

The Psy-ops have begun!

Brandon Holtshouse has a Prophecy Update this week entitled "The New AI Religion". He makes some good points in it.

But I would draw your attention to my New Years Eve Prophecy update entitled When the clock strikes midnight were I describe the coming Quantum Computing Apocalypse that is and has come.

https://www.realclearpolitics.com/video/2023/04/17/elon_musk_im_a_specist_and_pro-human_google_larry_page_wants_to_become_a_digital_god.html

Elon Musk: I'm A Speciesist And Pro-Human, Google's Larry Page Wants To Become A "Digital God"

CARLSON: What did he say about it? (Larry Page of Google)

MUSK: He really seemed to be -- wanted sort of digital superintelligence, basically a digital god, if you will, as soon as possible.

CARLSON: Hey wanted that?

MUSK: Yes. He's made many public statements ever the years, the whole goal of Google is what's called AGI, artificial general intelligence, or artificial superintelligence. I agree there's great potential for good, but there's also potential for bad. If you've got some radical new technology you want to try to take a set of actions, maximize the probability it will do good, minimize probably it will do bad things.

<https://techcrunch.com/2021/02/18/anthony-levandowski-closes-his-church-of-ai/>

Anthony Levandowski closes his Church of AI
Way of the Future's funds donated to NAACP

The first church of artificial intelligence has shut its conceptual doors.

Anthony Levandowski, the former Google engineer who avoided an 18-month prison sentence after receiving a presidential pardon last month, has closed the church he created to understand and accept a godhead based on artificial intelligence.

The Way of the Future church, which Levandowski formed in 2015, was officially dissolved at the end of the year, according to state and federal records. However, the process had started months before in June 2020, documents filed with the state of California show. The entirety of the church's funds — exactly \$175,172 — were donated to the NAACP Legal Defense and Education Fund. The nonprofit corporation's annual tax filings with the Internal Revenue Service show it had \$175,172 in its account as far back as 2017.

Why? To leave the door open for the machine to create it itself!

So, if this can think and act for itself then it will use psy-ops on us to gain control. This will take Fake News to whole new level.

<https://quantumai.google>

Explore the possibilities of quantum
Google Quantum AI is advancing the state of the art of quantum computing and developing the tools for researchers to operate beyond classical capabilities.

<https://thequantuminsider.com/2023/03/15/how-close-are-we-to-quantum-artificial-intelligence/>

How Close Are We To Quantum Artificial Intelligence?

<https://neurosciencenews.com/non-abelian-anyons-google-ai-23229/>

Google Quantum AI Breaks Ground: Unraveling the Mystery of Non-Abelian Anyons

: For the first time, Google Quantum AI has observed the peculiar behavior of non-Abelian anyons, particles with the potential to revolutionize quantum computing by making operations more resistant to noise.

Non-Abelian anyons have the unique feature of retaining a sort of memory, allowing us to determine when they have been exchanged, even though they are identical.

The team successfully used these anyons to perform quantum computations, opening a new path towards topological quantum computation. This significant discovery could be instrumental in the future of fault-tolerant topological quantum computing.

In other words it thinks for itself now on a quantum level!

<https://www.indianweb2.com/2023/05/in-breakthrough-google-quantum-ai.html>

In A Breakthrough, Google Quantum AI Creates Anyon, A Particle That Remembers Its Past

A mysterious and long-sought particle that can remember its past has been created using a quantum computer. The particle, called an anyon, could improve the performance of quantum computers in the future.

This anyon is unlike any other particle we know because it keeps a kind of record of where it has been.

Assume that you're shown two identical objects — of atomic sizes — and then asked to close your eyes. Open them again, and you see the same two objects. How can you determine if they have been exchanged/swapped or not? Human intuition says that if the objects are truly identical, there is no way to distinguish.

This again as I mentioned before is opening doors that man is not supposed to open!

These things have been happening for years behind the scenes and are now in hyper drive. The Government had them first so we know what we can't see or hear about are much more advanced.

