The rioting across France is a symptom of a much larger public and political crisis

“We have a mess on our hands, to put it bluntly,” French Prime Minister Sebastien Lecornu said Monday.

If anything, he might be guilty of understatement. After widespread rioting at the weekend – estimated to have cost several hundred million dollars in property damage and theft – France faces a toxic mix of urban rebellion, political drift and economic crisis.

The disorder at the weekend occurred in major cities across the country, leading Interior Minister Laurent Nuñez to offer his resignation because of the police’s failure to contain the rioting.

The violence at the weekend, which led to some 2,400 arrests, followed weeks of protests by French students angry about crumbling schools, a lack of teachers and dismal job prospects. More than 6,000 arrests were made during the school protests that began at the start of the fall term and more than 100 schools were damaged.

More demonstrations are scheduled for next weekend. In November, labor unions plan to strike.

France faces a winter of discontent in the run-up to a presidential election next spring. The far-right candidate Marine Le Pen is leading in the polls.

More than 1,300 antisemitic posts blame Israel, Jews for French riots – report

At least 1,384 antisemitic social media posts blamed Israel and Jews for violent riots across France, according to a Combat Antisemitism Movement (CAM) report published Sunday.

The report identified 816 unique accounts spreading conspiracy theories that blamed Israel, Mossad, Zionists and Jews for the unrest.

Based on searches using 25 keywords in seven languages, the research documented how antisemitic narratives portrayed the riots as a deliberate operation orchestrated by Jews and Israel, with some posts calling for the expulsion or extermination of Jews.

SACRED TOMB IN FLAMES! Suspects Flee After Arson Attack on Jewish Shrine

The IDF is hunting for suspects involved in the torching of a Jewish holy site in the Arab village of Awarta in Samaria near Shechem (Nablus).

A group of Arabs set the tomb, which is believed to be the grave of Eleazar the Priest (son of the biblical Aaron), on fire and posted a video of the site burning, along with songs of praise.

FBI Arrests 17-Year-Old Texas Teen Accused of Plotting to ASSASSINATE Anti-Sharia Congressman Keith Self and Carry Out ISIS Terror Attack in North Texas

The FBI has arrested and charged a 17-year-old from McKinney, Texas, for allegedly planning to assassinate U.S. Representative Keith Self and carry out an ISIS-inspired terrorist attack in North Texas.

The juvenile was taken into custody on October 5 after acquiring a firearm, according to federal sources. He remains in federal custody; his name has not been released, according to WFAA.

U.S. Reportedly Considering Major Strikes on Iran After Midterms

he U.S. and Israel are reportedly developing plans for major strikes on Iran after the U.S. midterm elections in November.

Citing people familiar with the deliberations, the New York Times reported on Wednesday that Defense Secretary Pete Hegseth discussed the possibility of renewed strikes on Iran with Israeli Prime Minister Benjamin Netanyahu in Israel this

week. Possible targets of the strikes reportedly include Iran's energy infrastructure, nuclear facilities, and missile and drone arsenal. TIME has reached out to the White House for comment.

Peter Thiel Draws Hundreds Downtown for 'Antichrist' Lectures

The tech billionaire's Christian theology quickly veered off into a meandering theory of everything

A crowd flocked to downtown Nashville Monday night for a different kind of show. Tech billionaire Peter Thiel brought the first installment of his four-part lecture series on the Antichrist to Broadway, drawing hundreds to the Grand Lodge of Tennessee for speculative theology that quickly turned into one man's theory of everything. No journalists, pens or notebooks were allowed in the venue. Less than an hour after the lecture ended, the Scene obtained multiple full event transcripts and recordings.

His lecture on Monday night, which lasted about an hour, strayed into another obsession — Christianity and the end times — woven through with the fear and contradiction that stray into conspiracy and often accompany ideological anti-authoritarianism.

“A big part of why I'm doing this series is because I believe it is dangerous to focus on just one risk,” Thiel told the crowd in his closing remarks. “There's one existential risk that nobody seems to want to discuss — which I would like to add to the list if we're gonna enumerate existential risks — and that is the risk of a totalitarian one-world government.”
