Key Talking Points:

- In world news, U.N. aid is knowingly funding terrorists and tyrants.
- Per the gateway pundit, at the urging of the United Nations, aid is being sent to Gaza where it will be received and distributed by Hamas, the authority in Gaza.
- Designated as a foreign terrorist organization (FTO) by the U.S. government in 1997, Hamas imposes taxes on all imports and exports, including aid, which has contributed to Gaza's initial poverty.
- Now, with the humanitarian crisis caused by Hamas's October 7th attack on Israel, the United Nations and the global community are providing funding to Hamas.
- Aid given by sovereign nations comes from taxes; therefore, U.S. taxpayers are now funding Hamas. Under U.S. law, providing material support to designated terrorist organizations is a federal offense.
- President trump has urged that all support for Palestine and Gaza be halted because the money is supporting terrorism, but the un, the Biden administration, and globalists and liberals have criticized him.
- Additionally, the un has refused to designate Hamas as a terrorist organization which is truly despicable.