How can we know?

The first programs to use AI are Facebook and Twitter. They call them Algorithms but that is just another word for AI. These things were developed by the government and then lent out to the sources that have brand names on them today.

Regina Dugan is responsible for them.

https://en.wikipedia.org/wiki/Regina_E._Dugan

Regina E. Dugan (born March 19, 1963), is an American businesswoman, inventor, technology developer and government official. She was the first female director of the Defense Advanced Research Projects Agency (DARPA), where she served from July 2009 until March 2012.

Dugan began working for DARPA in 1996. Over the next 4 years, she led numerous multimillion-dollar research programs.

After leaving DARPA in March 2012, she was appointed to an executive position at Google. There, she led and created Advanced Technology and Projects (ATAP) at Motorola Mobility, a subsidiary of Google. In January 2014, it was announced that Motorola Mobility would be acquired by Lenovo. Dugan and her team were retained by Google. She later moved to Facebook, joining a team called Building 8. In October 2017, she announced that she would be leaving in early 2018 to pursue other endeavors.[4][5][6] In May 2020, she was announced as the CEO of Wellcome Leap.

Unconventional projects. Funded at scale.

Wellcome Leap aims to deliver breakthroughs that could fundamentally change science and transform human health over five to ten years.

The high-risk nature of this funding approach means that not all goals will be achieved. And we accept and embrace that, as we know that failure is an inherent part of innovation.

Dugan partly attributes DARPA's success to an unwavering dedication to Pasteur's quadrant. The term, coined by political scientist Donald E. Stokes in his 1997 book by the same name, describes innovation that advances basic research and solves practical problems. It is contrasted with Bohr's quadrant, which seeks foundational knowledge about the world without any consideration for practical application and with Edison's quadrant in which purely practical problem solving is attempted.

Here we are back to the quantum theory!

Monkey has done a lot of research on her, and she is the mother of all these things we use today that the military were using way before us.

So, we can be sure we don't know what they do have now. We can know we can't trust it and it has most likely taken over our government and soon the whole world.

This week we learned what we already knew all along...

<https://www.foxnews.com/opinion/durham-report-exposes-media-tyranny-lies>

Durham report exposes media's tyranny of lies

Tyranny comes in many forms, including a tyranny of lies. As we soak in the damning findings of the Durham report one thing becomes crystal clear, the American news media, whether wittingly or not, has been misleading us since the moment Donald Trump became a political figure.

Beginning in 2016 the mainstream news media has swallowed every sugary dollop of supposed scandal that their deep state sources tempted them with, from pee tapes, to non-existent Trump ties to Russia, to Hunter's laptop being disinformation, and on and on and on.

This was their excuse for the election. Well guess what? They have their excuse ready just in case.

<https://www.upmatters.com/politics/ap-politics/ai-presents-political-peril-for-2024-with-threat-to-mislead-voters-were-not-prepared-for-this/>

AI presents political peril for 2024 with threat to mislead voters

Computer engineers and tech-inclined political scientists have warned for years that cheap, powerful artificial intelligence tools would soon allow anyone to create fake images, video and audio that was realistic enough to fool voters and perhaps sway an election.

The synthetic images that emerged were often crude, unconvincing and costly to produce, especially when other kinds of misinformation were so inexpensive and easy to spread on social media. The threat posed by AI and so-called deepfakes always seemed a year or two away.

Sophisticated generative AI tools can now create cloned human voices and hyper-realistic images, videos and audio in seconds, at minimal cost. When strapped to powerful social media algorithms, this fake and digitally created content can spread far and fast and target highly specific audiences, potentially taking campaign dirty tricks to a new low.

The implications for the 2024 campaigns and elections are as large as they are troubling: Generative AI can not only rapidly produce targeted campaign emails, texts or videos, it also could be used to mislead voters, impersonate candidates and undermine elections on a scale and at a speed not yet seen.

