Define Masculinity

8

ChatGPT

Masculinity is a set of qualities, characteristics, behaviors, and roles typically associated with boys and men. These traits can vary across cultures and time periods but often include attributes like strength, assertiveness, independence, and resilience. Masculinity is often contrasted with femininity, which encompasses qualities typically associated with girls and women, such as nurturing, empathy, and sensitivity. It's important to note that these are societal constructs and can vary widely from person to person.

A Man: Physically

"What are little boys made of?
What are little boys made of?
Snips and snails
And puppy-dogs' tails,
That's what little boys are made of."

A Man: Societally

Manliness consists not in bluff, bravado or loneliness. It consists in daring to do the right thing and facing consequences whether it is in matters social, political or other. It consists in deeds not words. – Mahatma Gandhi
