

# Grape Craft

## Materials

- ☐ Grape Picture (next page)
- ☐ Purple and green yarn cut into 20-inch strands
- ☐ Purple, green, or iridescent glitter
- ☐ Liquid glue
- ☐ Scissors
- ☐ Construction paper
- ☐ Crayons or markers

## Instructions

*Print one Grape Picture on card stock for each student. Have students glue their picture onto one piece of construction paper for a framed effect around the edges.*

*Have students color most of the grapes, leaving 3–5 uncolored. Squeeze a thin layer of glue inside one uncolored grape outline at a time. Place the end of the yarn at the edge of the outline and follow the shape round and round, gently pushing the yarn into place with a finger or pencil tip. Continue to the center then cut off excess yarn. Leaves can also be done this way by using the tip of a pencil to help push the yarn into the corners as you go.*

*Option 1: choose a few grapes and/or leaves and squeeze glue over the yarn. Sprinkle with glitter. Allow to dry.*

*Option 2: color all or some of the grapes and leaves then use the yarn to outline them instead of filling the shapes with yarn.*

## Suggested Discussion

The spies that Moses sent into the land of Canaan brought back samples of the fruit of the land. God was offering them land with plenty to eat and places to live. But even though the land was as good as God had promised, the Israelites were afraid. They didn't trust God, and they let their fear cause them to disobey and lose the opportunity to enter the beautiful land God provided.
