

Before there was GPS there were maps. Some people love maps, others...not so much. If you were good at reading a map, you could easily navigate from point A to point B with no troubles. But almost all of us who have used a map, at some point found ourselves not where we should be...and needing a Course Correction.

:: Share:

Share a time of being lost somewhere, and how you got back on course.

Read: Exodus 4:18-26

:: Explore and Discuss

Question: Why are course corrections important in our journey with God?

Question: What was the course correction Moses needed to get back on his Journey with God?

Question: What do you find surprising in who actually makes the correction?

:: Apply It to Your Life

Question: Imagine a time in your life when you needed a Godly course correction. Did someone, other than yourself, help you through that correction?

Question: How might God use you to help someone else with a course correction?

:: Pray

Father God, we pray that in the coming weeks and months You correct our course and set our sights on Your will and Your ways. Open our eyes to see the markers You have placed before us, that we may navigate the narrow path to You and Your purpose for GraceWay Church. Amen
