“I’m going to say something that might make people feel a little bit uncomfortable,” Mulvaney told the crowd at Rockefeller Center in New York City. “I’m trying really hard to maintain a relationship with God. Mulvaney continued: “I don’t think He made a mistake with me, and that maybe one day, I will actually be grateful for being trans, that this isn’t some curse, but it’s just a different path to the same destination.”

If we are committed to Christ and His Word...

1. We do not attack anyone for their beliefs or behaviors
2. We do not affirm everyone’s beliefs and behaviors
3. We do not assume our beliefs and behaviors are understood and thus we continue to establish, teach, encourage, and celebrate the good news of God’s design for our lives.

“A woman is an adult human female. Women possess two X chromosomes and are typically capable of conception, pregnancy and giving birth from puberty until menopause. Female anatomy differs completely from the male. A woman may undergo a hysterectomy and mastectomy, and yet her biological, genetic, hormonal and chromosomal sex is intact. She remains in every sense a woman.”
