

Message Summary May 21:

Light is how we see. And even light itself is still a mystery: is it a wave or particle? It is both! We see things either by the light glowing objects give off or by the light the objects reflect.

Light is a major theme in the Bible. Many verses also talk about the struggle between light and darkness. The answer to darkness is Jesus, the Light of the World. He is our King and He must be obeyed. How to be children of light? We can glow with the light of the Holy Spirit inside us, and by reflecting the light and love of Jesus.

When people look at us, do they see a faint, dim person? Or do they see a brightly glowing person, joyfully blessing others as we have been so blessed?

Some Questions for discussion:

1. Did you know that photons were still mysterious?
2. Have you ever considered the tremendous variety of invisible wavelengths that surround us all the time? Isn't it amazing we can see clearly?
3. Have you thought about your life as being brought out of darkness into the Light?
4. What does it mean to consider yourself as under King Jesus in the Kingdom of light?
5. On a scale from 1 to 10, as a child of light, how brightly do you think you appear to others?
6. What is one thing you could start doing or improving to turn up your brightness?
