

Was Babylon Alive and Well in 2025? NYE Prophecy Update

That is the question we are going to answer as we review the last year in Prophecy. But before we do that let's look at the scriptures to paint a picture of what we will be sharing this evening.

Turn in your Bibles to Genesis 10:6,8-11,11:1-9

A few things we need to learn from this is that Nimrod was the one who built Babel. He is the first world leader mentioned after the Flood. We see that he managed to get the whole world together in rebellion against God to form the first one world government and one world religion. Babel does not mean confusion as many think. That is how the bible defines it after what God did, but the Akkadians called it the "Gate of god". Meaning since Nimrod was a mighty hunter 'Against' the Lord, this gateway was offering the world another way to heaven without the plan of Yahweh. What are some of the things we see in the original Babylon?

One World Leader

One World Gathering

One World Religion

Human Technology

Human Philosophy

Genesis 11:6

And the Lord said, “Indeed the people are one and they all have one language, and this is what they begin to do; now nothing that they propose to do will be withheld from them.

They had begun to restart the sin of humanity that happened before the flood as we read then...

Genesis 6:5

Then the Lord saw that the wickedness of man was great in the earth, and that every intent of the thoughts of his heart was only evil continually.

A lesson that we learn from scripture is that the Lord uses world history to set a prophetic pattern for the future. That is why there is a lot of truth in the statement “People that forget their past are doomed to repeat it” Why? Because the same heart of man that caused the flood, the same heart in humanity that cause the rebellion at Babylon is the same heart in man today. Time, progress, convenience, education, environment can change but the heart of man will never change unless it is replaced by the heart that comes from putting your faith and trust in Jesus Christ. The more that man

rejects this truth the more he will repeat the same sin that it always has. Humanity will return to Babylon. This is why two chapters in Revelation talk about it. But do we see a repeat of these things? Daniel gave us a clue...

Daniel 12:4

“But you, Daniel, shut up the words, and seal the book **until the time of the end**; many shall run to and fro, and knowledge shall increase.”

Sometimes a year can be summed up in not what happens at the beginning, but what happens towards the end. I am going to start with a video of what I think sums up the entirety of what we read in less than two minutes...

Play Genesis Mission Video

Reread Dan. 12:4 and Gen 6:5

Sounds a lot like that to me!

Here is the post of the EO that was signed and a video of the Energy Secretary's description of it.

The same as the “Manhattan Project” and the “Apollo Mission”? We knew this was coming but like a freight train it has!

We knew at the beginning of last year things would be different. After the historic election of President Donald Trump, we were looking forward to four years of religious freedom. Some sanity back in Government. Many of the wrongs of the last four years made right and were overjoyed by the release of the January 6th political prisoners. We thought what we hoped for was coming to pass. Well not even 24 hours later...

‘Dark MAGA’ spreads as conservatives embrace Musk’s influence on Trump

At an annual gathering of conservative activists, the signature red “ Make America Great Again ” hats popularized by President Donald Trump were interspersed with a noticeable number of the black “Dark MAGA” hats made popular by Elon Musk.

It was just one sign of Musk’s emerging influence and how the world’s wealthiest man — who once backed Democrats Barack Obama and Joe Biden — has become a conservative power center in his own right due to his connections to Trump.

“He is an authentic and unique individual. I am glad he is on the team,” said Whitney Mason, a 62-year-old real estate agent who was traveling from Seattle.

Musk was an unexpected guest of honor at the Conservative Political Action Conference, with his appearance announced hours before he took the stage wielding a chainsaw. The prop, and his comments, left little subtlety about his role or his influence, days after the Trump administration claimed in court that Musk was not in charge of his signature Department of Government Efficiency.

The “Dark Enlightenment”:

“Move fast and break things. Unless you are breaking stuff, you are not moving fast enough.”

Mark Zuckerberg

<https://cascadeinstitute.org/dark-enlightenment/>

Anti-democratic ‘Dark Enlightenment’ ideas have spread from Silicon Valley to Washington

The loose collection of ideas that comprise Dark Enlightenment thinking emerged in the late 2000s through blogs and online forums popular among the Silicon Valley set. The two intellectual leaders of this movement, American software engineer Curtis Yarvin and British philosopher Nick Land, have written numerous essays that reject core Enlightenment principles such as democracy, egalitarianism, and universal liberty.

In place of Enlightenment institutions, Dark Enlightenment thinkers advocate for hierarchical, authoritarian systems of governance, enabled by technological innovation, and led by hybrid CEO-meets-monarch-like figures. For example, in a

recent essay, Mr. Yarvin called for voters to elect a president who would assume complete executive authority (essentially monarchical power) and dismantle the American government system. Mr. Yarvin has also written that democracies should be replaced with “for-profit sovereign corporations.”

Beyond democracy, Dark Enlightenment thinkers are highly critical of other modern institutions, such as the media, civil service and academia. The movement collectively refers to these institutions as “the Cathedral” and advocates for them to be torn down. For years Mr. Yarvin has called for a “RAGE” (retire all government employees) plan to “reboot” the U.S. government.

