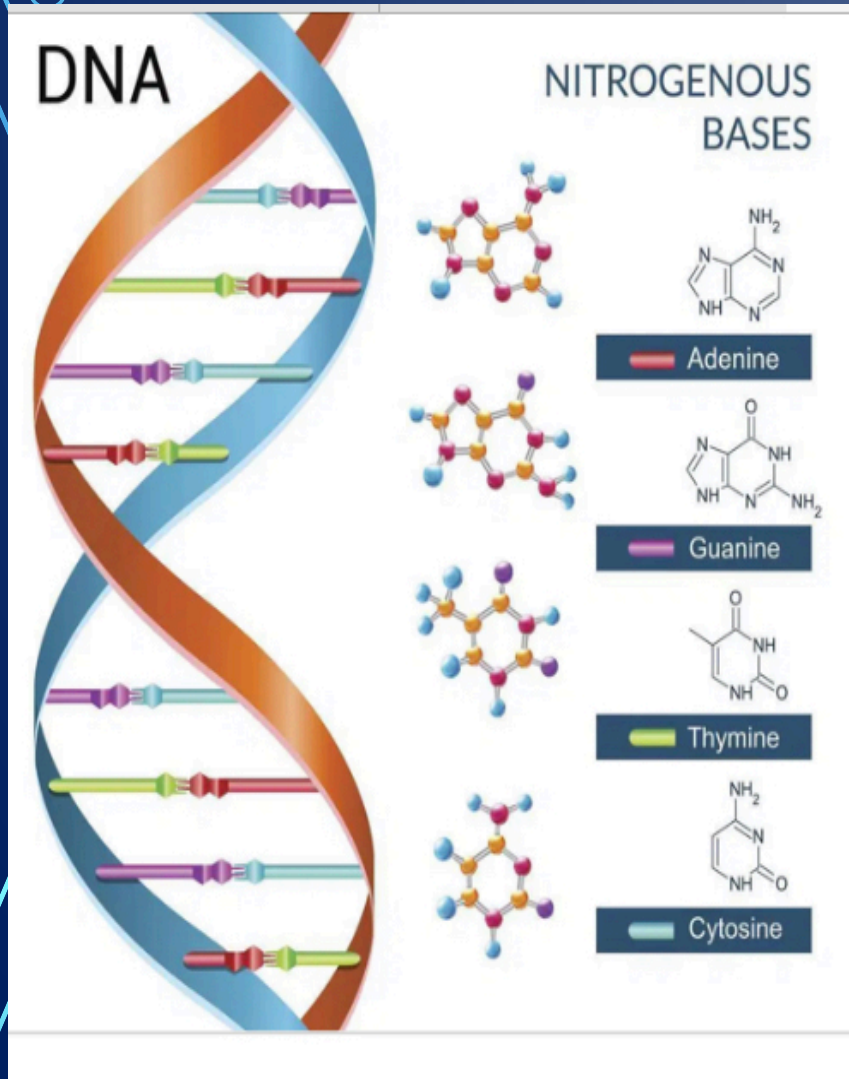

And ye shall  
know the truth,

and the truth  
shall make you free.

WHAT DOES IT  
MEAN TO BE  
HUMAN?

- Our genome is comprised of DNA-deoxyribonucleic acid
- It separates us from all other organisms on the planet
- Is the blueprint for life
- Uncoiled stretches over 10 billion miles
- One protein insertion, deletion, or translocation can have immense affects
- DNA is transcribed into RNA which then translates the proteins needed in the body
- 135,000 terabytes in one human genome

# OUR GENOME IS A CODE, A LANGUAGE

- One mutation can lead to a different meaning or a different effect
- The boy is mad
- The boy is sad

## Summary: DNA vs. Computer vs. Morse Code

DNA	Computer	Morse Code
Chromosome	Floppy Disk	Coded Message
Gene	File	Sentence
Codon (3 bases)	Byte (8 bit character)	Letter
Base (A,T,C or G)	Bit (0 or 1)	Dash or Dot
Mutation	Corrupted File	Altered Dash-Dot
Virus <sup>1</sup>	Virus <sup>2</sup>	Garbled Message

## "They live different kinds of lives outside of the city"

My biggest concern is all the people who do not live in our city. Those we lost on the way. Those who decided that it became too much, all this technology. Those who felt obsolete and useless when robots and AI took over big parts of our jobs. Those who got upset with the political system and turned against it. They live different kind of lives outside of the city. Some have formed little self-supplying communities. Others just stayed in the empty and abandoned houses in small 19th century villages.

Once in awhile I get annoyed about the fact that I have no real privacy. No where I can go and not be registered. I know that, somewhere, everything I do, think and dream of is recorded. I just hope that nobody will use it against me.

## Battelle-Led Team Wins DARPA Award to Develop Injectable, Bi-Directional Brain Computer Interface

May 20, 2019 02:39 PM Eastern Daylight Time

COLUMBUS, Ohio--(BUSINESS WIRE)--Battelle has for years successfully demonstrated brain-computer interface (BCI) projects—just look at [NeuroLife®](#), which has enabled a quadriplegic man to move his hand again using his thoughts. Now, the government’s forward-thinking [Defense Advanced Research Projects Agency](#) (DARPA) has awarded a contract to a Battelle-led team that pushes researchers into the realm of what was once considered science fiction.

