

THE GLOBAL COMMONS

PROPHECY UPDATE FROM MARY DANIELSEN
SUNDAY, MARCH 12TH, 2017

Everybody Wants to Rule the World

- Option 1: **Sovereign people**, limited government, rule of law and free nation-states with freely elected officials who answer to the people.
- Option 2: **Sovereign Government**, in which the government collects and distributes benefits, controlling people in various ways to supposedly protect them from one another, convincing their subjects that big government is their only true hope. Very deceptive because they have to make naturally sovereign-born people with God-given free will to think they had a hand in choosing their leaders and laws through voting, but in reality, the sovereign government is really calling all the shots.
