

Socialism and the Church

Among 18-29 year olds

42% see capitalism favorably

That's 12% less than those who saw it favorably 2 years ago

51% see socialism favorable

For the millennial, socialism means 'free stuff.'

For those who feel victimized by capitalism, it seems to give them a level playing field.

Socialism really means government ownership and control of all means of production in society. Government will make decisions for everyone when government owns or controls everything. Liberties go by the wayside.

It becomes permissible and preferable to steal from some to give to others. That is what the government has to do to give to all equally

Socialism destroys innovation and all individual offers to make things better. It declares certain people have too much and the only way to even the playing field is to take it from them.

The War on Poverty could have given each poor person \$70,000 a year for as long as it lasted because all of the funds were spent on bureaucracy.

Julie Royes, said the following five things in her op-ed on Socialism

- 1 Socialism is based on a Materialistic world view
- 2 Socialism punishes virtue
3. Socialism endorses stealing.
- 4 Socialism encourages class warfare
5. Socialism seeks to destroy marriage and family.