“With BrainSTORMS, we will again be pushing the limits engineering and physics. If successful, this technology would not only provide a safe and efficient way to facilitate human machine interactions, but also has the potential to

Battelle’s N<sup>3</sup> concept for a minimally invasive neural interface system, called BrainSTORMS (Brain System to Transmit Or Receive Magnetolectric Signals), involves the development of a novel nanotransducer that could be temporarily introduced into the body via injection and then directed to a specific area of the brain to help complete a task through communication with a helmet-based transceiver. Upon completion, the nanotransducer will be magnetically guided out of the brain and into the bloodstream to be processed out of the body.

# AI and Nanotechnology Team Up to bring Humans to the brink of IMMORTALITY, top scientist claims

Posted by Nanoneophyte

2 years ago

genesisnanotech.wordpress.com

***IMMORTAL: Human beings could soon live forever***

**HUMAN beings becoming immortal is a step closer following the launch of a new start-up.**

Dr Ian Pearson has previously said people will have the ability to “not die” by 2050 – just over 30 years from now.

Two of the methods he said humans might use were “body part renewal” and linking bodies with machines so that people are living their lives through an android.

But after Dr Pearson’s predictions, immortality may now be a step nearer following the launch of a new start-up.

Human is hoping to make the immortality dream a reality with an ambitious plan.

Josh Bocanegra, the CEO of the company, said he is hoping to use Artificial Intelligence technology to create its own human being in the next three decades.

**He said: “We’re using artificial intelligence and nanotechnology** to store data of conversational styles, behavioural patterns, thought processes and information about how your body functions from the inside-out.

HOW DOES  
TRANSHUMANISM  
APPLY TO THE  
CURRENT COVID 19  
COVID INJECTIONS?

# THIS IS NOT A VACCINE – IT IS A BRAND NEW TECHNOLOGY ON THE HUMAN RACE

- Old vaccines use the actual organism (dead or alive) plus adjuvants and preservatives
- All COVID 19 vaccines are using the code of the spike protein of the virus
- Not one FOIA has produced an actual specimen of the virus – it does not exist. We only have the genetic code.
- It is a recombinant code with gene synthesis

# GENETIC CODE OF VACCINE IS RECOMBINANT DNA AND GENE SYNTHESIS

# WHAT IS IN THE CODE? CHROMOSOME 8

The sequence "CTCCCTTTGTTGTGTTGT" is an 18-character primer sequence found in the WHO coronavirus PCR testing protocol document. The primer sequences are what get amplified by the PCR process in order to be detected and designated a "positive" test result. It just so happens this *exact same* 18-character sequence, verbatim, is also found on Homo sapiens chromosome 8! As far as I can tell, this means that the WHO test kits should find a positive result in all humans. Can anyone explain this otherwise?

I really cannot overstate the significance of this finding. At minimum, it should have a notable impact on test results.

Another related concern is that the Pfizer vaccine uses a unique  
RNA nucleoside 1-methyl-3'-pseudouridylyl ( $\Psi$ ). According to  
FDA briefing documents, this nucleoside was chosen to reduce  
activation of the innate immune system [12]. RNA molecules  
containing this nucleoside will undoubtedly have altered binding  
[13]. Unfortunately, the effect on TDP-43, FUS and other RNA  
binding proteins is not published. The use of this nucleoside in  
a vaccine can potentially enhance the binding affinity of RNA  
sequences capable of causing TDP-43 and FUS to assume toxic  
configurations.

## **SARS-CoV-2 RNA reverse-transcribed and integrated into the human genome**

Liguo Zhang, Alexsia Richards, Andrew Khalil, Emile Wogram, Haiting Ma, Richard A. Young, Rudolf Jaenisch

**doi:** <https://doi.org/10.1101/2020.12.12.422516>

This article is a preprint and has not been certified by peer review [what does this mean?].

# MODERNA AND PFIZER

- Use modified (synthetic) messenger RNA that delivers the spike protein code into the body via injection.
- The body will destroy a synthetic code immediately so these companies utilize nanolipid particles to envelope the code.
- The body is “tricked” into making the spike protein of the virus – this process is called transfection.
- Transfection can be a temporary or permanent change in the genetic code.
- Unknown duration of production of the virus
- Utilizing nanolipids/hydrogel/nanotechnology large scale is brand new on the human race