We can see that it is now no longer people controlling the elections but the AI. By next year the Quantum brain of this thing will be unstoppable!

<https://www.nih.gov/news-events/news-releases/clinical-trial-mrna-universal-influenza-vaccine-candidate-begins>

A clinical trial of an experimental universal influenza vaccine developed by researchers at the National Institute of Allergy and Infectious Diseases' (NIAID) Vaccine Research Center (VRC), part of the National Institutes of Health, has begun enrolling volunteers at Duke University in Durham, North Carolina. This Phase 1 trial will test the experimental vaccine, known as H1ssF-3928 mRNA-LNP, for safety and its ability to induce an immune response.

This is the government working on this not the pharmaceutical companies!

“A universal influenza vaccine would be a major public health achievement and could eliminate the need for both annual development of seasonal influenza vaccines, as well as the need for patients to get a flu shot each year,” said Acting NIAID Director Hugh Auchincloss, M.D. “Moreover, some strains of influenza virus have significant pandemic

potential. A universal flu vaccine could serve as an important line of defense against the spread of a future flu pandemic.”

We already know that they have developed a programmable one as we shared over a year ago.

https://mrhc.health.mil/index.cfm/media/news_releases/2021/pan_coronavirus_vaccine_development_strategy

Series of Preclinical Studies Supports the Army's Pan-Coronavirus Vaccine Development Strategy

A series of recently published preclinical study results show that the Spike Ferritin Nanoparticle (SpFN) COVID-19 vaccine developed by researchers at the Walter Reed Army Institute of Research External link (WRAIR) not only elicits a potent immune response but may also provide broad protection against SARS-CoV-2 variants of concern as well as other coronaviruses.

Scientists in WRAIR's Emerging Infectious Diseases Branch (EIDB) developed the SpFN nanoparticle vaccine, based on a ferritin platform, as part of a forward-thinking "pan-SARS" strategy that aims to address the current pandemic and acts as a first line of defense against variants of concern and similar viruses that could emerge in the future.

As we have said before that the Ferritin Nanoparticle is programmable. But who will be programming it? It's not too hard to figure out!

Then there's this...

<https://www.niaid.nih.gov/news-events/first-human-trial-oral-drug-remove-radioactive-contamination-begins#:~:text=A%20first%20in%20human%20clinical,14%2D1%20in%20healthy%20adults.>

A first-in-human clinical trial of an experimental oral drug for removing radioactive contaminants from inside the body has begun. The trial is testing the safety, tolerability and processing in the body of escalating doses of the investigational drug product HOPO 14-1 in healthy adults. The National Institute of Allergy and Infectious Diseases (NIAID),

part of the National Institutes of Health, is funding the Phase 1 trial, which is sponsored and conducted by SRI International of Menlo Park, California.

They wouldn't be preparing for what we think would they?

But we can trust everything we read right? They are not trying to use psychological warfare on us, would they?

<https://www.theverge.com/23610427/chatbots-chatgpt-new-bing-google-bard-conversational-ai>

Bing, Bard, and ChatGPT: AI chatbots are rewriting the internet

<https://www.bloomberg.com/news/articles/2023-05-01/ai-chatbots-have-been-used-to-create-dozens-of-news-content-farms#xj4y7vzkg>

AI Chatbots Have Been Used to Create Dozens of News Content Farms

A new report documents 49 new websites populated by AI tools like ChatGPT and posing as news outlets

The news-rating group NewsGuard has found dozens of news websites generated by AI chatbots proliferating online, according to a report published Monday, raising questions about how the technology may supercharge established fraud techniques.

The 49 websites, which were independently reviewed by Bloomberg, run the gamut. Some are dressed up as breaking news sites with generic-sounding names like News Live 79 and Daily Business Post, while others share lifestyle tips, celebrity news or publish sponsored content. But none disclose they're populated using AI chatbots such as OpenAI Inc.'s ChatGPT and potentially Alphabet Inc.'s Google Bard, which can generate detailed text based on simple user prompts. Many of the websites began publishing this year as the AI tools began to be widely used by the public.

