### **Key Talking Points:**

- In other medical news, the American College of Pediatricians is calling for an immediate halt to transgender procedures in children.
- The Western Journal reports for conservatives, the number one issue is the lifelong health and safety of the current generation of confused youths — too young to make decisions that they will carry to the grave.
- Whether it is children being exposed to life-altering medical procedures because of ill-advised or ideologically driven adults, or grown men masquerading as women to enter private spaces, the transgender movement is putting kids in harm's way.

- To its disgrace, the mainstream American medical community, including the American Medical Association and the American academy of Pediatrics, have largely supported the agenda of the transgender movement — but that could be changing.
- On Thursday, the American College of Pediatricians — a conservative group of medical professionals founded in 2002 — and other organizations under the umbrella name “Doctors Defending Children” took a public stand against the transgender insanity being forced onto children, firmly calling for all sex-changing procedures on children to come to an immediate halt.

- They stated that the UMC had distanced itself from the holy scriptures and was no longer suitable for the conference stating the UMC prefers to "sacrifice its honor and integrity to honor the LGBTQ community."
- According to UMC news, all of this is a step toward allowing regionalization or allowing global churches to determine their own stance on issues like homosexuality.
- Yet the consequences are severe as this stance is causing a mass exodus from the denomination.

**Article Link:** <https://www2.cbn.com/news/world/who-illegally-rams-through-pandemic-resolution-after-countries-reject-it-critics-cry>

### Key Talking Points:

- In world news, in what some are calling a tyrannical move, the WHO just illegally rammed through a pandemic resolution after many countries rejected it.
- CBN news reports the World Health Organization (WHO) has illegally enacted Revised International Health Regulations (IHR) that would dictate how each nation should respond if another health pandemic occurs, a new report says.
- The Liberty Counsel, a non-profit legal group, has released a report claiming that after the WHO failed to pass its pandemic agreement at the 77th assembly, it then "bypassed protocol" and secretly passed a resolution that would enhance the who's authority and dictate how nation's report, manage, and cooperate in another infectious disease outbreak.

- WHO leaders were unable to reach an agreement for a controversial pandemic-related treaty during the May 27 to June 1 World Health Assembly in Geneva and the assembly ended with plans to finalize a future pandemic agreement.
- Therefore, WHO director-general, Tedros, reportedly claimed there was a "consensus" and illegally enacted the new "legally binding" IHRS without a floor vote contrary to established rules and protocols, according to the liberty counsel.