# ASTRA ZENECA AND JOHNSON & JOHNSON

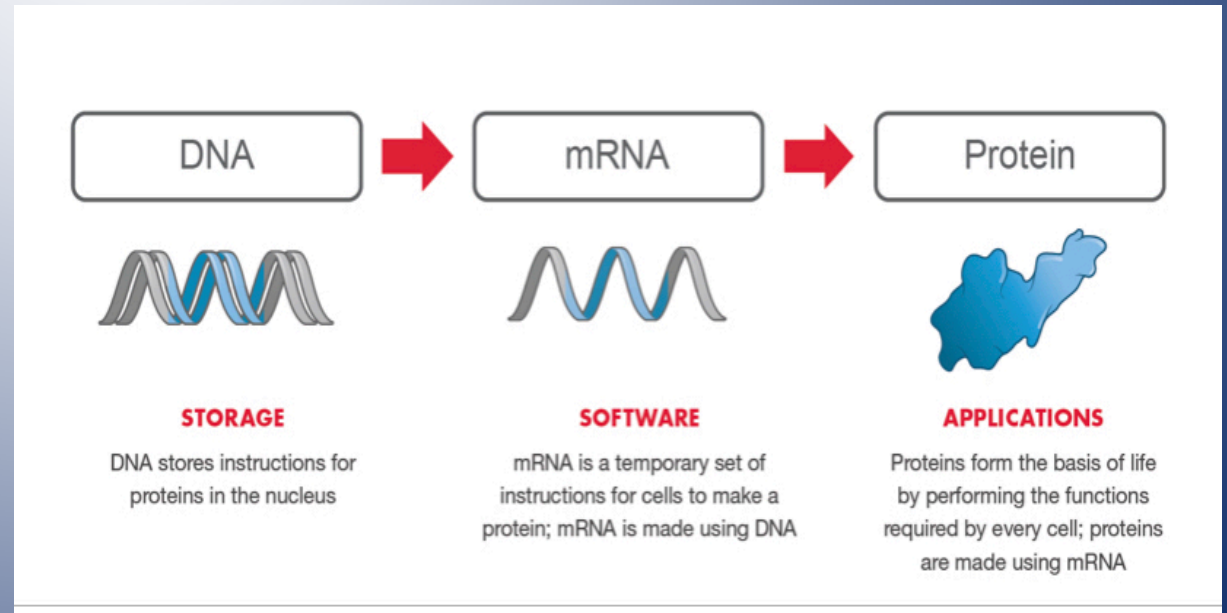

- Utilize an adenovirus vector to carry the genetic code of the spike protein of the virus into the cell
- AZ utilizes a chimpanzee vector known to increase the incidence of HIV in previous trials
- J&J utilizes a human adenovirus
- Both developed with aborted fetal cells – more potential for genetic exchange
- No known nanotechnology
- Carry a DNA code instead of mRNA code- this has a much higher probability of incorporating into the genome.

# MODERNA'S OPERATING SYSTEM

## Our Operating System

Recognizing the broad potential of mRNA science, we set out to create an mRNA technology platform that functions very much like an operating system on a computer. It is designed so that it can plug and play interchangeably with different programs. In our case, the "program" or "app" is our mRNA drug - the unique mRNA sequence that codes for a protein.

We have a dedicated team of several hundred scientists and engineers solely focused on advancing Moderna's platform technology. They are organized around key disciplines and work in an integrated fashion to advance knowledge surrounding mRNA science and solve for challenges that are unique to mRNA drug development. Some of these disciplines include mRNA biology, chemistry, formulation & delivery, bioinformatics and protein engineering.

# New Hydrogel Can Cool Down Electronic Devices and Convert Waste Heat Into Electricity

Using electronic devices for too long can cause them to overheat, which might slow them down, damage their components or even make them explode or catch fire. Now, researchers reporting in ACS' Nano Letters have developed a hydrogel that can both cool down electronics, such as cell phone batteries, and convert their waste heat into electricity. The thin polymer-based hydrogel film can be strapped to batteries to convert heat to electricity. It works by transferring electrons when heated to generate power.

## Advanced CLARITY Method Offers Faster, Better Views of Entire Brain

CLARITY uses a chemical process to transform intact biological tissue into a hybrid of tissue and hydrogel, a transparent material that keeps three-dimensional tissue structure intact during preservation. This process enables detailed exploration and analysis of the fine biological and molecular structure of the entire brain. The new protocol still involves hydrogel formation but improves upon the approach by reducing the risk of damaging the preserved brain tissue, which is especially important when working with irreplaceable human brain samples.

The Profusa Lumee sensor system consists of a special hydrogel and an emitting device. Together the two can detect and transmit data on subtle changes in the body, including, potentially, infection from diseases and viruses like coronavirus. PROFUSA

#### SCIENCE & TECH

## A Military-Funded Biosensor Could Be the Future of Pandemic Detection

If it wins FDA approval next year, the two-part sensor could help spot new infections weeks before symptoms begin to show.

PATRICK TUCKER | MARCH 3, 2020

BIOWARFARE

TECHNOLOGY

Why are pandemics so hard to stop? Often it's because the disease moves faster than people can be tested for it. The Defense Department is helping to fund a new study to determine whether an under-the-skin biosensor can help trackers keep up — by detecting flu-like infections even before their symptoms begin to show. Its maker, Profusa, says the sensor is on track to try for FDA approval by early next year.

The sensor has two parts. One is a 3mm string of hydrogel, a material whose network of polymer chains is used in some contact lenses and other implants. Inserted under the skin with a syringe, the string includes a specially engineered molecule that sends a fluorescent signal outside of the body when the body begins to fight an infection. The other part is an electronic component attached to the skin. It sends light through the skin, detects the fluorescent signal and generates another signal that the wearer can send to a doctor, website, etc. It's like a blood lab on the skin that can pick up the body's response to illness before the presence of other symptoms, like coughing.

