

RAMPING UP TOWARD WORLD WAR

The situation in Ukraine is changing rapidly and not for the better.

- Reports say that Russia has given Ukraine an ultimatum and that Ukraine is refusing to negotiate.
- Hal Turner is reporting that covert intel sources have revealed to other Ukrainian intelligence sources that “Ukraine awaiting new, long-range ammunition for HIMARS Multiple Launch Rocket Systems (MLRS) - and said such ammo is already coming” [HIMARS stands for High Mobility Artillery Rocket System.]
- That “upon receipt of the long range ammo, US donated HIMARS MLRS will be able to strike targets 300km away.”
- “Ukraine will use those HIMARS to attack Crimea.”
- “Russia has previously stated that if US long range weapons are used against ‘Russian territory’ then Russia will declare the US an active combatant, and will take military action.”¹
- [Now, over the centuries, Crimea had traditionally been Russian territory and was only administratively transferred to Ukrainian control when both Russia and Ukraine belonged to the USSR. Ethnically, it is overwhelmingly Russian and voted by well over 90% to rejoin the Russian Federation. Russia gathered Crimea back when the West including American intel and Soros financed operatives supported a revolution and a coup that drove the democratically elected Ukrainian President from power and out of the country. Instead, they installed a Western-leaning kleptocracy that has enriched many US politicians, including the Bidens.]
- It is being reported that US & British military personnel are the ones who are operating and will eventually be firing the rockets using the HIMARS.
- Russia’s Minister of Defense, General Sergei Shoigu, responded to the HIMARS – MLRS threat, saying, **“ON ANY HIMARS THERE IS A POSEIDON. THE US QUICKLY UNDERSTOOD.”** The US understood the message clearly.² “The Poseidon is a Russian nuclear torpedo that can sneak under a Carrier Group and destroy them all.”³
- Zero Hedge is now reporting that Russia has “issued a formal order for Russian troops to target Ukraine’s long-range weapons and artillery supplied by the West, specifically the High Mobility Artillery Rocket System (HIMARS).” Russian commanders were told to “use surgical strikes and crush the enemy’s long-range missile and artillery.” So, if it is true that Americans are manning these systems then Russian military assets would be specifically targeting American troops. That could be the trigger....
- Now, the US considers Crimea to be a part of Ukraine and so Ukraine would be justified in attack Crimea. [This is a recipe for World War III]
- HTR reports that in response to the threat “the Russian Navy began moving several ships OUT of Crimea to their port at Novorossiysk. The Russian Black Sea fleet pulled anchor and left Sevastopol, for the Kuban. Clearly they suspect a missile attack on the port facilities. If this should happen, many observers think there will be war.”⁴
- “Moscow is announcing to its citizens the city will be conducting NUCLEAR ATTACK CIVILIAN EVACUATION DRILLS, complete with Outdoor SIRENS, TV and Radio Interruption Warnings, instructing citizens to proceed to nuclear attack shelters.” The timing of the drills has not been announced.⁵
- The US & the West are prepping too. HTR reports: “B61-12 mini-nuclear bombs "Made in America" for a "nuclear first strike" are coming soon in Italy, Belgium, Germany and the Netherlands.” Sandia

The HIMARS MLRS could set off a World War

Laboratories announced, “The production of the B61-12 atomic bomb has begun.” They are expected to be deployed to Europe almost immediately after completion.⁶

- Should war break out between Russia and an American-led NATO, once the missiles started flying, the advantage would go to Moscow. They are in possession of hypersonic missiles and have used them many times in the conflict in Ukraine. The Chinese are on the verge of fielding such a weapon but the US is years away from deployment. And our defenses against them are “wholly inadequate.”⁷
- A July 14th report in Foreign Policy argued, “The United States does not have the defenses to keep up with Russian and Chinese advances in cruise missile technology according to a new report set for release Thursday by the Center for Strategic and International Studies (CSIS), a Washington think tank.” In addition, the current system of command and control, though staffed by highly dedicated U.S. and Canadian military personnel, employs 1990s-era technology and uses 1960s-era decision processes....Hypersonics can circle the planet at five times the speed of sound, while some models are capable of dodging missile defenses. New variants of Russian and Chinese cruise missiles cover ‘a whole lot of the United States with standoff capability.”
- Highlighting the technology gap, the Foreign Policy article states: “That means that Russia and China possess nuclear-level devastation capability without actually resorting to such weapons. China’s DF-26, for instance, has been dubbed the ‘Guam killer’ because it could destroy much of the U.S. military base there without a nuclear strike.”
- Laser technology would be an answer but the US is not ready to deploy.⁸

