I. Defining Wokeness

Wokeness - *“A mindset and posture meaning one is “awake” to the true nature of the world when so many are asleep. Comprehending the inequity of our social order and striving to highlight power structures in society that stem from racial privilege, religious beliefs, cultural norms, morality, and traditional family values.” - Owen Strachan*

Tenant #3 - Intersectionality

This divided all society into two Categories: Oppressors and Victims.

Scott Allen “In the worldview of ideological social justice, authority is conferred, not by wisdom, age, position, or experience—but by victim status. Claims of oppression and victimization based on a

subjective “lived experience” must be believed without question. The more intersectional victim-boxes one can check, the greater the moral authority. The greater the authority, the greater the power.”

Problem #2 - This moves the solution to the government rather than individual responsibility (TV and Screen)