## Hydra 2.0 Genome Project Portal

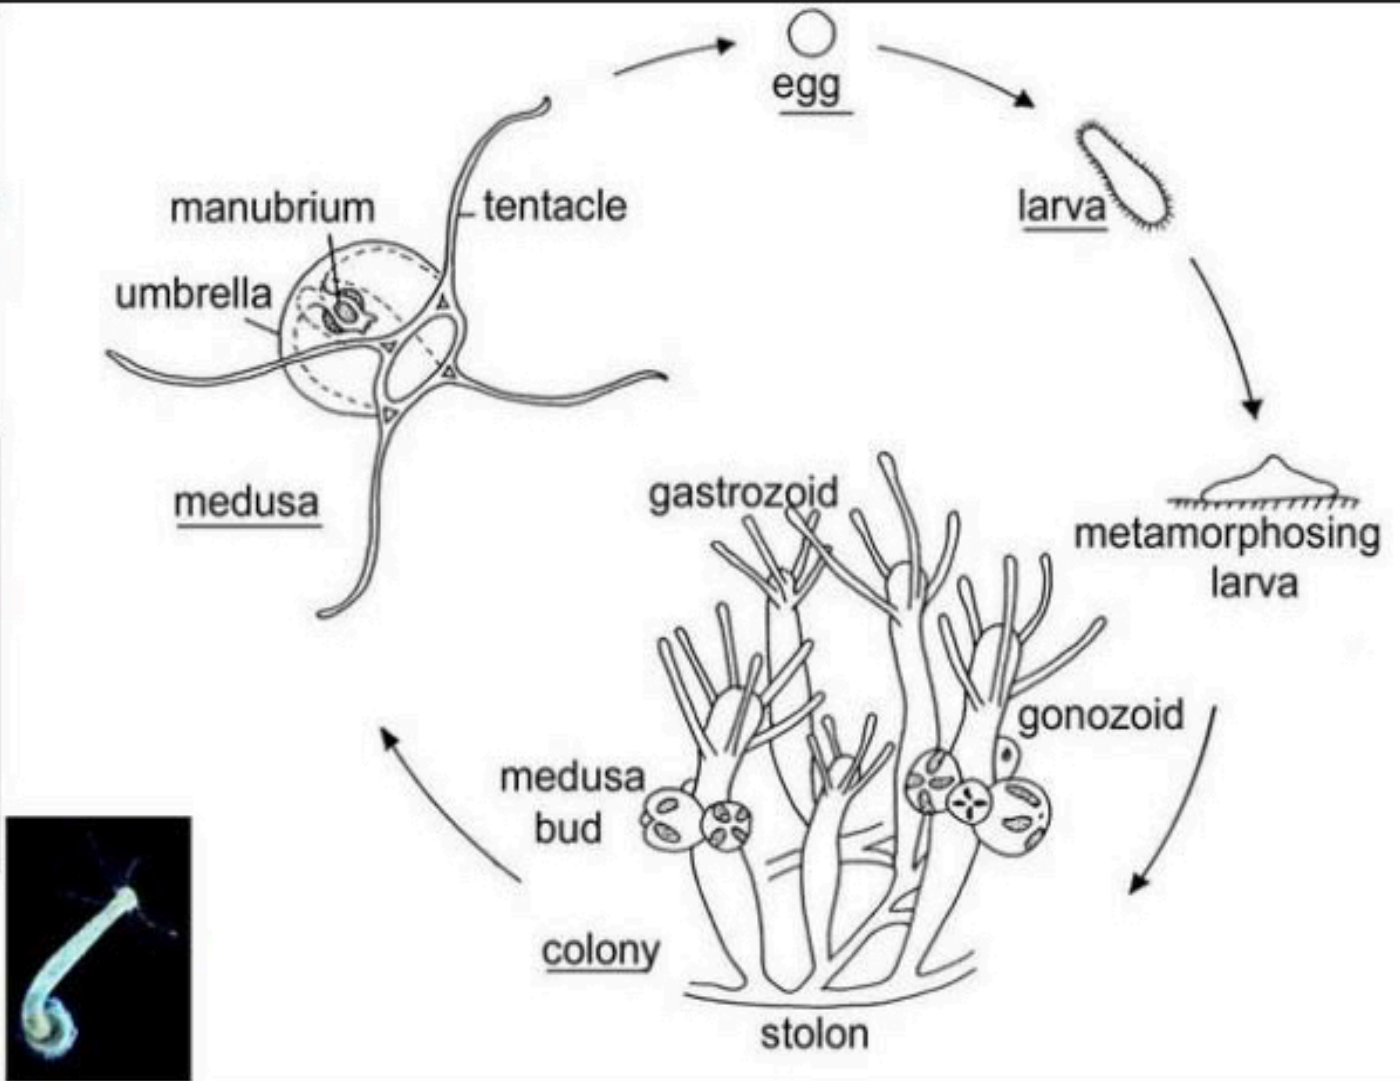

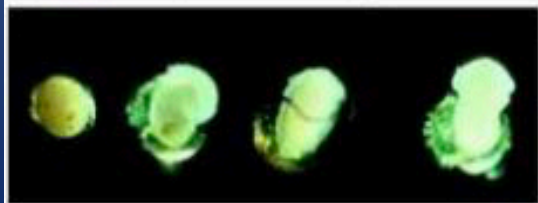

*Hydra*, a hydrozoan cnidarian that takes its name from the eponymous creature in Greek mythology due to its remarkable capacity for regeneration, can be thought of as one of the very first 'model organisms', with its unique properties first described and studied by Anton van Leeuwenhoek and Abraham Tremblay in the early 1700s.

