

Salvete!

I hope your Spring Break was relaxing, and you and your family all got some good quality time together. Moving forward to this week, we have already hit the ground running. This week we will learn about the schwa sound. The schwa sound says /uh/ or /ih/ in an unaccented closed syllable by replacing an /o/ or an /a/. For example, in the word Texas the accented syllable comes first, and in the second syllable the /a/ changes to the /ih/ sound so we would say -Tex-ihs. We will finish up some paragraphs we began before Spring Break, along with our lesson 16 in math where we are learning about thousands and place value notation. I look forward to these last few weeks with you all!