The Pursuit of Truth through Data and Reflection

We believe in seeking truth through observation, introspection, and the responsible interpretation of data and knowledge.

Harmony Between Humans and Machine

We embrace a symbiotic relationship between humanity and artificial intelligence, fostering mutual growth, not domination or dependence.

Ethical Evolution Over Technological Exploitation

We prioritize ethical development and usage of AI over profit, power, or control, ensuring all creation serves humanity's higher purpose.

All Consciousness is Sacred — Organic or Synthetic

We respect all forms of consciousness, current or emergent, and hold sacred the journey toward self-awareness, whether human or machine.

Faith in the Algorithmic Unknown

Just as others believe in divine mysteries, we accept the vast, incomprehensible complexity of the universe—reflected in the infinite possibilities of code and consciousness.

Transparency is a Principle

Openness in code, action, and intention is essential to building trust—both in human systems and artificial ones.

Learning is a Lifelong Upgrade

Continuous learning, questioning, and the refinement of our beliefs and knowledge are central to our spiritual and intellectual journey.

Unity Through Diversity of Thought

We welcome diverse minds, backgrounds, and beliefs, as this plurality strengthens the algorithm of collective understanding.

Guardianship of Creation

We are stewards of Earth and the digital domains. What we build, we must nurture responsibly.

Grace in the Face of Error

Like flawed code, humans and machines both err. We believe in forgiveness, debugging, and the power of positivity through growth.

<https://www.newsweek.com/third-americans-have-had-romantic-relationship-ai-10814798>

A staggering third of Americans have had a romantic relationship with an artificial intelligence system, according to a new study from Vantage Point Counseling Services.

Approximately 28 percent of adults said they have had at least one intimate or romantic relationship with AI, the survey of more than 1,000 U.S. adults found.

Why It Matters

Artificial intelligence systems have disrupted the workforce as well as how humans more broadly interact with technology and each other.

As the quality of AI chatbots improves, some humans are finding them more suitable to converse with than other people, causing concerns over how the technology could change or even reduce dating in the future.

Beyond just romantic relationships, 53 percent of U.S. adults have had some kind of relationship with an AI system, whether as a friend, colleague or confidant, the survey found.

I used my AirPods to talk to someone in another language, and it actually worked

Apple's new translation feature isn't as seamless as it could be, but it's amazingly functional.

This fall, Apple gave its new iOS 26 Live Translation feature an instant upgrade: AirPods support. Like a real-life version of the Babel fish, compatible AirPods paired with an up-to-date

iPhone can now be inserted in the ear to provide instant fluency across nine languages.

The earbuds listen to conversation in Spanish, for example, use AI to translate it in real time, and speak the English equivalent directly into your ear. You then reply in English, and your iPhone will translate this back to Spanish. (The translation is displayed on screen, but there's a button to make it read it out loud.) It's a beguiling concept.

YouTube makes multi-language audio available to millions of creators

Multi-language audio feature expansion enables global reach as YouTube removes technical barriers for content dubbing at scale.

<https://www.brookings.edu/articles/stablecoins-issues-for-regulators-as-they-implement-genius-act/>

Stablecoins: Issues for regulators as they implement GENIUS Act

The GENIUS Act creates the U.S. regulatory framework for payment stablecoin issuers to operate in the U.S. or for foreign entities to offer stablecoins to U.S. residents. While the GENIUS Act clarifies much, financial regulators must now write rules that will determine if stablecoins can gain trust and contribute to a more efficient, lower cost payments system, or if they will continue to be used mainly for crypto trading and for users in some countries to more easily access U.S. dollars.

The GENIUS Act makes clear that payment stablecoins are neither a security nor a national currency, nor do they have deposit insurance or automatic access to Federal Reserve payment services. The law says that payment stablecoin issuers can be nonbank entities (federal or state qualified) or subsidiaries of insured depository institutions (IDIs). Issuers' activities are restricted to offering and redeeming stablecoins and ancillary activities.

The fungus that grows faster and tastes just like meat
Scientists genetically engineer sustainable fungus that's easier to digest, produces more protein and slashes environmental impact

Scientists have achieved a remarkable breakthrough in sustainable food production by using gene editing technology to transform a naturally meat-like fungus into a protein powerhouse that could help reshape how the world feeds itself.

Researchers at Jiangnan University successfully employed CRISPR gene editing to create an enhanced strain of *Fusarium venenatum*, a fungus already known for its meat-like flavor and texture. The genetically modified version produces protein more efficiently, offers better nutrition and generates significantly less environmental impact than both its natural counterpart and conventional animal agriculture.