*Hydra* has a morphologically simple body plan – a thin tubular and radially symmetrical body whose body wall is comprised of two layers of cells (the endoderm and ectoderm). The free end of the organism is characterized by a ring of tentacles that contain cnidocytes, the specialized stinging cells used to paralyze capture prey that are a common characteristic of all cnidarian species. *Hydra* possesses a basal disk at the opposite end of its body, with the basal disk secreting an adhesive fluid that allows it to secure itself to surfaces. While *Hydra* does not possess a brain, it does possess a nerve net that confers the ability to sense and respond to environmental stimuli and, while normally sessile, *Hydra* are capable of locomotion by creeping, as well as through distinctive looping and somersaulting maneuvers. *Hydra* is also capable of morphallaxis, a remarkable regenerative process where, after sustaining an injury, the organism is able to essentially reorganize its body, producing a smaller yet complete version of itself.

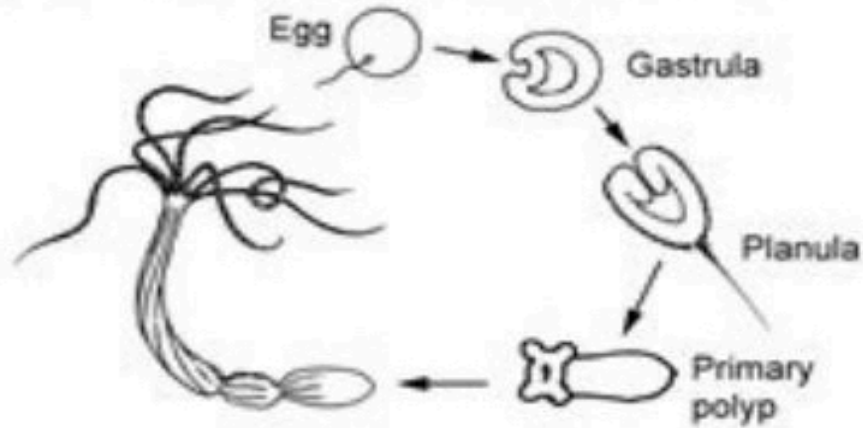

*Hydra* continues to be a very valuable experimental model for the study of numerous biological processes, including regeneration, senescence, axial patterning, cell signaling, and development. These types of studies have been greatly facilitated by the original sequencing of the genome of *Hydra vulgaris* (formerly *Hydra magnipapillata*) in 2010<sup>1</sup> and its re-sequencing using novel long-range sequencing approaches in 2015. The *Hydra* Genome Project Portal is intended to facilitate access to and use of the immense amount of large-scale sequencing data generated by both of these sequencing efforts, as well as independent transcriptomic efforts, through an intuitive and easy-to-use interface. The scope of data available through this portal goes well-beyond the sequence data available through GenBank, providing additional biological information intended to increase the utility of these sequencing data. A customized, interactive genome browser is also provided to facilitate data visualization and biological discovery. It is hoped that the availability of these data will allow investigators to advance their own research projects aimed

# RISKS VS BENEFITS?

# BENEFITS OF THE COVID 19 “VACCINES” GENE MODIFICATION INJECTION

- These experimental vaccines/gene modification injections have minimal benefits— prevention of one positive PCR test and prevention of one of one symptom for approximately 2months. Therefore, partial immunity for 2 months

- **RISKS** OF NOVEL COVID 19 “VACCINES”/ GENE MODIFICATION INJECTIONS

- The risks are innumerable at this point since no study will be completed until the end of 2022.
  - The death rate for 2020 was comparable to the previous 5 years; therefore no justification for a pandemic
- 
- 

# **RISKS** OF THE NOVEL COVID 19 “VACCINES”/GENE MODIFICATION INJECTIONS

- Autoimmune disorders
- Cancers and mutations
- Infertility
- Disruption of immune system with no known stop
- Potential of human ownership if these synthetic genes become permanent in the body

# RISKS OF THE NOVEL COVID 19 “VACCINES”/ GENE MODIFICATION INJECTIONS

- HIV 1 subunits – concern for longterm implications
- Previous animal studies showed Antibody Dependent Enhancement (ADE) /cytokine storm when they were exposed to the virus post vaccine.
- Similarities in human proteins and code in vaccine indicate high likelihood of autoimmune issues /pathogenic priming
- 10-15 years are necessary to prove safety and efficacy – these were developed in less than one year
- Nanotechnology can be utilized in innumerable ways in the body – no large long term studies done to prove efficacy and safety – potential to abuse this technology

# RISKS OF NANOTECHNOLOGY

- Nanotechnology has the potential to be on demand drug delivery systems... ON DEMAND
- Nanotechnology can be used as biosensors in the body- constant surveillance, loss of privacy, loss of autonomy
- Nanotechnology can be used as predictive policing
- Nanotechnology can be utilized in creating human cyborgs
- Rejection /allergy to nanotechnology (anaphylactic shock/seizures/paralysis etc)

- 
- The background is a dark blue gradient. In the corners, there are decorative white line-art patterns resembling circuit boards or neural networks, with lines connecting to small circles.
- WHAT CAN WE DO?

