

# PRELUDE TO WW3

There is a level of insanity going on – culturally yes – but especially in the highest levels that could see the

*Zelensky address a fawning Congress....in a sweat shirt*

lockdown of the entire human race in an electronically enforced medically-(un)justified prison, or the total global population jabbed with bio-weapons disguised as vaccines that will – over time - severely cull the population, – or the escalation of the war in Ukraine turn into a showdown of the world’s nuclear superpowers. And for the most part, we see the provocations coming mostly from the US, NATO & the West.

Consider for a moment the recent visit to Washington by the Ukrainian Dictator President. He was fawned over by the Capitol Establishment, compared to Winston Churchill and hailed as a hero. The Ukrainian cause was

identified as a Battle for Democracy. Zelensky, is NOT Churchill....and he is NOT a democrat with a small d. He is an autocrat who jails his political opponents – (or sometimes worse) – outlaws opposition political parties – (even ones that support the war) – shuts down the largest Christian denomination – (even when THEY support the war)....and has threatened to punish any Christian caught worshipping in “unapproved ways.” – and he's silenced opposition media. Yet we continue to give him money – and weapons – and military personnel, - (No, we’re not supposed to know about that.) In this latest round he left Washington with promises for nearly \$100 billion in additional aid – and a Patriot missile battery that just a month or so ago was off the table because it would require American personnel to operate. Not to worry, we already direct his weapons and assist with strikes on Russia....And now, in Russia. So, we are essentially already at war with Russia, inviting a response from Moscow against NATO targets that would justify coming in more openly.

This of course, follows the renegeing on our 1990’s promise not to expand NATO to the West of Germany – and of course, we did. It follows our help in engineering a coup and revolution in Ukraine in 2014 that ousted a duly elected president there, forcing him to flee the country and making Ukraine safe for corruption. It follows, what the West has now admitted was a sham agreement – the Minsk Agreements – which was supposed to make life safe for the Russian nationals living in the Donbass region of Ukraine. Angela Merkel and a former Ukrainian president have both admitted that those Minsk Agreements were made just to have time to build up the Ukrainian military. And despite those agreements, the government in Kiev continued to launch attacks and shell the Donbass region, killing around 14,000 mostly civilians. So, NATO continued its’ advance toward the east, toward Russia, until they made it clear they wanted welcome Ukraine in, which eventually put NATO missiles 5 minutes from Moscow and about 7 minutes from Russia’s nuclear arsenal. That would create the mirror image of the Cuban Missile Crisis – and would be an existential threat to the Russian Federation – and would probably cross the nuclear threshold. So, that’s the set-up. Let’s go to the present.

Pipeline explosion in Chuvashia

Moscow mall fire

US Army Special Ops Vet Jack Murphy claims US Intel and an unnamed NATO ally are running the sabotage missions that are targeting Russia. The Burning Platform reports that the NATO ally is Poland. The Russian news agency TASS reports: “Data from intercepted drones confirm the involvement of the US and Poland in preparation of terror attacks on the Russian territory.” Drones used in the attacks deep in Russian territory were analyzed. It was found that “the avionics and drone control stations were produced by US’ Spektreworks.” The assembly and flight trials were completed in Poland. Over the last few weeks, there have been several unexplained explosions within Russia itself. There have dozens of incidents including a massive fire at a shopping mall in Moscow and a gas pipeline 360 miles east of Moscow. Murphy: “CIA is behind spate of explosions in Russia.”<sup>1 2</sup>

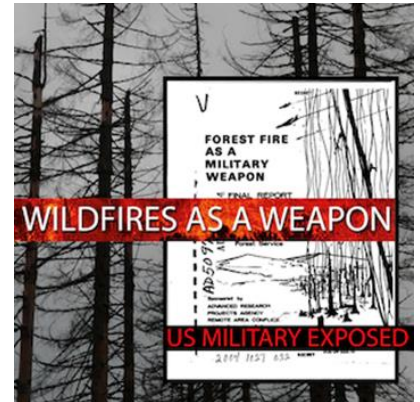

But it gets worse. From HTR: “NATO troops from Poland, and from the United States and United Kingdom are, in fact, participating in the war.” **The US military “has been routinely creating false identities for Active-Duty U.S. troops, and sending them into Ukraine.** The false identities are coordinated with Ukraine so that if the troops are caught, or killed, there is no traceable tie to the USA.” Hal Turner then goes on to cite “unimpeachable intel sources” in reporting that **there are more than 15,000 Polish troops in Ukraine operating as an arm of the Polish Armed Forces. This would mean that Russia could justifiably target Polish territory that is serving as the staging area for the Polish troops. If Russia did so, Poland could “invoke Article 5, Collective Self-Defense, in the NATO Treaty.” Article 5 would require all of NATO to come to Poland’s defense against Russia. And there you have it the doorway to World War – being shoved open by the West.**<sup>3</sup>

The purpose of the sabotage operation is to sow chaos behind Russian lines. This fits in nicely with Zelensky’s wish list. He – or rather his puppet masters – want much more than just the status quo ante bellum, you know, everybody back to the starting line before the war. Zelensky and his Neo-Con handlers want regime change, the end of Putin. And if they can get it, they want the breakup of the Russian Federation. Of course, this is unacceptable to the Russian leadership. In September of 2022, NEWSWEEK ran an article in which it quoted Dmitry Medvedev, Deputy Chairman of the Security Council and #2 man in the country as threatening – in certain circumstances – the use of strategic nuclear weapons. Those circumstances would include threats to the “territorial integrity” of Russia, the existence of the state or a direct attack on Putin. The article went on to disclose that the Pentagon was considering special, cyber and space operations and even “a decapitation strike to kill Putin in the heart of the Kremlin.”<sup>4</sup>

Russian Foreign Minister Sergey Lavrov warned of the consequences of such actions. These are real threats to the Russian Head of State, which is a crime under international law. Senator Lindsay Graham called for just such an assassination. Lavrov warned, “If someone really has such ideas, then this someone should think long and hard about the possible consequences of such plans.” Then he referenced Liz Truss, the former and “notorious” British Prime Minister who, in her election campaign, said “that she was ready to order a nuclear strike.” Then he reminded the world that Zelensky had also called for “NATO states to deliver preventive nuclear strikes against Russia.”<sup>5</sup> If you want to get a world war started this is how you do it. Russia has

asked for negotiations but the US, NATO and Zelinsky are refusing, all the while continuing to ramp up the war machine against Moscow.

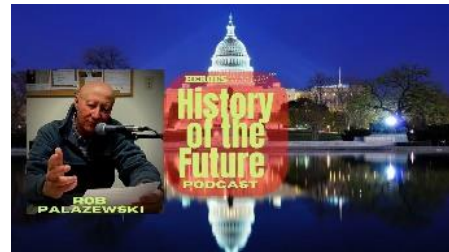

**FOREST FIRE WARFARE** – So, just far will the US Military go to win a war. We already know the Air Force is operating on controlling the weather – as are a number of foreign nations. But now we know wildfires are in the mix. Here’s Dane Wigginton for Geoengineering Watch. “Is the military industrial complex insane enough to incinerate Earth's last remaining forests in order to achieve the objectives of the global controllers? The short answer is yes. A formerly classified US military document titled "Forest Fire As A Military Weapon" is a truly shocking exposé of planned scorched Earth destruction. The US Forest Service actually participated in the research and planning that went into this military instruction manual for carrying out orchestrated forest fire catastrophes.... Geoengineering operations are completely disrupting the global hydrological cycle, drying out forests and driving record wildfires around the world. Climate engineering is fueling global incineration.
