NIH-FUNDED MAD SCIENTISTS HAVE CREATED A HUMANOID ROBOT CONTROLLED BY LIVING HUMAN BRAIN TISSUE

- They grew HUMAN BRAIN ORGANOIDs from embryonic stem cells and connected them to a humanoid robot, allowing living neurons to process information and guide its movements.
- The human brain cells helped the robot CHASE LASERS, GRASP OBJECTS, and LEARN from repeated tasks.
- The living neural networks adapted and reorganized their activity during training, with task accuracy increasing from 72% to 94%.
- When they chemically inhibited the neurons, the robot's decision-making performance COLLAPSED.
- This is at Cortical Labs (CL1 “wetware”, Melbourne and Singapore THAT WE KNOW OF.

Does the fact that this is all know, cause you to think that there are no more facilities doing this?

They are living, they are human cells. What does it take to make a soul? Is there consciousness in what they are really doing at the black sites?

Can you see how tech is outpacing our ability to keep up with it?

significant increase in chatter regarding an a.i. generated attack on the system

October 15 - G7 nations agree to launch simulated AI-powered cyberattacks on financial systems to test their defenses.

Remember in 2019 when the same people held a ‘covid’ simulation? what happened after that?

Do you remember David Rogers Webb’s “The Great Taking”?

What was it about?

- Endgame of the global debt supercycle: planned seizure of all collateral.
- Securities dematerialized — you no longer own stocks/bonds as property, only weak “security entitlements.”
- Assets pooled and unsegregated; intermediaries and nominees hold legal control.
- In any major failure, secured creditors (biggest banks) take priority over ordinary investors, pensions, and depositors.
- Derivatives market and central clearing houses built to concentrate risk and sweep the underlying collateral upward.
- Legal changes (UCC and global equivalents) quietly made this possible over decades.
- Trigger: collapse of the Everything Bubble into deep deflation — debt becomes the weapon that takes real assets.
- Scope: stocks, bonds, bank deposits, corporate property, and anything financed with debt.
- Controlled by the private owners of the central-bank system.

Seems strange the effect of a collapse would be caused by an a.i. cyberattack on the system.

Worship

Ex 20:20 Moses said to the people, "Do not be afraid; for God has come in order to test you, and in order that the fear of Him may remain with you, so that you may not sin."

- Same word ‘fear’ used twice. Don’t fear... so his fear remains with you.
- Why would he say don’t fear, so His fear remains with you?

Adam Clarke writes:

do not fear with such a fear as brings consternation into the soul, and produces nothing but terror and confusion; but fear with that fear which reverence and filial affection inspire, that ye sin not - that, through the love and reverence ye feel to your Maker and Sovereign, ye may abstain from every appearance of evil, lest you should forfeit that love which is to you better than life. He who fears in the first sense can neither love nor obey; he who fears not in the latter sense is sure to fall under the first temptation that may occur. Blessed is the man who thus feareth always.

The fear of the Lord is clean enduring forever – this is worship. Fear is a metonym for worship. It's like saying The white house responded to allegations over corruption.

- Did the white colored house in DC literally start talking?

The pen is mightier than the sword.

- So you're going to enter into mortal combat against an armed samurai with a pen?

Proverbs 1:7 (NASB) The fear of the LORD is the beginning of knowledge; Fools despise wisdom and instruction.

Job 28:28 (NASB) "And to man He said, 'Behold, the fear of the Lord, that is wisdom; And to depart from evil is understanding.'"

Isaiah 11:2 (NASB) The Spirit of the LORD will rest on Him, The spirit of wisdom and understanding, The spirit of counsel and strength, The spirit of knowledge and the fear of the LORD.

Albert Barnes says

Hence, by metonymy, it means the precepts of piety or religion. It is used evidently in this sense here, as referring to revelation, or to revealed truth, in the sense that it promotes proper reverence for God, or secures a proper regard for his name and worship.

God's word is the manual for worship. How else would you know how to worship?

John 4: 23 "But an hour is coming, and now is, when the true worshipers will worship the Father in spirit and truth; for such people the Father seeks to be His worshipers.

Anything outside of spirit and truth is strange fire.

Lev 10: ¹ Now Nadab and Abihu, the sons of Aaron, took their respective firepans, and after putting fire in them, placed incense on it and offered strange fire before the LORD, which He had not commanded them. ² And fire came out from the presence of the LORD and consumed them, and they died before the LORD.

What are modern examples of strange fire?

- ~~Immorality~~ in the worship music industry:
 - Hillsong church NYC
 - Gateway Worship, 2024
 - Bethel Music 2019
- ~~Celebrity worship culture~~ — Elevating gospel artists, pastors, or worship leaders to celebrity status, giving them unquestioned loyalty that belongs to God alone
- Manipulative worship experiences — Using emotional pressure, staged manifestations, or manufactured atmospheres to make people believe they have encountered the Holy Spirit.
- Financial exploitation in God's name — Promising miracles or divine blessings in exchange for money, manipulating vulnerable believers through fear, or treating ministry as a business for personal enrichment.
- Concealing sin in the church because of status, organizational instability or spiritual giftings (they're gifted...)
- Dishonesty – Michael Guglielmucci's song, "Healer"
- ~~Prosperity~~ teaching / absent of true repentance
- Worship Inc as entertainment – from the participant's side, wanting to be entertained