WHAT IS THE  
ALTERNATIVE TO  
HUMAN 2.0?

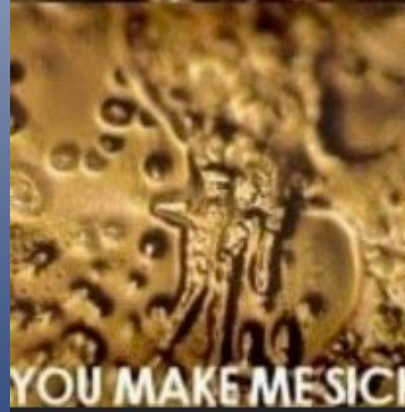

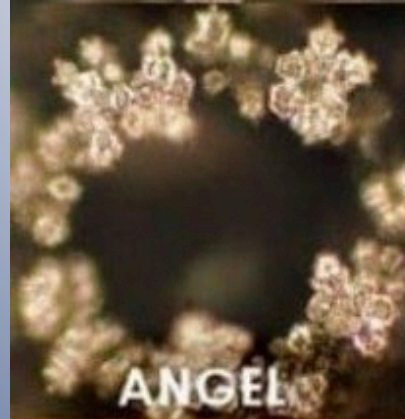

# STAND UP FOR OUR HUMAN RIGHTS

- Connect with God – this is a spiritual battle
- Pray, Worship, Dance, Sing, Hug, Kiss,
- Take your children out of public schools/start community schools
- Educate others about these topics
- Start/attend neighborhood groups/live with your tribe
- Do Not Comply to draconian measures
- Look up Constitutional Law/ PMA
- Start underground medical hubs/other apprenticeships
- Oppose 5G
- Research more about these injections /

