

# message summary

---

The word cultivate is often used in farming because you need to prepare the soil to plant crops. If we want to experience a harvest, we need to prepare the ground. Our desire is for more people to experience a deeper relationship with Jesus Christ. Cultivating relationships demands dedicated work and intentional effort. People today don't like hard work. We enjoy our comforts and making things convenient and easier. But it is through the hard things in life that God shapes us and molds our character. In this parable of the sower that Jesus explains to his disciples he shows us that each of the four soils represents a condition of the human heart. Let's read **Luke 8:4-15** and discover how God wants you to dig deep spiritual roots and not stay shallow.

# observation

---

- What are the different types of soil mentioned in this parable?

---

---

---

- How does Jesus describe the condition of each soil?

---

---

---

- What happens to the seed in each type of soil?

---

---

---

# interpretation

- What does the seed represent in this parable, and what is the significance of the soil?

---

---

---

- What do each of these soils represent and give an examples of each?

---

---

---

- Which type of soil do you resonate with the most in this parable, and why?

---

---

---
