

The Moon and Worship

Message given by, Pete Goodman

It's estimated that the moon only reflects between 3-12% of the sunlight that hits it. I suppose that speaks to just how powerful the sun is. It would take 200-300 thousand full moons to equal the brightness of the sun.

The moon is actually a lifeless, pockmarked, pavement gray rock floating through space alone and empty. Until, the light from the sun shines upon its surface and reflects down to us, filling our night sky with a vibrant glow of life. Amazing isn't it, that so much light and life could come from a pile of gray, dusty earth. How could something so amazing actually owe all of its brilliance and life to something else? But do you know what else is just a pile of lifeless, dull, gray dust?

Life Group Discussion Questions

1. What does it mean to be created in the image of God (Gen 1:26-27)?
2. Read Romans 1:21-25. How does this passage of scripture help us understand who God is (what he all about) and who we are called to be?
3. What did you find most interesting, or challenging from this week's message?
4. "To obey is to reflect God's image." What does the bible mean when it suggests that God desires obedience over sacrifice?
5. Would you say that you are reflecting God's image currently in your life (why or why not)? What's holding you back?