# Words and intention have power

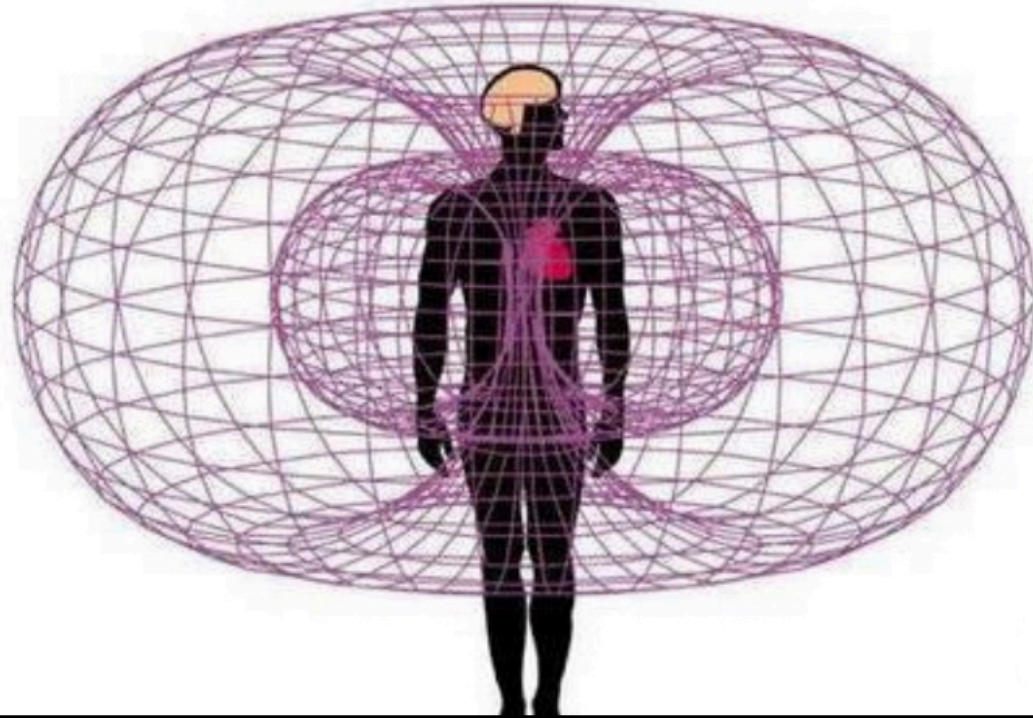

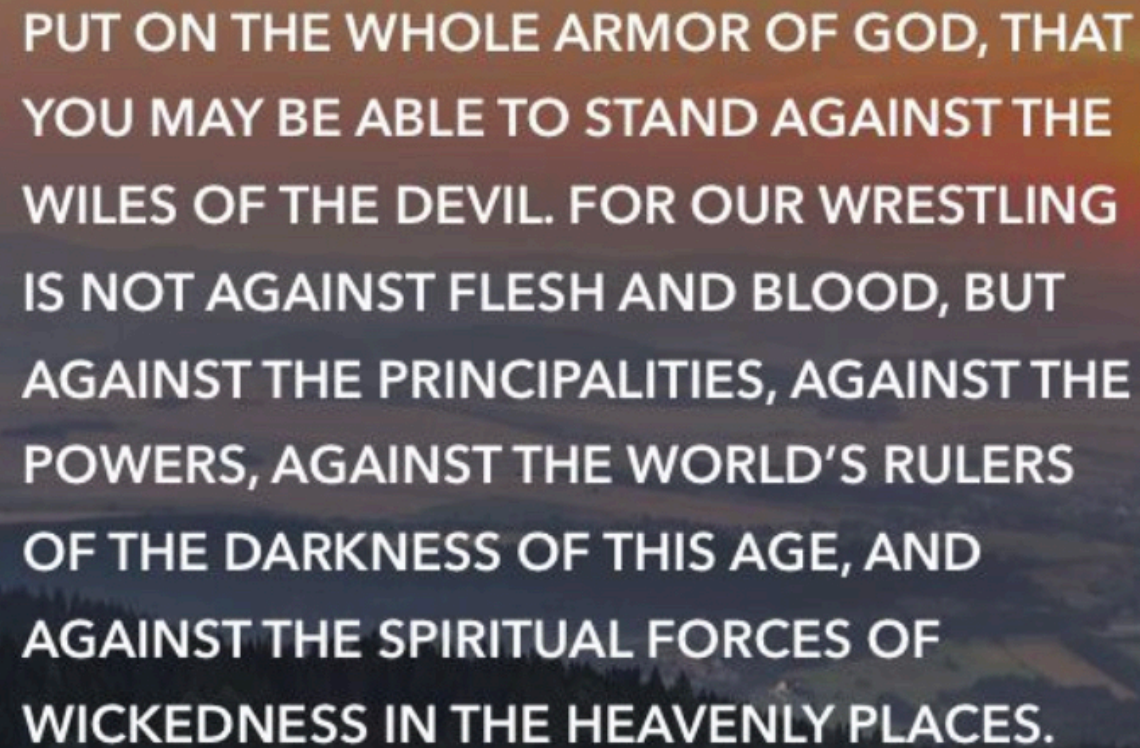

**We are  
powerful  
beings**

**The Heart is more powerful than the Brain**

The Heart is about 100,000 times stronger electrically & up to 5,000 times stronger magnetically than the brain.

