Existential nihilism is the philosophical theory that life has no intrinsic meaning or value. With respect to the universe, existential nihilism suggests that a single human or even the entire human species is insignificant, without purpose and unlikely to change in the totality of existence.

A nihilist is a man who judges that the real world ought not to be and that the world as it ought to be does not exist. According to this view, our existence (action, suffering, willing, feeling) has no meaning: this 'in vain' is the nihilists' pathos. --Friedrich Nietzsche,

Hebrews 6:10 (ESV)

Because He lives, your life has meaning.

So, mean to life.