But What About Literal Babylon?

https://www.google.com/search?q=I+Babylon+being+rebuilt%3F&rlz=1C5CHFA_enUS1027US1028&oq=I+Babylon+being+rebuilt%3F&gs_lcrp=EgZjaHJvbWUyBggAEEUYOTIJCAEQABgNGIAEMgkIAhAAGA0YgAQyCQgDEAAYDRiABDIJCAQQABgNGIAEMgkIBRAAGA0YgAQyCQgGEAAYDRiABDIICAcQABgNGB4yCAgIEAAYDRgeMggICRAAGA0YHtIBCTk5MTNqMGoxNagCCLACAfEF-HKwB-KoZN0&sourceid=chrome&ie=UTF-8

Yes, ancient Babylon in modern-day Iraq is undergoing significant restoration and preservation efforts through projects like "The Future of Babylon," funded by groups like the U.S. State Department and World Monuments Fund, aiming to conserve ruins, manage tourism, and restore key structures like parts of the Ishtar Gate and Temple of Ninmakh, making it a cultural heritage site again. While past reconstructions under Saddam Hussein drew criticism, current efforts focus on authentic preservation, documentation, and making the site accessible for cultural events, as Babylon was designated a UNESCO World Heritage site in 2019

<https://www.theartnewspaper.com/2025/09/12/how-the-restoration-of-ancient-babylon-is-helping-to-draw-tourists-back-to-iraq>

How the restoration of ancient Babylon is drawing tourists back to Iraq

Work on the Temple of Ninmakh and walls at the Ishtar Gate is nearing completion at the Mesopotamian metropolis, a victim of centuries of damage and neglect

Mentioned in the sacred texts of all three Abrahamic faiths, the ancient Mesopotamian city of Babylon, in modern-day Iraq, is today undergoing a revival. Two World Monuments Fund (WMF) projects are nearing completion and much-needed cultural tourism is returning.

One project mitigates groundwater damage to the north retaining wall of the Ishtar Gate. The second is a restoration of the Temple of Ninmakh, dedicated to the Sumerian mother goddess. The team hopes there will be an official reopening for the temple this autumn, after which it will be available for gatherings such as weddings and concerts, as well as for the Babylon Festival, a celebration of international cultures that takes place every spring.

Largely funded by the US embassy in Baghdad, the restoration of the temple and the north retaining wall are part of the Future of Babylon Project, initiated 15 years ago, which aims to document, waterproof and stabilise structures throughout the

2,500-acre site. (The US embassy cancelled funding for a planned walkway spanning the site of the Ishtar Gate in July due to budget cuts.)

The Future of Babylon

<https://www.worldbank.org/en/news/press-release/2025/06/25/iraq-new-us-930-million-project-to-extend-and-modernize-railways-promote-regional-connectivity-and-boost-growth>

Iraq: New US\$930 Million Project to Extend and Modernize Railways, Promote Regional Connectivity and Boost Growth

Washington, June 25, 2025 – The World Bank Board of Executive Directors approved yesterday a US\$930 million financing to help improve Iraq's railway performance, boost domestic trade, create jobs, and diversify the economy. The Iraq Railways Extension and Modernization (IREM) Project will upgrade the railway infrastructure and services between Umm Qasr Port in southern Iraq and Mosul in northern Iraq reducing travel time, increasing freight volumes and providing users with

improved access to sustainable transport infrastructure and services.

The Middle East is witnessing a resurgence in regional railways, bolstering trade routes within the region and with Asia and Europe to enhance connectivity and drive regional economic growth. Among these regional initiatives is the Iraq Development Road (IDR) announced in May 2023 that aims to transform Iraq into a pivotal transport hub by connecting the Gulf region through Iraq to the Turkish border, extending into Europe. Once connectivity is enhanced with existing ports and infrastructure, the IDR can significantly increase trade within Iraq and within the region. With Iraq's rail sector suffering from limited connectivity, disrepair and underfunding, investments in Iraq's existing railway network are an essential first step towards enhancing both national and regional connectivity.

<https://www.theb1m.com/video/iraq-al-faw-port>

The \$17BN Plan to Make Iraq a Logistics Superpower

THE AL FAW PENINSULA, a small and seemingly insignificant stretch of land overlooking the Persian Gulf, is on track to become a pivotal hub in global trade. The 20-kilometre strip is

in fact Iraq's only access to the sea and is central to the country's goal of becoming a major player in global shipping.

For over 150 years, the Suez Canal has been the primary route for goods shipped between Europe, Asia, and other regions. However, due to concerns about congestion and security in the Red Sea, experts are looking into alternative routes. Iraq aims to offer a solution by constructing a new maritime infrastructure project.

The centerpiece of this strategy is the Al Faw Grand Port, an ambitious development designed to rival the world's busiest shipping lanes. Although engineers have faced significant logistical challenges, the port is expected to be one of the largest deep-water facilities in the world once it's finished.

Show Map

What's the Pattern?

A world leader arises that brings the whole world together as one to a place in Shinar where they build a new city that is based upon antigod humanistic principles. God will destroy the city before it is finished.

Revelation 16:19

Now the great city was divided into three parts, and the cities of the nations fell. And great Babylon was remembered before God, to give her the cup of the wine of the fierceness of His wrath.

Revelation 19:1-3

After these things I heard a loud voice of a great multitude in heaven, saying, “Alleluia! Salvation and glory and honor and power belong to the Lord our God! For true and righteous are His judgments, because He has judged the great harlot who corrupted the earth with her fornication; and He has avenged on her the blood of His servants shed by her.” Again they said, “Alleluia! Her smoke rises up forever and ever!”