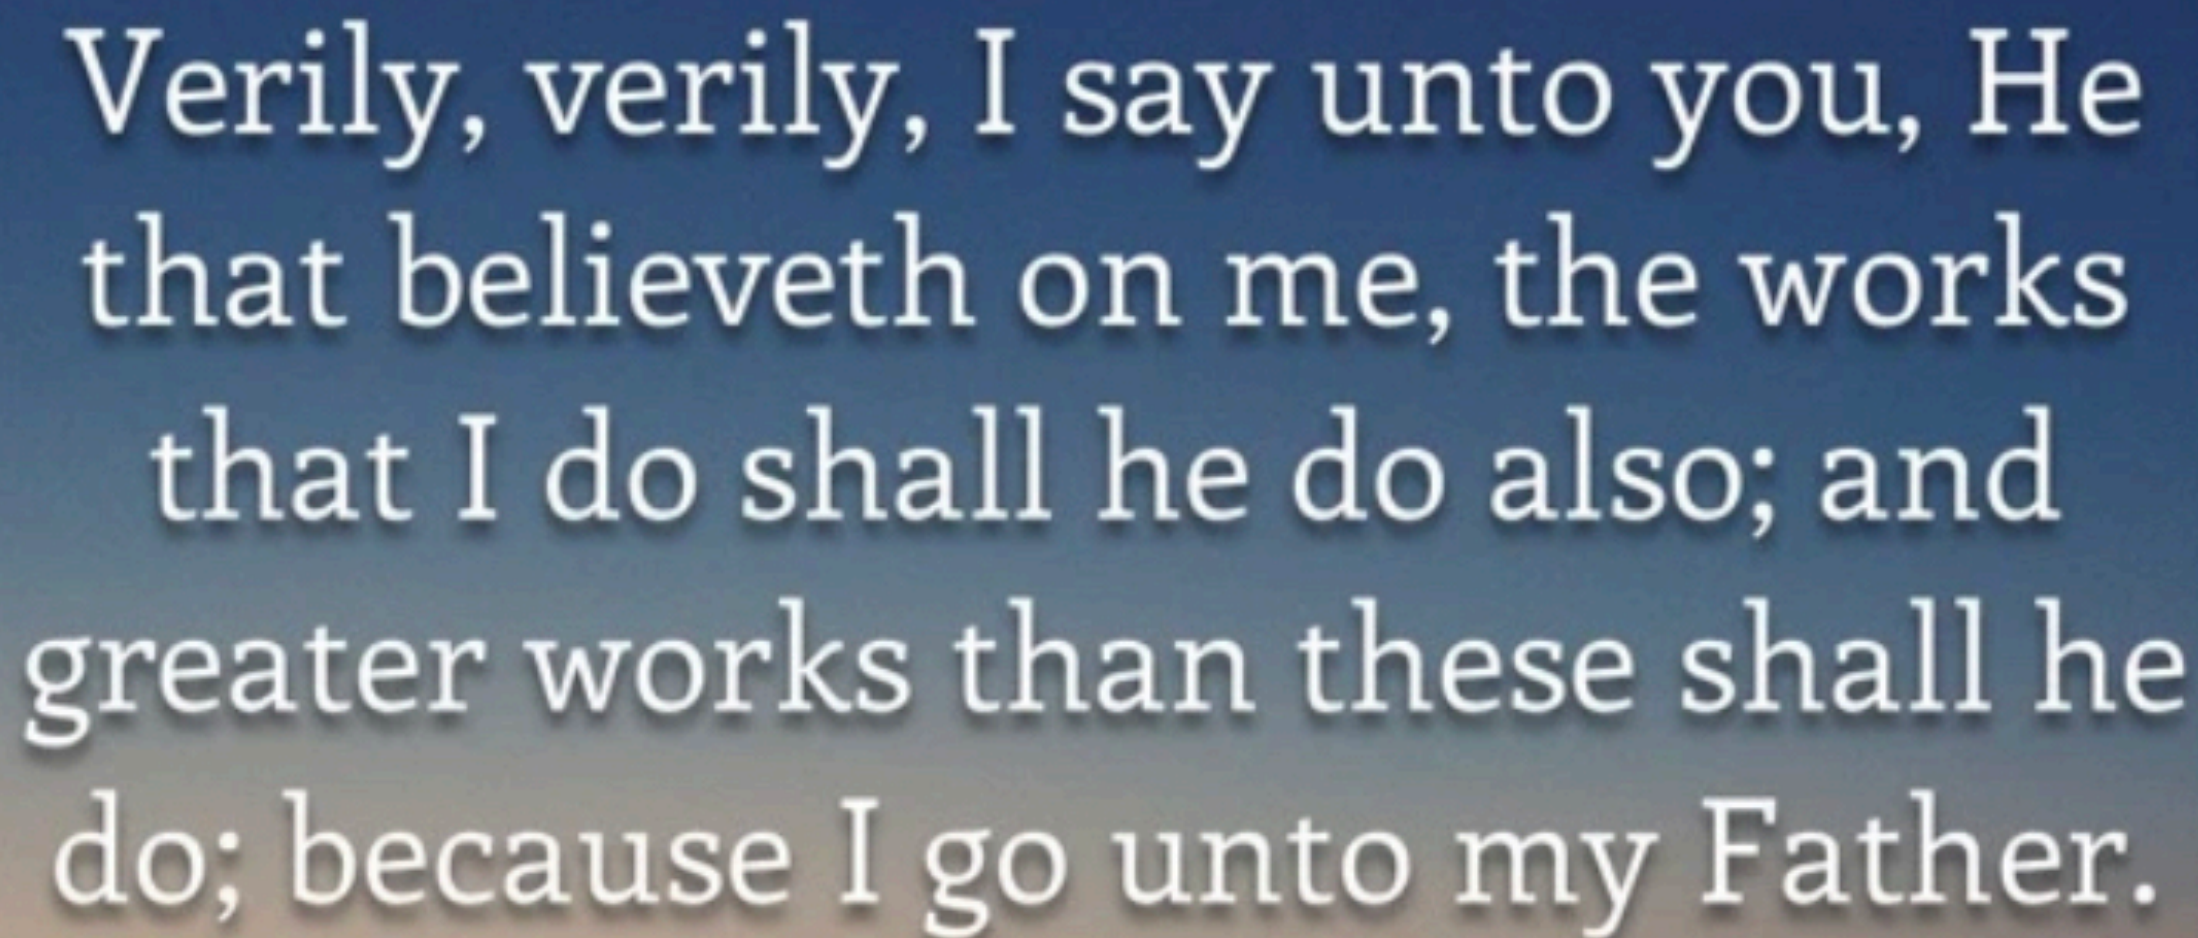

A scenic landscape featuring a sunset or sunrise over a forested valley. The sky is a mix of orange, red, and blue, with a bright sun partially obscured by clouds. The foreground shows a dense forest of evergreen trees, and the middle ground shows rolling hills and valleys covered in more trees. The overall atmosphere is peaceful and majestic.

PUT ON THE WHOLE ARMOR OF GOD, THAT  
YOU MAY BE ABLE TO STAND AGAINST THE  
WILES OF THE DEVIL. FOR OUR WRESTLING  
IS NOT AGAINST FLESH AND BLOOD, BUT  
AGAINST THE PRINCIPALITIES, AGAINST THE  
POWERS, AGAINST THE WORLD'S RULERS  
OF THE DARKNESS OF THIS AGE, AND  
AGAINST THE SPIRITUAL FORCES OF  
WICKEDNESS IN THE HEAVENLY PLACES.

EPHESIANS 6:11-12

Verily, verily, I say unto you, He  
that believeth on me, the works  
that I do shall he do also; and  
greater works than these shall he  
do; because I go unto my Father.

John 14:12 KJV
