

Read [Genesis 1](#)

**Psalm 19:1-6** “The heavens declare the glory of God, and the sky above proclaims his handiwork. Day to day pours out speech, and night to night reveals knowledge. There is no speech, nor are there words, whose voice is not heard. Their voice goes out through all the earth, and their words to the end of the world. In them he has set a tent for the sun, which comes out like a bridegroom leaving his chamber, and, like a strong man, runs its course with joy. It’s rising is from the end of the heavens, and its circuit to the end of them, and there is nothing hidden from its heat.”

**Romans 1:18-20** “For the wrath of God is revealed from heaven against all ungodliness and unrighteousness of men, who by their unrighteousness suppress the truth. For what can be known about God is plain to them, because God has shown it to them. For his invisible attributes, namely, his eternal power and divine nature, have been clearly perceived, ever since the creation of the world, in the things that have been made. So they are without excuse.”

### **LOOK UP AND WITHIN**

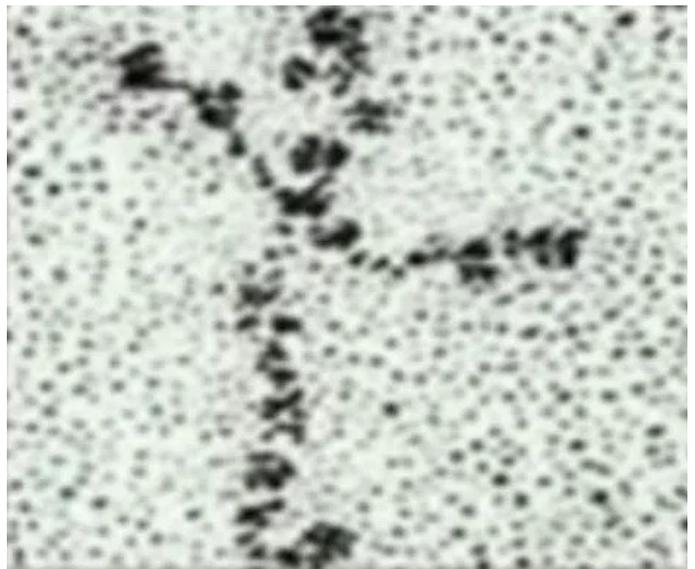

Laminins are a family of glycoproteins of the extracellular matrix of all animals. They are major components of the basal lamina, the protein network foundation for most cells and organs.

Skeptics turned to Snopes regarding Laminin:

- “The structure of laminin antedates by many thousands of years traditional Christian accounts of the life of Jesus. A cross-like shape is a very simple structure that is commonly found in elements created naturally or accidentally. It is uncertain whether the form of the original crucifixion device was a stake, a T-shape, or the familiar cross of modern Christian iconography.

One could find the shape of laminin to be reminiscent of a variety of common symbols aside from the cross. Some viewers say it reminds them more of a caduceus" (medical symbol).

- "And when the illustration is returned to its original orientation, many liken it to the appearance of a sword."
- "Perhaps most important, molecular diagrams like the one used here are generally intended to represent those structures in ways that make them easy for humans to conceptualize and work with, not to be exact reproductions of the molecules' actual visual appearances."
- "In other images of an actual laminin molecule, it looks more like a mermaid than a cross."

"Discussions about whether or not nature evinces signs of a purposeful (Christian) creator are theological/scientific debates that can (and do) fill volumes, so we'll just note a few items to consider:"

1. "The structure of laminin antedates by many thousands of years traditional Christian accounts of the life of Jesus." (They have it backwards 🤔)
2. "A cross-like shape is a very simple structure that is commonly found in elements created naturally or accidentally." (Remember **Romans 1**? - so men are without excuse)
3. "It is uncertain whether the form of the original crucifixion device was a stake, a T-shape, or the familiar cross of modern Christian iconography." (So what?! -it's a cross)

## **GOD SPOKE!**

- **Psalm 33:6-9** "By the word of the Lord the heavens were made, and by the breath of his mouth all their host. He gathers the waters of the sea as a heap; he puts the deeps in storehouses. Let all the earth fear the Lord; let all the inhabitants of the world stand in awe of him! For he spoke, and it came to be; he commanded, and it stood firm."

- 
- Even the rocks will cry out: Jesus replied, “I tell you, . . . if they keep quiet, the stones will cry out” (Luke 19:40). What did Jesus mean by this statement? Did He mean that the rocks would literally start shouting praises to the Lord? Most likely, no. The expression the stones will cry out seems to be proverbial and isn’t to be understood as a literal statement. The meaning seems to be that it is more likely that the impossible would happen than for the King of kings to enter His capital city without honor. Is this just Jesus speaking in parable form? Or, may he be referring to God’s -and thereby His- glory in all thing made by him, even an inanimate rock.
  - The similarities of light and sound: both are a type of frequency and travel in wavelengths. Sound much slower and light much faster. Light has no mass but emits electromagnetic pulse; conversely, sound has no EMP but can push, or carry mass (think loud base).
  - Prepare to have your mind blown: “According to the researchers' equations, sound that carries one watt of power for one second in air -- comparable to that from heavy thunder -- will generate an equivalent of 10 milligrams of gravitational mass. These findings not only suggest that sound has gravitational mass, but that such mass is negative.” ABC news Mar 15, 2019
