

# Creation vs. Evolution

## Science and the Bible Message Series Week 2

Randy Gehman

August 8, 2021

### Two major views of life:

- Evolution
- Creation

**The battle is not over facts but interpretations.**

### Fossils:

- *Billions of dead things, buried in rock layers laid down by water all over the earth.*
- "...through one man sin entered into the world, and death through sin..."

Romans 5:12, NASB

- Most fossils were buried and formed rapidly.
- Archaeopteryx
- Origin of Flight
- Horse Evolution

## Created Kinds

## Homologous Structures

## Vestigial Structures

## Things do change.

- Genetic variation
- Mutation

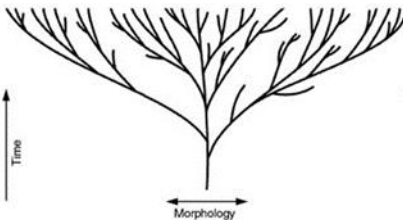

Evolution predicts:

- Beneficial mutations
- Stronger, more efficient organisms
- Increase in information

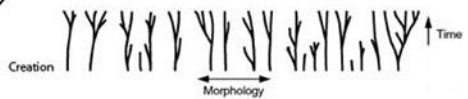

Creation predicts:

- Harmful mutations
- Reduced efficiency
- Death
- Loss of information

“Tree of Evolution”

“Creation Orchard”

The creationist “orchard”: diversity has occurred over time, within the original created kinds.