Russian hypersonic missile in flight

Those with their eyes open are no longer being fooled. From the beginning this has been a proxy war with America and the West using Ukraine to fight the Russians. This means mega-profits for the military industrial complex and advances the agenda of one camp of the New World Order. Henry Kissinger told FOX NEWS that the US would be at war with Russia by the middle of August. To any sane person with just a scintilla of knowledge of how the world works, that is a VERY FRIGHTENING prospect. One of those who can see where this is going is President Aleksandar Vucic of Serbia. He recently told the media, “We should understand that amid the world war – because all the talks that it is a regional or a local war must be dropped – the entire Western world is fighting against Russia via Ukrainians. It is a global conflict.” He warns that Putin is just about ready to propose terms to America and the West. “I know what awaits us. As soon as Vladimir Putin has done his work in Seversk, Bakhmut and Soledar, after reaching the second line Slaviansk-Kramatorsk-Avdeevka, he will come up with a proposal. And if they [the West] don’t accept it, – and they won’t – all hell will break loose.” HTR headline summarized it well: “**World War 3 is Already happening.**”⁹

That point is being driven home by the fact that America’s enemies are right now planning to pre-position forces in the Western Hemisphere. The anti-American President Maduro of Venezuela is scheduled to host military exercises in the middle of August when “along with 10 other nations, Russia, China and Iran will move their militaries into the Western Hemisphere for war drills that will ‘pre-position forward-deployed military assets in Latin America and the Carriibbean.” The North American Aeospace Defense Command is taking this seriously and conducting their own drills, “its units to confirm capabilities designed to defend the approach to US from simulated cruise missile threats.”¹⁰

And now war talk is coming in on the cheap. “The President of Chechnya, Ramzan Kadyrov says that he and his people are glad to support Russia’s demilitarization of Ukraine. He went on to say they are ‘developing a plan to demilitarize NATO. After the capture of Kiev, next is Poland.’”¹¹ Is Kadyrov a loose political cannon? Perhaps, perhaps not. But we do know that the words of Russia’s Foreign Minister Sergey Lavrov need to be taken seriously. On Wednesday, July 20th, Lavrov gave weight to the words of the Serbian President who predicted Russia would soon come with a new – enhanced proposal. The Russian Foreign Minister announced that “The geographical objectives of the special operation have changed, now it is not only the DPR and LPR, but also a number of other territories.” The ethnically Russian areas of Luhansk and Donetsk is no longer Moscow’s sole goal.

Russian Foreign Minister Sergey Lavrov

Speculation is that Russia’s objective is now all land “east of the Dnieper River . . . meaning the entire eastern half of what is now Ukraine.” Lavrov justified the expanded demand with this explanation. “If the West continues to supply Kiev with longer-range weapons, the geographical objectives of the special operation in Ukraine will move even further than they just have.”¹²

All of this is as serious as can be. There is **NO HUMAN SOLUTION!...BUT GOD!!** He is still on the throne. And His promises still apply. One of those involves the protection of believers. Does that mean that no believers will suffer or die? No, but it does mean that His perfect will, will win out. And we know that God has often extended His protection in miraculous ways. And He will give us the strength to endure. “*He who dwells in the secret place of the Most High Shall abide under the shadow of the Almighty. I will say of the Lord, ‘He is my refuge and my fortress; My God, in Him I will trust....’ You shall not be afraid of the terror by night, Nor of the arrow that flies by day, Nor of the pestilence that walks in darkness, Nor of the destruction that lays waste at noonday.*” (Psalm 91:1-2, 5-6)

And God has given us the formula for the restoration of our Land. It is repentance. Not ceremonial and perfunctory but the ‘Real Deal’ – heartfelt repentance. Not just words – but changing how we live. Here’s what God tells us in 2Chronicles 7:13-14. “*When I shut up heaven and there is no rain, or command the locusts to devour the land, or send pestilence among My people, if My people who are called by My name will humble themselves, and pray and seek My face, and turn from their wicked ways, then I will hear from heaven, and will forgive their sin and heal their land.*”

War By Other Means

Of course, a conflict between Russia and the West has been in the making even before Russia moved into Ukraine. Here’s the short history. Recall that in 2014 the West, including US intel were behind a revolution that chased a Ukrainian President from power. Then the Ukrainian military began attacking the ethnically Russian-speaking citizens in Luhansk and Donetsk. By 2021, Ukraine had massed 80,000 troops on the borders of those provinces. So, in February, Russian invaded. The West sanctioned Russian oil, gas and currency. Putin answered by moving away from the dollar and backing the Ruble with gold. Now, more countries are taking steps to back away from the US dollar. And the energy sanctions will hurt Europe more than it will the Russians. That’s the history of the conflict thus far. Here’s what has followed.

- Russia has shut off the natural gas to Germany. “Russia’s Gazprom has told customers in Europe it cannot guarantee gas supplies.” It announced it is declaring “Force Majeure.” “Known as an ‘act of God’ clause, force majeure is standard in business contracts and spells out extreme circumstances that excuse a party from their legal obligations.”¹³

- Russia has shut off the Nord Stream 1 pipeline. The head of Germany’s national energy regulator said that country’s reserves are not enough to get them through the winter.¹⁴
- Barring an unforeseen solution, if Russia completely shuts down the flow of gas to Europe it will affect not only home heating but also the operation of offices and factories and power plants, effectively shutting down the European economy.
- Of course, that will flow downstream to the already fragile US economy.