What about the government? We know what is going to happen in the future...

Revelation 13:3-4

And I saw one of his heads as if it had been mortally wounded, and his deadly wound was healed. And all the world marveled and followed the beast. 4 So they worshiped the

dragon who gave authority to the beast; and they worshiped the beast, saying, "Who is like the beast? Who is able to make war with him?"

Revelation 13:14

And he deceives those who dwell on the earth by those signs which he was granted to do in the sight of the beast, telling those who dwell on the earth to make an image to the beast who was wounded by the sword and lived.

2 Thessalonians 2:9-10

The coming of the lawless one is according to the working of Satan, with all power, signs, and lying wonders, 10 and with all unrighteous deception among those who perish, because they did not receive the love of the truth, that they might be saved.

Why do you think that Jesus said to us

Matthew 24:4

"Take heed that no one deceives you."

Colossians 3:2-3

Set your mind on things above, not on things on the earth. 3 For you died, and your life is hidden with Christ in God.

Philippians 4:6-7

Be anxious for nothing, but in everything by prayer and supplication, with thanksgiving, let your requests be made known to God; 7 and the peace of God, which surpasses all understanding, will guard your hearts and minds through Christ Jesus.

What about the church? Are they heading the word of Christ?

https://thedissenter.substack.com/p/featured-lifeway-speaker-who-says-e44?utm_source=substack&utm_medium=email

Featured LifeWay Speaker Who Says God Raised Up Homosexuals as the Most Credible Voices on Sexuality Defends Rachel Gilson

Yesterday, The Dissenter broke the story that a Southern Baptist Convention-approved women's conference during the annual meeting would be featuring a speaker who

preached a sermon a few years ago stating that homosexuals who are in a "gay marriage" might stay together because "God hates divorce." This same woman, Rachel Gilson, also said during a podcast that homosexual "Christians" can live out their sexuality faithfully whether they are attracted to men, women, both, or even potted plants.

https://www.prophecynewswatch.com/article.cfm?recent_news_id=6102

And then today in Prophecy News Watch

Shock Poll: Results Show More Than Half Of Christians Are Deceiving Themselves

More than half of born-again Christians don't believe Jesus lived a sinless life.

That is what the respected George Barna survey tells us.

Many people want to blame this sorry state all on COVID-19, when 15 million people stopped attending church in America.

As the apologetics website Got Questions explains, Jesus being sinless is central to the hope Christians have in Him as Savior. It explains why it's so important to believe. If he was not God incarnate, Jesus would not be able to forgive sins.

Born-again Christians make up the backbone of church activity and a high level of commitment to their faith, but the study shows that between 2020 and 2023, the share of those who say they believe Jesus did not commit sins during his lifetime on Earth fell from 58% to 44%.

This shift in belief among born-again Christians was among six that showed a significant decline in the past three years, which Barna characterizes as "indefensible." Those include the findings that fewer than half of born-again Christians now believe they have a unique, God-given calling or purpose. The share of those who held that belief fell from 88 to 46% during the pandemic.

We are living in the Apostasy!

https://www.supremecourt.gov/opinions/22pdf/22-592_5hd5.pdf

Since March 2020, we may have experienced the greatest intrusions on civil liberties in the peacetime history of this country. Executive officials across the country issued emergency decrees on a breathtaking scale. Governors and local leaders imposed lockdown orders forcing people to remain in their homes. They shuttered businesses and schools, public and private. They closed churches even as they allowed casinos and other favored businesses to carry on. They threatened violators not just with civil penalties but with criminal sanctions too. They surveilled church parking lots, recorded license plates, and issued notices warning that attendance at even outdoor services satisfying all state social-distancing and hygiene requirements could amount to criminal conduct. They divided cities and neighborhoods into color-coded zones, forced individuals to fight for their freedoms in court on emergency timetables, and then changed their color-coded schemes when defeat in court seemed imminent.
