

Logic School Weekly Newsletter
Mr. Kemnitz
December 2nd, 2023

Greetings!

This week, in 7th & 8th grade Latin, the students will be wrapping up chapter 8. There will be a vocabulary quiz on Tuesday, followed by a test on Thursday.

In 6th grade Latin the students will conclude chapter 6 this coming week with a vocabulary quiz on Wednesday and a test on Friday.

In science, the 7th graders are working their way through chapter four, learning about energy and forces that affect change. They will use this knowledge to construct and measure an Energy Transformation vehicle. Look for a test in the next week or so. Update to follow.

In 8th grade science, the students are halfway through chapter 5, learning about Newton's Three Laws of Motion. Upon conclusion of this chapter, the 8th graders will get the opportunity to turn their knowledge into a practical use by constructing and launching water-bottle rockets! Look for an update on that.

In 6th grade science, the students will finish up chapter 4 next week, with a test the following week. Next Friday, the students will perform a lab where they will attempt to separate a mixture and a solution into the component parts.

The school fundraiser is moving along nicely! We have already raised over 30K! If the fundraiser can reach 50K by March, the students will have a day off from school! (Me, too!) 😊 If you would like to donate, the link is below.
